PROVISIONAL ORDER FOR THE REGULATION OF A COMMON.

WHEREAS persons interested in certain lands called or known as The Moor, Pope's Meadow, and Bell Close, situate in the Borough of Luton, in the County of Bedford, such lands being a common within the meaning of "The Inclosure Acts, 1845 to 1882," and hereinafter collectively referred to as "The Common," have made application to the Board of Agriculture to issue a Provisional Order for the Regulation of the Common, and to certify that it is expedient that such Provisional Order should be confirmed by Parliament:

And whereas it has been made to appear to the said Board that the persons making the said application represent at least one-third in value of such interests in the common as are proposed to be affected by the Provisional Order:

And whereas the said Board, having taken the said application into consideration, were satisfied that a *primâ facie* case had been made out, and that, regard being had to the benefit of the neighbourhood as well as to private interests, it was expedient to proceed further in the matter, and accordingly ordered a local inquiry to be held by an Assistant Commissioner:

And whereas the said Assistant Commissioner, having caused public notice to be given, as required by the said Acts, held, pursuant to the said notice, public meetings at the Town Hall, Luton, on the 5th and 6th days of June 1893, at the respective hours of eleven in the morning and seven in the evening, to hear all persons desirous of being heard on the subject matter of the said application, and any information or evidence which might be offered in relation thereto, and inquired into the correctness of the statements in the said application, and otherwise into the expediency of making the Provisinal Order applied for, and into the nature of the provisions to be inserted in such Provisional Order:

And whereas the said Assistant Commissioner inspected the common as required by the said Acts:

And whereas the said Assistant Commissioner duly reported in writing to the said Board the result of the local inquiry and of the public meetings held by him, together with the information obtained by him as to the several particulars in the said application, and all other information required by the said Acts, and annexed to his report a sketch map of the common, a copy of which map is deposited in the office of the said Board:

And whereas the Corporation of the Borough of Luton, as the Urban Sanitary Authority of the said borough to which the common is suburban within the meaning of the said Acts, have, with the sanction of the said Board, entered into an undertaking to contribute out of their funds such sums as may from time to time be necessary for the maintenance of the common.

Now, therefore, the Board of Agriculture, in pursuance of the powers given to them by the Board of Agriculture Act, 1889, and the said Acts, and being satisfied that, having regard to the benefit of the neighbourhood, as well as to private interests, the regulation of the common is desirable, have framed, for the consideration of the persons interested, this Draft Provisional Order, specifying the provisions for the benefit of the neighbourhood and the improvement of the common which are to be put in force, and the terms and conditions on which, provided the necessary consents are given thereto, they are prepared to certify that it is expedient the Provisional Order should be confirmed by Parliament (that is to say):—

That there be reserved to the inhabitants of Luton and the neighbourhood a right of free access to the common, and a privilege of playing cricket and other games and enjoying reasonable recreation thereon, subject to such bye-laws as may from time to time be made by the said Corporation.

That, in consideration of the said Corporation, as such Urban Sanitary Authority as aforesaid, having undertaken to contribute out of their funds such sums as may from time to time be necessary for the maintenance of the common, the general management of the common be vested in the said Corporation, who shall have power for the improvement of the common to drain, manure, level, fence, plant, or in any other way improve or add to the beauty of the common, and to make bye-laws and regulations for the prevention of, and protection from nuisances, and for keeping order upon the common, including the regulation of the exercise of lawful rights of common subsisting over or on the common.

That,

That, for the purposes of giving complete effect to this Provisional Order, there shall be inserted in the award to be made in pursuance of the said Acts such provisions not inconsistent with such Acts, as the said Board shall think desirable and proper.

In witness whereof the Board of Agriculture have hereunto set their Official Seal this thirteenth day of December One thousand eight hundred and ninety-three.

Jacob Wilson.
Authorised by the President.

REPORT.

TO THE PRESIDENT OF THE BOARD OF AGRICULTURE.

SIR,

In presenting the last of a long series of Annual Reports an opportunity is afforded me of referring to the work which has been done in the Veterinary Department from the time of its establishment more than a quarter of a century ago.

Outbreak of cattle-plague in 1865.

When the cattle-plague appeared in London in 1865 it found the public, agriculturalists, and veterinarians entirely unprepared to cope with an emergency the character of which was not indeed realized. In the first place the nature of the disease was obscure. The veterinary surgeon who had to deal with the first cases in London was struck with the novelty of some of the morbid appearances and when it became certain that the true Russian cattle plague had invaded the country and that its introduction was due to the landing of cattle from Revel, the procedure which followed was an eminently characteristic exhibition of our insular determination to work out the problem presented to us, independently of everything which had been already done by other nations.

There was at the time available an abundant literature in Germany, the result of the investigations of competent authorities who had had to deal with outbreaks of cattle-plague on repeated occasions and always with perfect success. The system which they had adopted was described in every detail in various books and pamphlets and might have been introduced into this country at once and worked out by us as effectually as it had been abroad. Instead, however, we began as if rinderpest had suddenly appeared on the earth an entirely new thing in animal plagues.

Appointment of a Royal Commission.

A Royal Commission was appointed "fully to investigate the "origin and nature of the said disorder and to ascertain as far as "possible the mode of treatment best adapted for the cure of the "affected animals and the regulations which may with the greatest "advantage be made with a view to prevent the spreading of the "said disorder and to avert any future outbreak of it." The commission commenced its sittings in October 1865, and issued its last report May 1st, 1866. And it may be said of it without any qualification that its work was thoroughly well done; a large number of witnesses were examined from various parts of the world; a sub-commission was appointed including some of the best scientists of the day to inquire into the nature, propagation, progress, and symptoms of the disease, in fact everything relating to pathology, morbid anatomy, microscopical appearances, disinfec-

tion, and treatment was thoroughly investigated with at least one very important result. The public mind became familiarised with the gravity of the situation, and gradually and very reluctantly was reconciled to the idea of what is now universally accepted as a rational mode of dealing with animal plagues,—the stamping out system,—a method which was then denounced as one "worthy only of the untutored savage."

Acts in operation in 1865.

When the cattle-plague was introduced there was no Act in force which gave the executive sufficient powers to deal with the malady. Indeed the only Acts relating to animal diseases existing at the time were the Acts 38 George III. c. 65, in reference to sheep-scab, and 11 and 12 Victoria c. 105, which was passed in consequence of an outbreak of sheep-pox in 1847 and chiefly provided for that disease, but which also gave powers to the Queen in Council to prohibit the importation of sheep, cattle, and other animals, or to admit them after quarantine for the prevention of contagious diseases. In 1848, another Act, 11 and 12 Victoria, c. 107, came into operation and provided for the passing of Orders in Council to prohibit or regulate the movement of animals, including horses; also of meat, hides, fodder, and other things likely to spread contagion. It further made it an offence to expose diseased sheep in markets.

The first cattle-plague Order which was passed by the Privy Council in July 1865 directed dairymen and owners of stock to give notice of any outbreak of cattle plague to the Clerk of the Council. Instead of obeying this order owners of stock deemed it more to their interest to conceal the disease and send their cattle to the market as quickly as possible with the natural consequence of the rapid extension of disease from the Islington market.

Soon after the detection of the cattle-plague in London an extensive correspondence arose with Local Authorities and agriculturalists all over the country, and at the end of July 1865 the Veterinary Department was originated, inspectors were appointed, and certain measures for checking the spreading of the disease were formulated.

Acts passed in 1866 and 1867.

In February of the following year, 1866, the Act 29 Victoria c. 2, was passed, defining local authorities of boroughs, counties, and the metropolis, and providing for the slaughter of diseased cattle and those in contact with them and the payment of compensation by order of the Local Authorities when authorized by the Privy Council to apply the provisions of the Act. All Orders passed previously to this enactment were to be deemed to be authorized by this Act.

Two other Cattle Plague Acts were passed in 1866, the Act 29 Victoria c. 15, giving powers to regulate movement of animals and confirming certain Orders under the previous Act, and the Act 29 & 30 Victoria c. 110, relating to payment of expenses.

In August 1867 the Act 30 & 31 Victoria, c. 125, was passed providing for appointment of at least one inspector at all times by Local Authorities, and for the declaration of cattle-

plague infected places. Powers were given to define parts of ports for the landing of foreign animals, and for the first time *pleuro-pneumonia* was mentioned, and it was made an offence to expose an animal affected with that disease in any market.

Meanwhile cattle-plague had by this time been almost exterminated by an application of the system of slaughter which had been at last enforced after it had been recognised that all the milder measures had failed to check the progress of the malady. It may be added, however, that the stamping out of the disease after more than two years of prevalence was effected in the face of strong opposition in many quarters.

Prevalence of diseases other than cattle-plague.

Up to this period the action taken for the suppression of animal diseases was concentrated upon cattle-plague. It is, however, a matter of history that the country was not, and had not, for a long time been free from other animal plagues, most of them of foreign origin. Foot-and-mouth disease had existed in this kingdom since 1839, pleuro-pneumonia since 1840, anthrax, sheep-scab, swine-fever, and rabies, from an unknown period. Sheep-pox had been introduced on three occasions in 1847, 1861, and 1865, but had not been allowed to effect a permanent location in the country. The other maladies seem to have been accepted by the stockowner as among the disabilities incidental to the pursuit of agriculture, and the idea of getting rid of them by legislative action had not been favourably received on the few occasions when it took a practical shape. Even as late as 1864 a Bill which was introduced by Mr. Bruce and Sir George Grey for the prevention of contagious diseases among cattle met with so much opposition from stockowners that it was finally withdrawn. A committee which sat in 1873, some years after foot-and-mouth disease had been constituted a disease by Act of Parliament, recommended "That the Privy Council should cease to issue Orders for the check of the disease." As no good effect had been produced by the regulations this recommendation was adopted, but the Royal Agricultural Society of England intervened with a protest, and the Orders were re-enacted.

Pleuro-pneumonia prevalent with cattle-plague.

Pleuro-pneumonia was extensively prevalent at the time of the introduction of cattle-plague, but had attracted comparatively little attention, and its contagious nature was not by any means generally admitted; was, indeed, by a considerable number of practical men distinctly denied. Anthrax was universally believed to depend upon common causes, such as excessive feeding, contaminated water, or the consumption of herbage from highly manured and undrained land. The anthrax bacillus had been discovered many years before, and was constantly seen by observers in this country, but it was looked upon merely as one of the organisms associated with putrefactive fermentation. Swine-fever was known to be contagious and infectious, but it was confined to the pig and attracted very little notice. Rabies being a disease of the dog, chiefly concerned the dog owner and the human being bitten by the rabid dog, and the mischief done to herds and flocks by the animal's occasional incursions was accepted

as an accident, the prevention of which was outside the pale of legislation.

Acts passed in 1869.

In 1869 an Act 32 & 33 Vict. c. 70, was passed, and repealed all former Acts relating to diseases of animals. In its provisions the Act of 1869 indicated a very considerable advance on previous enactments in regard both to home and foreign stock. Very extensive powers were given to the Privy Council for the suppression of diseases of animals, including cattle-plague, pleuro-pneumonia, foot-and-mouth disease, sheep-pox, sheep-scab, and glanders, and any diseases which the Privy Council might by Order specify. In respect to foreign importation the principle of the Act was free entrance of animals from abroad, but power was given to the Privy Council to define parts of ports for the landing of animals for slaughter, to limit the number of ports at which animals might be landed, and to subject the animals to quarantine or slaughter, or to prohibit them from landing, as circumstances might render necessary. Under the provisions of this Act, which remained in force for nearly nine years, numerous Orders were passed dealing with pleuro-pneumonia, foot-and-mouth disease, sheep-pox, sheep-scab, glanders, and farcy which was declared by Order of the Privy Council to be a disease for the purposes of the Act in July 1873.

Orders passed under the Act of 1869 were administered by Local Authorities, and it followed almost as a matter of necessity that the results were not altogether satisfactory. An insurmountable difficulty existed in the limitation of the powers of each Local Authority to a district, the consequence being that the modes of administration were as various as the districts were numerous, and the uniformity which is absolutely essential in regulations directed to the suppression of disease was also absolutely unattainable under the circumstances, and the system of administration was distinguished by variations from excessive severity to the extreme of laxity.

Importation, inspection, and transit

Soon after the cessation of cattle-plague, the subject of the importation, inspection, and transit of foreign animials, with reference to the prevention of the introduction of contagious diseases attracted the particular attention of the Privy Council, and an inquiry was instituted by the officers of the Veterinary Department. Up to this time everything relating to the landing of foreign animals had been in charge of the Customs, and it was found that there were over a hundred places on the coast at which foreign animals might be landed. At the principal ports veterinary surgeons were appointed to act as inspectors, but the system of inspection was very imperfect, as the animals were merely driven past the inspector, who stood at a convenient place for the purpose of making his observations. In the event of any disease being discovered, the diseased animals only were detained, the others being allowed to go on to their destination. At the ports where landing of foreign animals was only an occasional event the inspectors were in many cases persons without any professional qualification whatever. It did not appear that there were any

provisions for the detention of animals for purposes of inspection, nor were there any arrangements for slaughtering at the place of landing. Importation, inspection, and transit.

Prohibition of the landing of foreign animals had been in operation before 1799, as an Act of that year, 39 George 3, c. 87, gave the Privy Council power to permit importation, duty free, of cattle, sheep, lambs, swine &c. This power was exercised in an Order of October 16th, 1799, which allowed the landing of foreign animals without payment of duty till September 1800, and by another Order this permission was continued till the expiration of 40 days after the next session of Parliament.

An Act 6 George 4, c. 107, re-enacted the prohibition against the landing of foreign animals, and an Act, 3 and 4 William 4, c. 52, continued the prohibition.

In 1842, a Customs Act, 5 & 6 Vict., c. 47, allowed the importation of foreign animals on payment of a duty, and in 1846 another Customs Act, 9 & 10 Vict., c. 23, removed the duty which has not since been imposed.

In the latter part of 1869 a Departmental Committee was appointed to consider the best means of regulating the transit of animals by land and sea, both in reference to foreign and home stock. The Committee examined a considerable number of witnesses, and reported early in 1870. In May 1870, a Transit Order was passed, the provisions of which were very comprehensive, including the division into pens of places on board ships where animals were carried, regulations for the transit of animals on railways, and for the disinfection of ships and railway trucks. This Order has been amended from time to time, but no radical change has taken place with regard to its main provisions. Committee on transit of animals.

In 1871 the inspection of foreign animals landed in this country, the regulation of the places where they might be landed, and the appointment of inspectors were transferred from the Customs to the Privy Council by the Order of March 31st 1871, and since then none but veterinary surgeons have been appointed as inspectors.

After an inquiry with regard to ports where foreign animals might be landed, it was deemed expedient to lessen the number, with a view to concentrating the trade, so that it might be easily kept under observation. Accordingly, thirty only of the principal ports were retained, the rest were struck out of the list. This number has from time to time been still further reduced. The number has varied at different times, but at the present time there are only seventeen ports in Great Britain where foreign animals may be landed. Limitation of landing places for imported animals.

The changes above referred to added considerably to the work of the Department, the veterinary officers of which were required to visit the various ports and to inspect ships and railway stations for the purpose of ascertaining whether or not the Orders were carried into effect. It was soon found, however, that to insure compliance with the provisions of the Transit Order constant supervision was necessary, and in 1874 a travelling Travelling Inspector appointed.

inspector was appointed to devote his time exclusively to this work, which gradually became more urgent, and in the following year additional travelling inspectors were appointed, and the system became a recognised division of the Veterinary Department.

Outbreak of cattle-plague in 1872.

A second outbreak of cattle-plague in 1872 occurred in Yorkshire; the diseased animals were brought from Hamburg to Hull. The cattle were all slaughtered on board the vessel in which they were brought from Germany, but as the ship was lying close to the shore during the time it is easy to understand that the infection could be carried by the men employed in the slaughter of the animals and the removal of the carcases, or in other ways, and it transpired on inquiry that cattle which were sold in Hull market immediately after the slaughter of the diseased animals carried the disease into several districts. The officers of the Veterinary Department kept up constant supervision over the infected districts, and the Local Authorities adopted the stamping-out system promptly and with vigour, and the disease was extinguished in a few months.

In 1873 a select committee of the House of Commons took evidence on the subject of the working of the Act of 1869, and recommended the adoption of more stringent measures for pleuro-pneumonia and sheep-pox, and the discontinuance of Orders relating to foot-and-mouth disease. In consequence of this recommendation an Order of the Privy Council was passed directing Local Authorities to slaughter all animals affected with pleuro-pneumonia.

Outbreak of cattle-plague in 1878.

Cattle-plague was again introduced into England in 1877, by cargoes of diseased cattle from Hamburg, which were landed in London and in Hull.

Cattle-plague in the metropolis extended rapidly in spite of the efforts of Local Authorities; and the Privy Council decided to deal with the disease from the Central Department. For this purpose an Order was passed, and active measures were at once enforced for the extinction of the disease. In this work the travelling inspectors, whose duties had hitherto been limited to the inspection of railway stations, landing places, and cattle-carrying ships, rendered good service. The disease was extinguished in all its centres after the country had been kept in a state of alarm for several months.

Act passed in 1878

In consequence of this third introduction of cattle-plague, it was deemed advisable to appoint a select committee to enquire into the subject of the importation of foreign animals and the prevention of the introduction of disease. The recommendations of the committee led to the passing of the Act 41 & 42 Vict., c. 74. In this Act which was far more comprehensive in its provisions than any previous enactment, the principle of slaughtering foreign animals at the port of landing was affirmed. Free importation on the one hand and prohibition on the other were provided for under certain circumstances. Quarantine was limited to animals which were to be imported for exhibition

or other special purpose under such regulations as the Privy Council might from time to time by Order impose.

Provisions of the Act of 1878.

Cattle-plague under the Act of 1878 was to be dealt with by the Privy Council. Slaughter by Local Authorities in pleuro-pneumonia with payment of compensation was made compulsory, and powers were given to slaughter cattle which had been exposed to infection. Further provisions were also made with regard to foot-and-mouth disease, chiefly in reference to the declaration of infected places, and very large powers were given to the Privy Council in regard to all diseases; in fact they were generally empowered to act "for the purpose of in any manner "preventing the spreading of disease."

Swine-fever was added to the diseases under the provision of the Act of 1878 by an Order of the Privy Council which came into operation at the end of that year. Anthrax and rabies were next included in the list of contagious diseases by Orders of the Privy Council which came into operation on 1st October 1886.

Orders relating to swine fever, anthrax and rabies.

The Orders which were passed in reference to swine-fever, anthrax and rabies were according to usage administered by Local Authorities, and in regard to foot-and-mouth disease, swine-fever and rabies particularly the provisions were on certain occasions made exceedingly stringent and compulsory, in the hope that the diseases to which they referred might be finally extinguished, slaughter was made compulsory in swine-fever and rabies. Markets and sales of swine were stopped excepting for slaughter, and severe restrictions were imposed on movement. In regard to foot-and-mouth disease very stringent measures were adopted in infected places, persons employed in which were not allowed to leave without being disinfected, and in certain instances slaughter of diseased animals was ordered. In the whole of this work, which was done by Local Authorities, constant supervision on the part of the Central Department and the aid rendered by the travelling inspectors, particularly in dealing with foot-and-mouth disease, contributed in great degree to the success of the measures adopted.

Agricultural department formed.

In 1883 the title of the Veterinary Department was altered to Agricultural Department, and the work of collating the Agricultural Returns was transferred from the Board of Trade to the Agricultural Department.

Acts passed in 1884.

In 1884 an Act, 47 Vict., c. 13, was passed which provided that the Privy Council must prohibit the landing of animals from any country or any part thereof, whenever they were not satisfied that the general circumstances were such as to afford a reasonable security against the introduction of foot-and-mouth disease. In the same year the Act, 47 & 48 Vict., c. 47, gave Local Authorities power to transfer the whole or parts of their district, in certain circumstances, by agreement for the purposes of the Contagious Diseases (Animals) Acts, and the Act 49 & 50 Vict. c. 32, added some important powers to the Act of 1878, which as it now stands permits the definition of animals to all four-footed beasts.

Act passed in 1866.

In 1886 an Order in Council was passed appointing a Committee of Council for Agriculture, to whom all agricultural matters were to be referred.

Foot-and-mouth disease ceased to exist in this country in 1887, under the very strict system of isolation which was imposed. Pleuro-pneumonia, swine-fever, anthrax, sheep-scab, rabies, glanders, and farcy continued to prevail with varying degrees of intensity, their progress being apparently but little affected by the regulations which were enforced for the purpose of checking them.

Board of Agriculture Act, 1889.

In 1889 the Board of Agriculture was established by an Act 52 & 53 Vict. c. 30, and included the Veterinary Department of the Privy Council with other Departments of the State. The question of further measures for the suppression of pleuro-pneumonia was soon forced upon the attention of the Board, and a Bill was introduced, for the purpose of transferring the powers of local authorities in regard to slaughter and compensation to the Board of Agriculture.

Pleuro-pneumonia.

Pleuro-pneumonia.—The Pleuro-pneumonia Act 53 & 54 Vict. c. 14, came into operation on the 1st of September, 1890. For the first time the Department became charged with the direct administration of an Act of Parliament instead of being called upon to supervise its administration by Local Authorities, and the ordinary procedure had therefore to be varied accordingly.

Local Authorities were still left with certain important duties and before any action was taken by the Board the President called a meeting, which was largely attended by Local Authorities of counties and boroughs, and impressed upon the representatives present the necessity of their hearty co-operation and ready assistance, without which, he explained, it would be impossible for the Department to carry on the work imposed upon them by the Pleuro-pneumonia Act. The system which was adopted was briefly as follows:—Notice of the existence of disease was, as before, to be given by the owner to a police-constable of his district, who was required to transmit the information to the Local Authority and also to the Board of Agriculture. The slaughter of the suspected animal, under the direction of the veterinary inspector, was the next step, and in order that the veterinary officers of the Board might be in a position to form an opinion as to the nature of the disease, the lungs of the slaughtered animal were sent to London for their inspection.

Procedure under the Pleuro-pneumonia Act.

When pleuro-pneumonia was found to exist, the infected place was visited by a travelling inspector, who, with the aid of the veterinary surgeon of the district, arranged for the slaughter of the rest of the herd and the disposal of the carcases, after which the travelling inspector was required to devote himself to the important work of tracing the origin of the outbreak and the distribution of cattle which had been removed from the premises

before the outbreak was discovered. The result of this method of enquiry was very often the slaughter of a large number of cattle on premises which were at a long distance from the original outbreak. Pleuro-pneumonia.

Restrictions were imposed on the removal and sale of cattle in large districts and veterinary surgeons were appointed all over the country to visit premises, to inspect fairs, markets, slaughter-houses, and sale yards, with a view to detect cases of disease which might otherwise have remained concealed, and to make weekly reports.

The success which attended the procedure was more complete than had been anticipated. When the work of stamping-out the disease began in September 1890, 46 outbreaks occurred during the month. In the last month of the year the number was reduced to 18. The steady progress towards the attainment of the object in view was disturbed in the summer of 1891 by outbreaks in Southampton and in Cumberland, in both of which movement of infected cattle led to the extensive spreading of the disease. In July and August 1891 the number of outbreaks rose to 35 in the first month and 20 in the next. The mischief was soon repaired, but at the cost of a serious loss of valuable cattle. In September the outbreaks were reduced to 11, and in December there were only 7. The total outbreaks for the year were 193.

During 1892 the improvement in the state of prevalence of pleuro-pneumonia continued, and the total outbreaks for the year were 35. It was, however, necessary to order the slaughter of 188 cattle which were suspected to be the subjects of pleuro-pneumonia. Of this large number only 31 were found to be affected. It may be remarked here, however, in order to account for the slaughter of so many suspected cattle, that the Board s inspectors had been instructed not to allow any cattle to which the slightest suspicion attached, to escape. In dealing with the 35 outbreaks it was found necessary to slaughter 3,313 apparently healthy cattle which had been exposed to infection. On post mortem examination 87 of these were found to be subjects of pleuro-pneumonia. Decrease of outbreaks of pleuro-pneumonia.

During the year 1893 the total outbreaks of pleuro-pneumonia amounted to 9, and 1,180 apparently healthy cattle which had been exposed to infection were slaughtered. In 23 of them pleuro-pneumonia was detected on post-mortem examination. During the year 86 suspected cattle were slaughtered, and found on post-mortem examination to be free from the disease.

It is not possible to assert that pleuro-pneumonia has been entirely extinguished. Even in a small island like Great Britain it is not very difficult for those who desire it to keep the disease concealed, by sending cattle to be slaughtered immediately on any sign of illness appearing, and disposing of the rest of the stock at the most convenient markets. It may therefore be expected that outbreaks of disease may be discovered from time to time, but there need be no apprehension of any extensive spreading of the affection with the present machinery for the purpose of detecting and arresting it. Isolated outbreaks may be expected.

Foot-and-mouth disease.

Foot-and-mouth Disease.—In February 1892, an entirely unexpected out-break of foot-and-mouth disease occurred in the Islington Market. The disease was discovered among animals which had been brought from Denmark, a country which at the time was, as far as could be ascertained, free from the disease. The fact that the county of London was under restrictions on account of pleuro-pneumonia enabled the travelling inspectors to trace all the cattle which werenecessarily removed from the market with a licence to their destination. In spite, however, of all the precautions which were immediately adopted, foot-and-mouth disease was carried to several districts in England and Scotland, and prevailed for some months among sheep in Kent. It was extinguished by the middle of June by strict isolation, and the slaughter of a large number of healthy sheep which were ready for the butcher.

Unexpected outbreak of foot and-mouth disease.

Act passed in 1892.

An Act, 55 & 56 Vict. c. 47, was passed and came into operation 27th June 1892, to enable the Board of Agriculture to apply the moneys provided by Parliament for stamping out pleuro-pneumonia for the purpose of dealing with foot-and-mouth disease.

Summary of past 28 years.

Two cases of foot-and-mouth disease occurred in 1893, one in London in January, and one in Sussex in February, but the infection did not extend beyond the premises in either case.

At the end of the year 1893 the sanitary condition of the stock of the country, at least in regard to those diseases which come under the provisions of the Contagious Diseases (Animals) Acts, was satisfactory. To summarise the work of the past 28 years, it may be stated that three incursions of cattle-plague and four outbreaks of sheep-pox had been effectually suppressed. Pleuro-pneumonia had been so far stamped out as to be looked upon as a thing of the past, and foot-and-mouth had apparently ceased to exist. In fact swine-fever is the only disease remaining, the stamping out of which can be considered a matter of urgency.

Anthrax, sheep-scab, glanders, and rabies, however, still remain to be dealt with, and on each of them something has to be said with reference to the measures which are at present being carried into effect for their suppression and the prospects of their final extinction.

Swine-fever.

Swine-fever.—A Departmental Committee sat in 1893 to inquire into the subject of swine-fever, especially with reference to the necessity of further measures for its extinction. At the conclusion of its labours the Committee recommended that the work of stamping out swine-fever should be undertaken by the Board of Agriculture, and the recommendation was immediately carried into effect. A Bill was introduced into Parliament to confer the necessary powers. This measure, Act 56 & 57 Vict., c. 43, came into force on 1st November 1893, and gave powers to the Board to slaughter and pay compensation in cases in which in the opinion of the Board slaughter was desirable for the purpose of stamping out swine-fever. A general Order was passed which revoked all existing regulations, and enacted new

ones. An explanatory circular was prepared and sent with the Order to all Local Authorities, additional inspectors were appointed by the Board, and active steps were taken to deal with the disease. Swine-fever.

The system adopted was, in its main character, like that which was followed in pleuro-pneumonia. Immediately on receiving notice of the existence of disease a veterinary surgeon of the district was instructed to visit the premises, and if he saw reason to suspect the existence of swine-fever to slaughter one of the diseased animals, make a post-mortem examination and send the morbid parts to London for the inspection of the veterinary officers. As soon as it was decided that swine-fever did exist a travelling inspector was sent to make arrangements for the slaughter of all the pigs. From 1st November to the end of the year the Board was called upon to deal with 536 outbreaks in which 1,147 pigs had died from the disease, and it was necessary to slaughter 6,045 pigs which were either diseased or had been exposed to infection. There were also slaughtered 93 suspected pigs all of which were found on post-mortem examination to be free from the disease.

It was not to be expected that any appreciable progress would be made in the course of two months in checking the extension of the disorder but it is important to state that although owners were allowed to restock their piggeries as soon as the places that had been occupied by diseased or infected animals had been cleansed and disinfected, no recurrence of the affection took place. Swine-fever is, however, extensively distributed, and to insure its final extinction stockowners must be prepared to endure cattle-plague restrictions. The disease is in reality the analogue of cattle-plague, and in no way inferior to it in regard to its virulence and infectivity.

Anthrax.—There is no record of the time or mode of the introduction of this disease into this country, but there is no doubt, however, that it has existed here from a very remote period. Under the general name of murrain it is referred to in some of the oldest works on diseases of animals. Half a century ago it was familiar to stockowners under the name of splenic apoplexy, and it was very generally supposed by practical men to depend on the character of the food or water, and it was said of it that like the nearly related disease—blackleg, it always attacked the most thriving animals of the herd. In some parts of the world, and even in some districts in this country anthrax has a constant existence, and it has been found impossible to render soil safe which has once become thoroughly charged with the infective material. Under ordinary circumstances, however, anthrax appears suddenly among the stock of a farm, attacking cattle and sheep chiefly, sometimes destroying a large number, at others ceasing after one or two animals have died, reappearing after an interval of a few months to several years. The disease does not spread from farm to farm like foot-and-mouth disease, or cattle-plague, but breaks out from time to time on premises widely separated from each other. Anthrax.

Anthrax.

Anthrax is an extremely fatal disorder, cases of recovery being rare; no animal on the farm is exempt from its attack and persons engaged about the cattle, especially if employed in skinning carcases or making post-mortem examinations, incur a serious risk of being fatally inoculated.

Symptoms of anthrax.

Symptoms which indicate anthrax are usually obscure, an infected animal which is carefully watched may show slight signs of illness a few hours before death, and if attention is attracted and an examination of the animal is made it will be found there is a rise of temperature, some swelling of the throat may be observed, especially in horses and pigs, and in some cases the animal may be attacked with a shivering fit. But more commonly the first intimation of the existence of the disease is the sudden death of the animal which was probably left in apparent health an hour before.

Morbid appearances.

The principal morbid changes are found in the spleen, which is generally very much enlarged, dark in colour and soft in texture, spots of effused blood are found under the skin and in some of the internal organs, and the digestive canal often contains a quantity of blood very dark in colour, which remains fluid, showing no tendency to coagulate.

During the last two or three years anthrax has considerably increased in this country, and last year the highest numbers which have yet been reached with regard to infected counties and animals attacked were recorded. In 68 counties in Great Britain 563 outbreaks occurred and 1,300 animals were attacked, almost double the number of any previous year since statistics have been obtained. Under these circumstances it is not remarkable that considerable alarm was created and that urgent demands were made for the adoption of more stringent measures. In regard to the excessive number of reported attacks in 1893, it may be remarked that owing to the scarcity of food during a considerable part of the year animals were forced by hunger to consume indigestible and, not uncommonly, poisonous plants, and it is at least probable that many deaths attributed to anthrax may be thus accounted for. The idea receives support from the fact that a large proportion of the specimens which were sent for examination, purporting to have been taken from animals dead of anthrax, did not furnish any evidence of the existence of that disease.

Increase of anthrax.

Questions have frequently arisen as to the circumstances under which outbreaks of anthrax occur, its mode of spreading, and the means of prevention. The first and second questions can be satisfactorily answered. No doubt whatever exists as to the cause of the disease, it has long been known that a small motionless rodlike body, the bacillus anthracis, when introduced into the blood affects changes which ultimately result in the sudden death of the animal. The bacillus is a microscopic fungus which grows from extremely minute spores. The organism is what is called *aerobic*, lives and grows only in the presence of oxygen, and requires a temperature of not less than 70° Fahr. These conditions are common over a very large part of the earth's surface and the organism has therefore fair opportunities of living and multiplying,

Origin of the disease on a farm.

although it is fortunately not exempt from the action of adverse influences. This explanation of the origin of the disease answers the first question as far as it is capable of answer. It is impossible to say in how many ways the organism may obtain an entrance into the animal's blood, but it is absolutely certain that it must enter the blood before the disease can be introduced and the active spores are so minute that thousands of them might be carried on a single grain of corn. Anthrax exists among animals in all parts of the world and the supply of organisms is therefore without limit and the means of conveyance innumerable. In fact everything of home or foreign origin which may be brought on to a farm is capable of carrying the infection.

Infection conveyed in various ways.

It might be supposed from what has just been stated, that very few animals in the country could escape an attack, but it has to be considered that the bacilli to be injurious must be active, that is to say they must have been supplied with oxygen, and must not have been exposed to a temperature lower than 70° Fahr. It may therefore be expected, that a large percentage of the infecting agents do not survive the conditions under which they are necessarily placed during their transit from one part of the world to another. If this were not the case, anthrax would be likely to rival the black plague in its ravages on the stock of the country.

The readiness with which anthrax may be introduced with foreign products, without any suspicion of its origin being excited, is very perfectly illustrated by the "wool-sorter's disease," which for many years was looked upon as a form of malignant carbuncle the cause of which was by no means well defined. A few years ago an extensive outbreak of the disease among wool-sorters in the midland counties, led to a scientific investigation, which ended in the discovery of the anthrax bacillus, and placed beyond doubt that the disease was true anthrax, the result of inoculation while handling the wool, which had been cut from the carcases of sheep which had died of the disease. It is presumed that most of the contaminated wool came from abroad, but it is obvious that the same accident is equally likely to occur with the wool taken from homebred sheep under similar conditions.

Wool-sorter's disease.

It is interesting to observe that the same outbreak, which led to the discovery of the identity of anthrax and wool-sorter's disease, was associated with an outbreak of anthrax among a number of cattle, which were grazing on a meadow, over which the washings of the wool manufactory were distributed. This is one of the few instances that can be quoted in which an inquiry led to the detection of the precise channels through which infection had been conveyed.

Identity of anthrax with wool-sorter's disease.

In outbreaks which have occurred in different parts of the country attempts have been made to ascertain the precise source of infection by examining all the articles of food, and the water with which the animals were supplied, the soil, the herbage, and indeed all the substances which might have contained the spores but always without result; organisms which resembled the anthrax bacillus were frequently detected, but when tested by the inoculation of small animals they failed to produce the disease.

Anthrax.

Propagation of anthrax.

An answer to the second question as to the mode of the propagation of anthrax may be given with tolerable certainty. A diseased animal has no power to communicate the disease to others excepting by the direct transmission of the organism from its own blood to that of some other animal with which it is associated. This, which is really inoculation, implies the escape of blood from the diseased animal, which may occur from the nostrils or rectum immediately before death or after, and the contact of the contaminated fluid with an abraded surface through which the organism may obtain entrance into the vessels is usually fatal. Numerous experiments have proved that the organism is perfectly harmless so long as the skin and mucous membranes are free from even the minutest wound; in other words infection cannot result from smearing the skin with anthrax blood, or introducing it into the digestive system, so long as the surface in both cases is absolutely intact. The risk of infection is really imminent for the obvious reason that slight abrasions are very commonly present, both in the skin and mucous membranes, and it is further necessary as a caution to state that the danger of infection is much greater from the carcase of an animal just dead of the disease than it is from the living diseased animal.

Prevention of anthrax.

As to the means of prevention, it may be observed that at the commencement of an outbreak of anthrax no one can predict the result; the disease may cease with the death of one animal or it may attack a considerable proportion or even the whole of the herd in which it appears. According to the statistics which have been collected the average loss throughout the country is not more than four animals in each outbreak. This, however, does not console the stockowner who has to see the whole of a valuable herd swept off in a few days, an event, however, which is fortunately quite exceptional.

Formerly, before anthrax was a subject of legislation, apparently good results were obtained by removing all the healthy animals immediately from the place where the disease arose and giving large doses of some antiseptic agent in the drinking water. Hyposulphite of soda being soluble, tasteless, and harmless is a convenient agent for the purpose, and it was the practice to dissolve so much of it in the water supplied to the animals that each one might get five or six ounces a day, and while it is true that as the uncertainty of the cessation or spreading of the disease renders any experiment of this kind unsatisfactory, the application of the remedy is easy, and the movement of the healthy animals to a convenient place for isolation under proper precautions is not attended with any great risk, so that the treatment suggested is at least worth a trial.

Slaughter in anthrax.

Under present provisions Local Authorities have power to slaughter in anthrax, but it should be understood that slaughter of animals in contact with the diseased ones as a general system of treatment is wasteful and useless. Cases may occur in which it may be advantageous to at once check the course of the disease by slaughtering a few animals which may have been exposed to infection, and also when there are no means of isolation. Further

it would be a wise precaution to at once consign to the butcher any animals in a fit condition for the market, but this should only be done under competent professional advice and supervision, and it must not be forgotten that the application of the stamping out system to ordinary outbreaks of anthrax was not contemplated when the Order was passed. Anthrax.

Disposal of Carcases.—Considerable discussion has taken place during the last year on the subject of the disposal of carcases, and it has been repeatedly asserted that burial is the most certain method of spreading the disease by contaminating the soil in which the animal is buried, and it has been urged that the only rational method is burning the carcase, a process which would effectually destroy the virus of the disease. The answer to both these propositions is easy. The bacillus of anthrax rapidly disappears from the blood of an uncut carcase. The supply of oxygen on which the life of the organism depends is provided in the air which the animal breathes, the supply ceases with the last breath. As the temperature of the body becomes lowered, and the natural enemies of the disease-producing organ, the putrefactive bacteria, become more abundant as the process of decomposition goes on, the destruction of the bacillus proceeds rapidly. Experiments which have been recently made prove that such susceptible animals as rabbits inoculated with the blood taken from the spleen which has been left for a few days in a carcase not previously cut have been in no way injured by the operation. This experiment has been repeated so often and with such uniform results that there can be no question as to the conclusion that burial of a carcase as near as possible to the place where it has been found lying is the safest method of dealing with it. Contamination of the soil undoubtedly happens very frequently, not, however, from the buried carcase, but from the blood which may have escaped from it before burial, during its removal to a convenient spot for the purpose or during the post-mortem examination. In order to avert the consequences arising from the contamination every part of the surface of the ground on which blood or excretions from the animal have been spilt should be well covered with quicklime, or still better taken off to the depth of some six inches and burnt.

Disposal of carcases. Disappearance of anthrax organism after death.

Disposal of carcases by burial to be effectual must, as has been suggested, be done without any post-mortem examination, which is not really necessary as the detection of the bacillus is quite easy in the blood of the ear, which may be cut off for the purpose. In the case of the small animal, the foot will answer the purpose equally well, and it is obvious that either or both of these parts may be more readily packed for transmission to a distance than the spleen, and for the purpose of examination either of the two will often afford more satisfactory results than the spleen, on account of the less tendency to decomposition.

Objections to post-mortem examination.

On the other hand against burning a carcase, there is the fatal objection, that it involves cutting to the great danger to the operators and the certainty of contaminating their clothes, and the ground on which the operation is conducted. In addition

Anthrax.

there is to be considered the cost of providing sufficient fuel, and making the necessary arrangements, with the certainty of failure, in a good many instances, from insufficiency of fuel or imperfection in the machinery. It may be remarked that in the times of cattle-plague the expedient of burning the carcases of cattle was tried, and it was found that a very large quantity of timber was necessary, and that altogether the procedure was not so simple as it was then and is now, by some considered to be.

The other methods of destruction provided for in the Anthrax Order are "by exposure to a high temperature or by chemical agents." In localities where there happens to be a large destructor or a manufactory of chemical manures, it may be possible to dispose of carcases by chemical agents, or by exposing them to the action of high pressure steam. But in ordinary circumstances, these means are not available, and even when they are, the objections which have been urged against the removal and cutting up of carcases still remain.

Sheep-scab.

Sheep-scab.—In previous reports it has been pointed out that sheep-scab occupies an anomalous position in the list of contagious diseases, and its claim to its position in the existing Acts from 1866 to the present time is mainly due to the fact, that when these comparatively recent Acts were passed, it was already the subject of special legislation in an Act 38 George 3, 1798.

Sheep-scab is not a contagious disease in the ordinary acceptation of the term. It is not associated with any micro-organism or particular virus, and is only communicable from one animal to another by the migration of the scab insect on which the disease depends; it is not therefore a malady which requires the adoption of the stamping out system for its suppression, as it can be easily checked by the use of well-known remedies and effectual isolation of diseased animals, means which flock masters could readily apply. The disease has been the subject of legislation for nearly a century, and yet in the present report by the assistant inspector, in the appendix, it is stated that "during the past year sheep-scab "was more widely spread in Great Britain than in any of the "five preceding years." In fact it is doubtful if any good has been done by the regulations of Local Authorities in various parts of the country. The fact of the continued prevalence of a disease which could be so easily checked is in itself evidence of the indifference of flockmasters to its ravages.

Glanders.

Glanders (including Farcy).—This disease was less prevalent during 1893 than during the previous year, but according to the reports it existed in 40 counties in Great Britain, whereas in 1892 it was only reported from 34 counties. Under the Glanders Order of 1892 Local Authorities have power to slaughter and pay compensation, and there is no reason to doubt that the disease could be stamped out by a sufficiently rigorous application of these powers, especially as diagnosis even in the most obscure cases is now rendered easy by the employment of mallein, a small

quantity of which injected under the skin causes a rise of temperature in a glandered horse when there are no indications whatever of any disease.

Rabies.—During 1893 the number of cases of rabies increased, especially in Scotland, which country had for a long time before 1892 been entirely free from the malady. The total number of cases reported during the year was 94. One case only occurred in a horse, the rest of the animals attacked were dogs. It is noticed in the report of the assistant inspector that of the 93 dogs attacked in Great Britain 66 were killed and 27 died. This must be due to the neglect of owners to give notice of the existence of the disease, as Local Authorities are generally prompt in slaughtering rabid dogs. Rabies.

Proposals have been made, from time to time, for the effectual dealing with rabies, but the necessary restriction involves so much interference with the movement of dogs and are so opposed to the convenience of those who keep them that excepting in times of the extensive spreading of the disease they have not been seriously entertained.

Importation of Foreign Animals.—The number of animals imported into Great Britain from foreign countries in the year 1893 was less than that of the preceding year by 188,648 head of stock, of which number there was a decrease of 166,284 cattle, 18,653 sheep, and 3,711 swine. Importation.

With the exception of Norway (Finmark excluded), which was re-opened to the trade in animals on the 2nd of October 1893, all the countries which were closed in 1892 remained closed in 1893.

The total number of animals imported into Great Britain in 1893 from all countries out of the United Kingdom was 402,776 against 591,424 in 1892.

From European countries exclusive of the Channel Islands, we received 41 cattle, and 36,056 sheep, against 6,377 cattle, 48,237 sheep, and 44 swine in 1892.

From Canada we received 82,935 cattle, 3,590 sheep, and 137 swine, against 98,228 cattle, 15,747 sheep and 1,235 swine in 1892.

From the United States of America we received 248,766 cattle, against 396,602 cattle, 2,831 sheep, and 2,569 swine in 1892.

From the Argentine Republic we received 6,884 cattle and 22,372 sheep, against 3,500 cattle and 14,550 sheep in 1892.

From Chile we received 694 sheep. There was no importation from there in 1892.

From the Channel Islands we received 1,301 cattle against 1,504 in 1892.

From Ireland we received 688,669 cattle, 1,107,960 sheep, and 456,571 swine, against 624,457 cattle, and 1,080,202 sheep and 500,951 swine in 1892.

The total number of animals imported from all sources in 1893 was 2,655,976 against, 2,797,034, in 1892.

Diseases in animals landed from abroad.

Diseases detected among Animals landed in this Country from Abroad.—According to the reports of the Inspectors of the Board of Agriculture stationed at the ports where foreign animals may be landed, the number of cases of disease detected during the year 1893 was larger than in 1892. This chiefly resulted from a preponderance of cases of sheep-scab. There were 3 more cases of pleuro-pneumonia brought from the United States of America in 1893 than in 1892, while Canada sent us 4 cases of the same disease.

The diseased cargoes came from the following countries:—

Countries from which disease was imported in 1893.

United States, 14 cargoes consisting of 7,987 cattle were landed at Liverpool and Deptford from Baltimore, Boston, and New York in which 36 animals were affected with pleuro-pneumonia.

Canada, 3 cargoes consisting of 1,676 cattle were landed at Liverpool and Deptford from Montreal in which 4 animals were affected with pleuro-pneumonia; and 1 cargo consisting of 338 cattle and 269 sheep was landed at Liverpool from Montreal in which 1 sheep was found affected with scab.

Chile, 1 cargo consisting of 694 sheep was landed at Liverpool from Punta Arenas, and 120 of the sheep were found affected with scab.

Argentine Republic, 25 cargoes consisting of 1,940 cattle and 12,062 sheep were landed at Liverpool and Deptford from Buenos Ayres and Rosario containing 1,653 sheep affected with scab.

Losses among animals during transit by sea.

Losses among Animals during Transit by Sea.—The following are the statistics of the losses of animals during their voyage across the Atlantic in the year 1893:—

From Canada there were imported into the ports of Bristol, Glasgow, Liverpool, London, and Newcastle 235 cargoes consisting of 82,935 cattle and 3,590 sheep and 137 swine. From 82 of these cargoes 344 cattle and 39 sheep and 1 pig were lost at sea, 30 cattle and 3 sheep were landed dead, and 22 cattle and 6 sheep were slaughtered as injured.

From the United States of America there were imported into the ports of Bristol, Glasgow, Hull, Liverpool, and London 644 cargoes consisting of 248,766 cattle. From 248 of these cargoes 555 cattle were lost at sea, 87 were landed dead, and 41 were slaughtered as injured.

From the Argentine Republic there were imported into the ports of Liverpool, and London 81 cargoes consisting of 6,884 cattle and 22,372 sheep. From 56 of these cargoes 67 cattle and 273 sheep were lost at sea, and 7 cattle and 7 sheep were landed dead, and 2 cattle and 13 sheep were slaughered as injured.

From Chili there was imported into the port of Liverpool one cargo consisting of 694 sheep. From this cargo 110 sheep were lost at sea and 4 were landed dead.

Thus, taking the 387 cargoes from these countries together, 966 cattle and 422 sheep and one pig appear to have been lost at sea, 124 cattle and 14 sheep to have been landed dead, and 65 cattle and 19 sheep to have been so much injured as to necessitate their being slaughtered at the port of landing. Losses among animals during transit by sea.

In the Appendix to this Report there are the usual reports by the Chief Inspector on diseases among animals in foreign countries; by the Assistant Inspector on disease among home stock; by the Chief Travelling Inspector on the measures supervised by the Travelling Inspectors in dealing with outbreaks of disease. There is also a digest of the legislation during the year, and the statistical tables.

I have the honour to be,
Sir,
Your most obedient servant,
G. T. Brown.

Board of Agriculture,
March 1894.

REPORT on the DISEASES which have existed among ANIMALS in FOREIGN COUNTRIES, and in FOREIGN ANIMALS landed in GREAT BRITAIN, during 1893, by the CHIEF INSPECTOR, VETERINARY DEPARTMENT, BOARD OF AGRICULTURE. Report by the Chief Inspector.

There has been a marked decrease in the prevalence of foot-and-mouth disease on the continent of Europe during the year 1893. The western countries, *i.e.*, The Netherlands, Denmark, Norway and Sweden, and Belgium, have by constant and energetic measures remained comparatively free, and although the infection has at times been re-introduced, the disease, as a rule, has been confined to the centres where it was first detected by persisting in a rigid system of isolation and disinfection.

Some of the outbreaks in The Netherlands have been of a most mysterious origin; they have occurred at places many miles from the frontier, and at times when the country was free from the disease.

This failure to trace the source from which the infection was conveyed gave rise to the idea in some minds that after all foot-and-mouth disease might under some circumstances which could not be explained have a spontaneous origin, but the experience of The Netherlands is similar to that of this country. The medium by which the infection was brought into this country in the beginning of 1892 was never discovered, and the origin of many of the centres which were detected towards the end of that outbreak was never traced.

In Germany foot-and-mouth disease still remained extremely prevalent; markets were closed in many districts, but with very little results, and at the close of the year the disease was widely distributed throughout the Empire. The disease continued in Switzerland, and in France it was extremely prevalent.

During the whole year the prohibition to land animals in this country from the continent of Europe was maintained, the only exception being in favour of Norway, except the province of Finmark, no cases of foot-and-mouth disease having been reported from any part of Norway, and their regulations as regards importation being made upon a basis satisfactory to the Board.

No appreciable improvement has occurred in the sanitary condition of animals on the continent as regards the other infectious or contagious diseases.

Cattle-plague still exists in Russia and pleuro-pneumonia among cattle in nearly every country; also glanders or farcy in horses. Rabies is extensively prevalent, particularly in France, but the most widely spread of all the contagious diseases are tuberculosis and anthrax. At present little or nothing is done in the way of legislation for either of these affections, notwithstanding the fact that they are both communicable to man.

America, United States.

America, U.S.

The Consular reports which have been received during 1893 from the United States of America have been few, and they indicate a general absence of those contagious diseases which have prevailed from time to time on the continent of Europe.

Report by the Chief Inspector.

America, U.S.

Anthrax seems to have been reported in certain districts, and measures have been taken to prevent the extension of the disease by stopping the movement of stock out of infected districts.

Texan fever, or southern cattle-fever as it is sometimes called, was reported to exist in the neighbourhood of Charlestown, Tennessee, and North Carolina. Scab existed in sheep, glanders or farcy in horses, and rabies in dogs. Tuberculosis appears to be as widely spread among the herds in the United States of America as in this country, and actinomycosis has a constant existence in some of the western States. A number of cattle are said to have been seized and slaughtered with this disease in the stock yards at Chicago and East St. Louis.

The Annual Report issued for the years 1891–92 by the Bureau of Animal Industry contains a vast amount of matter of great interest to all stock owners, as well as the veterinary profession.

The Bureau of Animal Industry in the United States of America is a department provided with a large and efficient staff for the purpose of original research, and investigations are constantly being carried out by this branch with a view to establish the nature, cause, and prevention of the various diseases to which the stock of the country are liable.

Experiments into the diagnostic properties of mallein were carried out with such satisfactory results that as a means of diagnosis its value is held to have been conclusively and satisfactorily demonstrated, and that, if generally applied under proper legal restrictions, it would aid in stamping out the disease. A similarly sanguine view is held with regard to the use of tuberculin.

The report refers to the proclamation issued by the Secretary to the Department of Agriculture, dated 26th of September 1892, in which the statement appears that the whole of the United States of America was declared free from the disease known as pleuro-pneumonia.

It appears that a sum of 1,500,000 dollars was expended during five years in stamping out this disease, that 6,499 cattle were slaughtered affected, and 15,514 which had been exposed to infection.

The importation from the United States has fallen off during the year 1893, the numbers of cattle being 248,766, compared with 396,602 cattle, 2,831 sheep, and 2,569 swine, in 1892. Among these, 36 cases of pleuro-pneumonia were detected by the inspectors of the ports after slaughter. It is not improbable that other cases may have existed, as the arrangements for inspection at the ports are not of such a nature as would permit of the careful examination of the lungs of all cattle slaughtered there.

Argentine Republic.

Argentine Republic.

Sheep-scab still continues to prevail in this Republic, and it may be said that during 1893 there was no improvement in the health of the sheep imported into Great Britain therefrom. Cargoes came badly affected with the disease. Isolated cases of glanders and farcy occurred in the country, and swine-fever and anthrax were both reported to exist there. Rabies occurred frequently.

In 1893, there were imported 6,884 cattle and 22,372 sheep. All these animals are slaughtered at the port of landing.

Austria-Hungary.

Report by the Chief Inspector.

Austria-Hungary.

Pleuro-pneumonia continued to exist somewhat widely in Austria during 1893. There were 96 places infected with the disease in January. It remained at this high figure, more or less, until May, when it dwindled down to 15 places. The disease got less and less until November, when only two places were said to be infected therewith. In Hungary the disease was still more prevalent. In December there were 190 cases.

Foot-and-mouth disease also prevailed both in Austria and Hungary. The disease was so rife that, in the month of August, 108 districts and 958 places appear to have been infected in the former, and 92 districts and 1,916 places in the latter country.

Anthrax, glanders, sheep-pox, sheep-scab, swine-fever, and rabies occurred during the year.

In Bosnia and Herzegovina, sheep-pox, glanders, and farcy, sheep-scab, swine-fever, anthrax, and rabies existed at various periods of 1893.

Belgium.

Belgium.

The tabulated statement on page 29, compiled from official bulletins received from the Belgian Government, will show the amount of contagious disease among animals in Belgium during the year 1893. From this it would appear that there were 210 fewer cases of pleuro-pneumonia in 1893 than in 1892.

In Belgium protective inoculation against the disease has been practised since 1852, but it will be seen from the following table that it has not influenced the progress of pleuro-pneumonia in that country to any extent during the last twelve years.

Pleuro-Pneumonia.

1882	1,293	affected.
1883	851	„
1884	544	„
1885	795	„
1886	835	„
1887	830	„
1888	714	„
1889	799	„
1890	963	„
1891	1,193	„
1892	940	„
1893	730	„

Report by the Chief Inspector.

Belgium.

Foot-and-mouth disease also exhibited a very marked improvement. There were 35,117 fewer cases during this year than in 1892. The largest number of the cases which were reported in 1893 occurred in the months of January, February, March, and December. The disease existed at various preiods of the year in the provinces of Antwerp, Brabant, East Flanders, West Flanders, Hainaut, Liège, Limbourg, Luxembourg, and Namur, and, among those, principally in Brabant, West Flanders, Hainaut, Liêge, and Luxembourg.

Anthrax shows but slight difference from its condition in 1892, but is apparently on the increase; rabies diminished by one case; glanders and farcy by 38 cases; but rouget increased by 98.

With regard to legislation, cattle from the Netherlands could be introduced at certain Customs' offices in Belgium during fixed days and hours and upon observing various stringent and protective regulations. Sheep were prohibited from the same country, excepting where they were transmitted by direct transit by railway and without unlading.

Report by the Chief Inspector.

Canada.

Canada.

The Report issued by the Canadian Minister of Agriculture for the year 1893, describes tuberculosis as increasing and demanding the serious attention of the Government, and states that sheep-scab was prevalent in Western Ontario and in Manitoba. Hog-cholera or swine-fever was introduced on three occasions by swine coming from America, but the disease was detected during the period of quarantine and extirpated by slaughter of all the animals. Glanders was occasionally reported, and a serious outbreak occurred among a herd of over a thousand horses in a ranch near Maple Creek, 12 cases were detected, the diseased were shot and the rest quarantined as far as practicable.

From the Report it appears that 1,349 cattle, 35,718 sheep, and 177 swine were imported during the year 1893, the greater number of which came through the quarantine stations from the United States after a detention of 90 days quarantine for cattle and 15 days for sheep.

During the year 82,935 cattle, 3,590 sheep, and 137 swine, were imported into this country from Canada. All the cattle were slaughtered at the port of landing. During the early part of the season a special examination was for a short period made of the lungs of these animals, which resulted in the detection of four cases of pleuro-pneumonia.

Denmark.

Denmark.

Foot-and-mouth disease continued in Denmark from time to time during 1893. In January 105 herds were affected, the principal districts being Holbek, Sorö, Aarhuus, and Priesto. The disease, however, somewhat declined in February. The number of cases rose again in the following month, when the disease to all appearances secured a firm hold on the country. There were then 45 herds affected, namely, 6 in and around Copenhagen, 3 in Holbek, 31 in Sorö, 1 at Priesto, 1 at Maribo, 2 at Odense, and 1 at Svendborg. In May it decreased to 22 herds affected, gradually diminishing to 1 herd in July. In September, the disease seems to have died out. A fresh outbreak, nevertheless, occurred at the end of November at Sorö in Zealand and Dallund in Funen. In both instances the disease only attacked a single animal, precautionary measures being at once adopted. Unhappily it re-appeared subsequently in the parish of Aaby, when nine animals in all were affected. The last animal attacked was slaughtered on the 8th of December, when no further case was reported.

The other diseases which existed in 1893 were malignant catarrhal fever, anthrax, and swine-fever.

Denmark, with the exception of Iceland, remained closed to the importation of animals to Great Britain during the whole year.

From Iceland 29,249 sheep were imported.

France.

France.

On page 32 will be found a tabulated statement showing the various diseases of animals of a contagious and infectious nature existing in France during 1893. From this statement, which has been compiled from official reports, it would seem that there have been 308 fewer cases of pleuro-pneumonia than in 1892.

The following Table gives particulars of this disease in France since 1881. It should be observed that the slaughter of cattle affected with pleuro-pneumonia, and the inoculation of those which had been in contact, have been in force since the passing of the law dated the 21st July 1882.

Year.	Slaughtered as Diseased.	Inoculated.
1881	458	1,042
1882	3,571	13,669
1883	2,890	10,444
1884	2,052	7,384
1885	2,262	9,574
1886	1,853	8,374
1887	1,666	7,512
1888	1,145	5,215
1889	1,289	5,190
1890	2,254	9,848
1891	2,136	8,696
1892	1,292	4,973
1893	797	2,279

Foot-and-mouth disease decreased from 13,320 outbreaks in 1892 to 7,057 in 1893—a difference of 6,263. It was prevalent throughout the Republic, more particularly in the early months of the year. In January, February, and March there were 3,304 outbreaks. The Communes chiefly infected were situated in the Departments of Calvados, Pas de-Calais, Seine Inférieure, Aisne, Seine-et-Oise, Seine-et-Marne, Ardennes, Marne, Meuse, Vosges, Loiret, Eure-et-Loir, Nord, Somme, Maine-et-Loire, and Vienne. September was the month in which there were the fewest outbreaks, namely, 189. In the Department of Basses Pyrénées the disease was at that time most prevalent.

Algeria suffered again from the malady. The Departments of Alger, Constantine, and Oran were infected with it during certain months of the year.

There were more cases of anthrax but fewer of symptomatic anthrax in 1893 than in 1892.

Rabies declined by 126 outbreaks. Other contagious or infectious diseases which existed were sheep-pox, sheep-scab, and glanders and farcy.

A Customs circular dated the 25th October 1893, raised the prohibition on the introduction of animals from The Netherlands and Belgium into France. It then provided that animals should always be accompanied with a certificate given by the local authority of the place whence they came testifying that they had been in that locality for at least three months, and that during that period there was no outbreak of a contagious disease.

STATEMENT of the AMOUNT of CONTAGIOUS DISEASE among ANIMALS in FRANCE during the Year 1893.

Disease.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	TOTAL.

Germany.

Report by the Chief Inspector. — Germany.

The reports received from Germany during 1893 as regards the prevalence of foot-and-mouth disease in that country were extremely discouraging, the disease was as widely spread as in the previous year. Outbreaks were reported in Schleswig-Holstein, Pomerania, West Prussia, Brandenburg, Hanover, Bavaria, Würtemberg, Mecklenberg-Schwerin, Baden, and Elsass-Lothringen; in this latter province during the month of May there were 82 outbreaks, in which 399 cattle and 12 swine were attacked. In Brandenburg the disease continued until the close of the year, and existed in 19 parishes in the month of December. During this month it appeared in the central slaughter market in Hamburg among some pigs which had originally come from Denmark, but had already been in Germany sufficient length of time to become infected in that country. Although towards the close of the year, there was a decline in certain districts, there were still a vast number of centres throughout the Empire.

The following Table will give some idea of the enormous number of animals attacked with foot-and-mouth disease during the years 1888–92. From a document received during 1893 it appeared that in 1892 no less than 1,504,199 cattle were returned affected in addition to the other kinds of animals enumerated in these columns below :—

Year.	Swine.	Sheep and Goats.
1888	22,284	19,786
1889	54,404	268,399
1890	153,808	230,858
1891	182,208	244,282
1892	438,252	2,210,968
Total	850,956	2,974,293

A circular was issued by the Prussian Minister of Agriculture on the 16th November 1893, recommending certain measures to be carried out by which foot-and-mouth disease might be suppressed, and fresh outbreaks prevented.

Other diseases existing in Germany were sheep-scab, glanders and farcy, anthrax, rabies, and pleuro-pneumonia.

Italy.

Italy.

Foot-and-mouth disease prevailed in this country during the whole year. In May there were 594 cases. In December it was shown to exist in 20 districts. The principal regions of the kingdom inspected were Lombardia, Veneto, Liguria, Emilia, Lazio, Meridionale Mediterranea, Piemonte, Toscana, Marche ed Umbria, Meridionale Adriatica, Sicilia, and Sardegna.

The other diseases which were reported in Italy were anthrax, glanders and farcy, sheep-scab, and swine-fever.

Report by the Chief Inspector.

Morocco.

Morocco.

Foot-and-mouth disease occurred in Morocco in 1893. In February it caused great mortality among sheep in the districts of Abda and Rahamna, near Saffi, and in the province of Donkala, near Mazagan. In June and July it still continued near Saffi, and, in fact, was greatly increasing.

The Netherlands.

The Netherlands.

Foot-and-mouth disease was reported to exist in the neighbourhood of Amsterdam during February 1893. Though prevalent, it was not severe. Police were constantly watching the stables, which were assiduously disinfected. At the end of March it was existing in North Holland and Overyssel. Three stables were infected in the former and six cases occurred in the latter province. The disease was reported to be diminishing in May, but there were still a few isolated cases to be met with in various districts. In July, however, it was said to be on the increase. In August no case of the disease was reported. A fresh outbreak, however, was found to have occurred on a farm near Delft, where there were 43 cattle—this was about the end of September. The cattle recovered and, as far as was known, the disease did not extend from this centre. At the beginning of November the Government of The Netherlands announced that the disease had entirely disappeared, and that the country had been declared free. This state of things remained down to the end of the year.

Glanders and farcy, swine-fever, and anthrax were the other diseases which existed.

Norway.

Norway.

Norway continued to be exempt from foot-and-mouth disease during this year.

Anthrax, swine-fever, sheep-scab, and horse-influenza, however, existed in the country down to December. The second disease mentioned (swine-fever) was exceedingly prevalent, there being as many as 162 outbreaks and 133 premises infected during the fourth quarter of the year.

Persia.

Persia.

From information received it would appear that this country was affected with cattle-plague during 1893. It occurred all round Mohammerah, but it was decreasing towards the beginning of December. In fact, about the latter part of that month it was reported to have disappeared.

Portugal.

Report by the Chief Inspector.

Foot-and-mouth disease continued to exist in this country during the year 1893. It was reported to be increasing in the district of Evora, but diminishing in that of Lisbon in February. It however still prevailed in the latter district in April, and continued there until the end of the year. In October the district of Oporto was reported by the Portuguese Government to be infected with the disease. In the following month anthrax was declared to have broken out in the Lisbon district, and still existed in December.

Portugal.

Roumania.

Foot-and-mouth disease was reported to exist in this country in January. It occurred among sheep, and was of a slight character. It increased towards the month of May, when 1,620 cases occurred in 10 districts, and it continued with but little fluctuation down to December. In that month 8,698 cases were recorded. Sheep-pox, sheep-scab, glanders and farcy, and rabies also occurred during the the year 1893.

Roumania.

Russia.

As usual cattle-plague and Siberian pest (anthrax) existed extensively throughout the Empire. In European Russia the former manifested itself in Astrakhan, Voronej, Don Cossack, Ekaterinoslav, Taurida, Kharhoff, Kuban, Stavropol, Saratoff, Tersk, Orel, and Tamboff, and in Asiatic Russia in the provinces of Tiflis, Eneseiste, Irkutsk, Erivan, Elizabetopol, Baku, and Kutais, and in the regions of Akmola, Daghestan, Turgai, Samirstchink, and Kars.

Russia.

In Polish Russia, pleuro-pneumonia occurred chiefly in the month of September, when 90 cases were reported. Foot-and-mouth disease also, occurred in October; 1,480 cases were recorded. The other diseases which showed themselves were sheep-pox, glanders and farcy, anthrax, swine-fever, and rabies.

Foot-and-mouth disease, glanders, anthrax, and rabies, were reported from the consular districts of Riga and Odessa.

Servia.

From information received, foot and-mouth disease does not appear to have been reported to exist in this country until August, when 82 cases were said to have occurred in the department of Podzinski. It subsequently appeared in the department of Podrina. In September two fresh cases were reported at Valjevo. The disease then seems to have been suppressed until the middle of December, when four cases were notified as existing near Belgrade; nine fresh cases also occurred in the village of Palaska between the 10th and 16th of the said month. The district was declared infected, and strict precautions were taken to isolate the cases.

Servia.

Report by the Chief Inspector.

Other diseases existing in Servia were sheep-pox, glanders and farcy, anthrax, and rabies.

Spain.

Spain.

This country continued to be infected with foot-and-mouth disease during 1893. It existed in the district of Barcelona at the beginning of the year, and a few cases occurred in the district of Vigo in the month of February, becoming extinct in June. About the beginning of August the disease manifested itself in the district of Cordova. It was still extant in the district of Barcelona in November, 1 per cent. of the cattle introduced from the northern provinces of Spain being more or less tainted therewith. Many of the cattle were supposed to have acquired the disease during their transport in railway wagons to Barcelona. The central authorities in Madrid were asked to oblige the officials of the Northern Railway Company to disinfect the wagons employed for conveying cattle to Catalonia, and it appears that this was done with beneficial results. In November a few cases of a mild character were observed in the neighbourhood of Vigo. In December the disease was reported to have greatly decreased in the district of Barcelona.

Sheep-pox and anthrax were reported in September.

With regard to legislation, a Royal Order was issued in April notifying that in consequence of foot-and-mouth disease being considered to be extinct in Morocco, cattle from that country might be admitted into Spain.

Sweden.

Sweden.

Foot-and-mouth disease was reported to exist in Sweden in January. There were 19 parishes infected in the province of Scania, and three in the county of Halland. In February, nine parishes were declared to be infected in the before-mentioned province. In March information was received that Sweden was free from the disease. In the following month however, it again broke out in the province of Scania, eight parishes being again declared to be infected. In May there were still eight parishes infected in Scania, but in July the province seems to have become free.

Anthrax existed in the country at certain periods of the year.

With regard to legislation a Royal Decree was issued on the 17th March which, in consequence of the prevalence of foot-and-mouth disease in Denmark, prohibited the importation from that country into Sweden not only of ruminating animals and pigs but also of the manure, of cattle farm implements which had been issued, hay and straw, wool, horns, hoofs, and undressed hides or skins of ruminating animals or pigs. The latter articles, however, were allowed to be imported through Denmark on condition that they had not been produced in that kingdom, and if they complied with certain minute regulations laid down in the Decree.

Switzerland.

Report by the Chief Inspector.

Switzerland.

Switzerland appears to have been exempt from pleuro-pneumonia in 1893. Foot-and-mouth disease, however, increased. In 1892, 15,941 animals died or were slaughtered as infected or in contact, while in 1893, 24,374 animals formed the number recorded. This shows a difference of 8,433 animals. The disease was most prevalent in the cantons of Bâle-Ville, Appenzell Rh-ext, St-Gall, Vaud, and Grisons. It seems to have been at its height in the months of June, July, and August. Symptomatic-anthrax and anthrax both increased in 1893. Glanders and farcy increased; rabies diminished; swine-fever remained about the same, namely, 1,271 cases, while sheep-scab increased by 678 cases.

Tunis.

Tunis.

Foot-and-mouth disease existed throughout the Regency of Tunis during March, and in May it increased considerably. Towards the end of July it rapidly decreased, and in the following month it was reported to be only in one locality. Sheep-scab, swine-fever, anthrax, and rabies also occurred.

Turkey, Bulgaria, and Egypt.

Turkey, Bulgaria, and Egypt.

Turkey remained in much the same condition as regards animals' diseases as in 1892. Cattle-plague was reported from various quarters of the dominions throughout 1893. The districts infected were Constantinople, Damascus, Trebizond, Erzeroum, Beyrout, Smyrna, and Syria. Pleuro-pneumonia also existed in the district of Constantinople.

Foot-and-mouth disease occurred in the districts of Constantinople, Beyrout, and Erzeroum; sheep-pox in those of Salonica and Canea in Crete.

In Bulgaria, foot-and-mouth disease, sheep-pox, sheep-scab, anthrax, and rabies existed.

From Egypt, we received information of outbreaks of anthrax, and glanders and farcy in the districts of Alexandria and Cairo.

With regard to legislation, sheep from Russia were to be slaughtered in quarantine at the port of arrival.

Report by the Chief Inspector.

Diseases among Foreign Animals landed in Great Britain during 1893.

Pleuro-Pneumonia was detected in 36 cattle landed at Liverpool and Deptford from Baltimore, Boston, and New York, in the United States of America, and in 4 cattle landed at Liverpool and Deptford from Montreal, in Canada.

Sheep-Scab was detected in 1,653 sheep landed at Liverpool and Deptford from Buenos Ayres and Rosario, in the Argentine Republic; in 1 sheep landed at Liverpool from Montreal, in Canada; and in 120 sheep landed at Liverpool from Punta Arenas, in Chile.

TABLE of the NUMBER of ANIMALS subjected to QUARANTINE during the Year 1893, showing the Countries whence Exported and the Purpose for which the Animals were quarantined.

Board of Agriculture, 1894.

ALEXR. C. COPE,
Chief Inspector.

REPORT on the DISEASES which have existed among ANIMALS in GREAT BRITAIN in 1893, by the ASSISTANT INSPECTOR, VETERINARY DEPARTMENT, BOARD OF AGRICULTURE.

Report by the Assistant Inspector.

The following diseases are legislated for under the powers given by the Contagious Diseases (Animals) Acts now in force: cattle-plague, pleuro-pneumonia, foot-and-mouth disease, sheep-pox, sheep-scab, glanders, farcy, swine-fever, anthrax, rabies, and sarcoptic-mange.

Diseases legislated for.

Pleuro-Pneumonia.

As no case of this disease was discovered in Great Britain between the 9th November, 1892 and the 2nd April, 1893, hopes were entertained that it had been finally got rid of. Although not actually stamped out the area over which the disease was distributed in 1893 was materially reduced as compared with the previous year, and the numbers of fresh outbreaks, cattle attacked, and contact cattle slaughtered, were also very considerably reduced.

Pleuro-pneumonia.

The following Table gives the history of pleuro-pneumonia in Great Britain, so far as statistics can give it, from 1870, when returns relating to it were first collected, up to 1893.

Pleuro-pneumonia in Great Britain from 1870 to 1893:—

Pleuro-pneumonia outbreaks and cattle attacked.

YEARS.	Number of Infected Counties.	Number of Fresh Outbreaks.	Number of Cattle Attacked.	Diseased Cattle		Healthy Cattle in contact slaughtered.	Cattle slaughtered as suspected, but found free from Pleuro-Pneumonia.
				Killed.	Died.		
1870	68	1,508	4,602	1,755	1,276	2,035	
1871	68	1,669	5,869	2,207	1,339	1,836	
1872	71	2,474	7,983	3,871	1,979	3,245	
1873	72	2,711	6,787	5,061	1,028	2,030	
1874	71	3,262	7,740	7,434	289	1,485

1878	67	1,721	4,593	4,488	114	1,357	
1879	63	1,549	4,414	4,296	119	2,042	
1880	51	1,052	2,765	2,681	88	1,389	
1881	45	729	1,875	1,797	78	914	
1882	46	494	1,200	1,161	39	962	
1883	40	349	931	897	35	981	
1884	33	312	1,096	1,074	20	751	
1885	41	404	1,511	1,469	42	1,167	
1886	48	553	2,471	2,409	63	2,446	
1887	47	618	2,437	2,384	52	3,817	
1888	39	513	1,843	1,786	59	8,722	
1889	41	474	1,646	1,603	42	7,297	
1890	36	480	2,057	2,022	37	11,301	
1891	27	192	778	778	—	9,491	232
1892	10	35	134	134	—	3,477	188
1893	4	9	30	30	—	1,157	86

From the above Table it will be seen that last year the number of infected counties was only 4, less than half the number infected in 1892.

Report by the Assistant Inspector.

The outbreaks numbered 9 as compared with 35, the diseased cattle were 30 instead of 134, while the healthy contact cattle were 1,157 as compared with 3,447 the preceding year.

Pleuro-pneumonia.

Of the 9 outbreaks of pleuro-pneumonia in Great Britain last year, 7 were in England, viz., 2 in London, 4 in Middlesex, and 1 in York (W.R.). The other 2 were in the county of Forfar in Scotland.

Pleuro-pneumonia first outbreak in 1893.

In dealing with these outbreaks in the order in which they occurred, the first was reported in Forfarshire on April 2nd by a veterinary surgeon who had seen the lungs after death and forwarded them for the examination of the veterinary officers of the Board of Agriculture who found pleuro-pneumonia lesions of some three or four months' standing. This animal was not suspected of pleuro-pneumonia during life and the source from which she became infected could not be satisfactorily found out. The whole of the cattle which had been in contact with this diseased animal, some 46 in number, were slaughtered, but no further case of the disease was found among them. This outbreak was at no great distance from the farm on which the last case in 1892 was discovered.

Pleuro-pneumonia second outbreak in 1893.

The second outbreak occurred near Barnsley in the West Riding of Yorkshire and was reported to the Board of Agriculture on May 8th by a veterinary surgeon who made a post-mortem examination and forwarded the lungs of an animal which had died. The lung lesions in this case were those of pleuro-pneumonia of tolerably recent date. In slaughtering out the contact cattle on the premises, 9 in number, another case was found, an old encysted one some five or six months old. It was, no doubt from this old encysted case that the other cow became infected.

Pleuro-pneumonia third outbreak in 1893.

The third outbreak was reported on May 22nd in a large herd at a dairy farm near Hendon, in Middlesex, where from the number of animals affected there could be little doubt the disease had existed on the premises for some time before its existence was made known, but the actual origin of the disease was not satisfactorily made out.

As the dairy farmer on whose premises this outbreak occurred was a dealer as well, and having also a private slaughter-house, there was reason to believe that the first affected animal or animals had been slaughtered some time before notice was given.

In slaughtering out the contact cattle in this outbreak, 302 in all, belonging to different owners, 10 cases of pleuro-pneumonia were found, all of them among the cattle of the farmer on whose premises the disease was discovered. It may be mentioned here that until this Hendon outbreak occurred no case of pleuro-pneumonia had been found in London or its vicinity since the beginning of October, 1892, a period of nearly eight months.

Pleuro-pneumonia fourth outbreak in 1893.

The fourth outbreak was reported on July 22nd, in a cowshed in Dundee, Forfarshire. A veterinary surgeon forwarded the lungs of a cow which had been slaughtered by the owner, and on examination they showed pleuro-pneumonia lesions of recent date.

In tracing the history of this cow it was found that she had been bought in the Dundee cattle market about three weeks previously from a Lanarkshire cattle dealer. As this dealer had a number of cattle on his farm which had been exposed to the risk of infection from this cow while in his possession, and had also about the same time sold a number of others they were traced and slaughtered, nearly 300 in all, belonging to about 60 different owners but no further case of the disease was found amongst them.

Report by the Assistant Inspector.

The fifth outbreak occurred at East Finchley, in Middlesex, on August 12th where the first case was in a cow said to have been purchased in Barnet Fair in September, 1892, but as there had been several cattle-dealing transactions between the owner of this cow and and the dairy farmer and dealer on whose premises at Hendon the disease existed in May, there was every reason to believe that this outbreak was in some way connected with the Hendon one.

Pleuro-pneumonia fifth outbreak in 1893.

In slaughtering out the contact cattle, in this case over 60 in number, belonging to 3 different owners, 2 more cases of the disease were found, both of them on the same premises as the first one.

Pleuro-pneumonia sixth outbreak in 1893.

The sixth outbreak was on the premises of a dairy farmer and dealer at Cricklewood, in Middlesex, who reported it on September 26th, and, on the veterinary inspector visiting the place, he found several cows ill, two of them in almost a dying condition. In this outbreak 337 cattle which had been exposed to the risk of infection were traced and slaughtered, and among them 8 cases of pleuro-pneumonia were found, all of them among the cattle on the premises where the disease was first reported. The greater number of the cows on this dealer's premises had come from Derbyshire and Notts; inquiries were made there but no centre of disease could be found where they were said to have come from.

Pleuro-pneumonia seventh outbreak in 1893.

The seventh outbreak occurred at Willesden, in Middlesex, on October 31st, and appeared to be connected with the previous one at Cricklewood as the only diseased cow found in the herd was one purchased some three months previously from the Cricklewood dealer on whose premises disease was reported the previous month. In this case about 40 contact cattle were slaughtered.

Pleuro-pneumonia eighth outbreak in 1893.

The eighth outbreak was discovered after slaughter in a cow which had been earlier in the day exposed for sale in the Metropolitan Cattle Market, on November 6th. This animal came out of a cowshed near Edgware Road, London, where 3 more cases of the disease were found on slaughtering out the rest of the herd. In this outbreak about 70 cattle were slaughtered, part of them being cows which had stood in the cattle market in close proximity to the diseased cow.

Pleuro-pneumonia ninth outbreak in 1893.

The ninth and last outbreak of the year was discovered on December 19th on the premises of a dairyman at Wandsworth, where only the one case of disease was found, and that an old encysted one. The origin of this case was not discovered. The owner had had this affected animal in his possession for some considerable time, and as no further case of disease was found among the 15 contact cattle slaughtered, it is probable that the cow had passed the stage in which she could infect others, prior to the time she came into this herd.

Report by the Assistant Inspector.

Foot-and-Mouth Disease.

During 1893 only two outbreaks of this disease occurred in Great Britain. The first of these in a cowshed in Barnsbury, North London, was reported on Sunday the 1st of January, and six out of the nine cows in the shed were found affected.

Foot-and-mouth disease in London.

The premises on which this outbreak took place being in dangerous proximity to the Metropolitan Cattle Market and Lairs, and the risk of the disease being carried by some means of mediate contagion if these diseased animals were kept alive it was deemed advisable to slaughter without delay the whole of the cattle on the premises. The slaughter was carried out the same night, and the destruction of the fodder and litter on the premises and the thorough cleansing and disinfection of the shed on the following days. With regard to the origin of this outbreak nothing definite was made out; no fresh animals had been taken on to the premises, and it was therefore certain that the disease was the result of mediate contagion by some means the officers of the Board were unable to discover.

No further case of foot-and-mouth disease occurred in London during the year.

Foot-and-mouth disease in East Sussex.

The second outbreak, which took place on a farm at Guestling in East Sussex, was reported on Saturday, 18th February.

On the following day, when one of the veterinary inspectors of the Board and the veterinary inspector of the Local Authority visited the premises, they found several cattle showing unmistakable symptoms of foot-and-mouth disease.

In this case the surroundings were such as rendered isolation comparatively easy, and this was adopted instead of slaughter as in the former outbreak. The disease gradually ran through the whole of the cattle within the farm buildings where it broke out, but the sheep on the same farm never took it. The whole of the 24 cattle had recovered by the 18th March.

As in the former case, the origin of this outbreak was not discovered. There had been no fresh cattle brought on to the premises, and although several suggestions were offered as to possible means of mediate contagion, none of them could be deemed as satisfactory.

Swine-Fever.

Report by the Assistant Inspector.

Swine-fever.

In the early part of the year a Departmental Committee made an inquiry as to the prevalence of this disease in Great Britain and the best means of getting rid of it.

As the result of their inquiries and the evidence before them the Committee recommended that swine-fever should be dealt with by the Board of Agriculture in the same way as pleuro-pneumonia had been. Before this could be done fresh legislation was required in order that the Board might be provided with the necessary funds out of which to pay compensation.

A short Act was passed giving the Board power if they thought fit to slaughter diseased and in contact pigs ,and pay compensation to the extent of half value for the diseased and full value for the healthy. This Act came into operation on the 1st November, when the Board of Agriculture took up the work of stamping out swine-fever. As the Local Authorities dealt with the disease for the first ten months of the year it will be necessary to some extent in this report to refer separately to the state of things that existed prior to the 1st November.

Swine-fever in Great Britain.

During the first ten months of 1893 swine-fever existed in 65 counties in Great Britain, viz.: 47 in England, 8 in Wales, and 10 in Scotland. This is an increase of one in the number of infected counties in England as compared with 1892, but a decrease of one in Wales and also a decrease of one in Scotland.

Only three counties in England were free from swine-fever during the first 10 months of last year, these were Cumberland, Westmorland, and the Isles of Scilly. Hereford, in which the disease did not exist in 1892, was last year added to the infected list.

The four counties in Wales free from the disease were Anglesey, Brecon, Merioneth, and Pembroke.

In Scotland swine-fever has never been very prevalent or widely spread. The 10 Scotch counties in which it existed during the 10 months were Argyll, Ayr, Berwick, Dumfries, Fife, Forfar, Midlothian, Orkney, Perth, and Wigtown.

Number of outbreaks in ten months.

In the ten months that the Local Authorities were dealing with the disease, 2,377 outbreaks of swine-fever were reported, 2,284 of them in England, 67 in Wales, and 26 in Scotland. In these outbreaks 11,729 swine were attacked, 11,198 in England, 292 in Wales, and 239 in Scotland.

Disposal of diseased pigs.

With regard to the disposal of these diseased pigs and 238 more which remained alive in a diseased condition at the beginning of the year, 5,405, or less than half, were killed, 5,020 died, and 1,542 recovered. This shows that the Local Authorities were not very energetic in dealing with the outbreaks of swine-fever brought under their notice. Everyone of these 5,020 pigs which died of the disease, and also the 1,542 which recovered must have been for some time capable of infecting others and were daily giving off sufficient infective material to reproduce the disease in thousands of others. In addition to the diseased pigs slaughtered in the above outbreaks, 3,952 healthy pigs on infected premises were slaughtered and 172 removed.

Under the Animals Order of 1886 the slaughter of diseased and in contact pigs was optional on the part of the Local Authorities, and not a few of them failed to slaughter even the diseased pigs and pay compensation, so that when notice of the existence of swine-fever was given, in many instances the unfortunate owner had his premises shut up, and while his diseased pigs were dying he was prevented from moving his healthy ones, all he could do to lessen his loss was to slaughter his whole herd and make what little salvage he could from such carcases as were

Report by the Assistant Inspector.

marketable. Where Local Authorities neglected to slaughter and pay compensation there was no inducement for pigowners to report the existence of disease, in fact it was to their advantage to conceal the disease and make the most of their pigs without the knowledge or interference of the Local Authority. Under these circumstances it is only natural to suppose that a good many outbreaks of swine-fever were never reported, and unscrupulous owners sent their infected pigs into distant markets where they could not be traced. The disease was thus spread and kept up. It is true Local Authorities had power to make regulations with reference to the admission of pigs into their districts from the district of any other Local Authority, but many of them made no such regulations and allowed the free movement of swine into their districts from others whether disease existed in the neighbourhood or not.

Little inducement to report existence of swine-fever.

Swine-fever work taken up by Board of Agriculture.

When the Board of Agriculture took the work up at the beginning of November and began to slaughter, not only the diseased pigs, but also the healthy ones in contact, and pay compensation, it was only to be expected that the number of reported outbreaks should increase, and so they did, but not to the extent that might have been anticipated. In the first ten months of the year the outbreaks averaged about 237 per month whereas they were at the rate of 268 a month in the last two months of the year.

In dealing with the 536 outbreaks of swine-fever in November and December the Board of Agriculture found that 1,147 pigs died from the disease, and it was necessary to slaughter 6,045 pigs which were either diseased or had been exposed to the risk of infection. By order of the Board 93 suspected pigs were slaughtered, but were found on post-mortem examination to be free from swine-fever.

In every reported outbreak of swine-fever the internal organs of the first pig which had died or been killed were sent to London and examined by the veterinary officers of the Board, and if they were satisfied that the pig in question was affected with swine-fever then the slaughter of all the pigs on the premises was carried out. In the two months the viscera of 903 pigs were thus submitted to the veterinary officers for their opinion, 548 of which, or about 60 per cent., were cases of swine-fever.

Success of cleansing and disinfecting premises.

Although it could not be said that any progress had been made in stamping out swine-fever during the two months the Board of Agriculture had been carrying out the slaughter, it is satisfactory to know that no recurrence of the disease had taken place on premises where it existed, and where slaughter and disinfection had been carried out under the supervision of the Board's officers.

This proves very conclusively that the virus of swine-fever can be got rid of more readily than was supposed by proper cleansing and disinfection.

The map here inserted shows the number of outbreaks of swine-fever in each county in Great Britain in 1893.

Wyman & Sons, Ltd. Lith, 63, Carter Lane

Anthrax.

Report by the Assistant Inspector.

Anthrax.

The returns relating to this disease received during the past year show a very marked increase as compared with previous years not only in the number of infected counties, but also in the number of outbreaks and animals attacked.

The following Table gives the number of infected counties, fresh outbreaks, and animals of the farm attacked with anthrax in Great Britain in the seven years 1887–93.

ANTHRAX IN GREAT BRITAIN, 1887–93.

Year.	Infected Counties.	Fresh Outbreaks.	Animals Attacked.	Diseased Animals.			Remaining Alive at end of Year.
				Killed.	Died.	Re-covered.	
1887	51	237	649	51	528	43	17
1888	49	185	407	32	310	82	—
1889	44	168	315	52	236	26	1
1890	48	157	543	24	375	145	—
1891	51	234	484	51	383	49	1
1892	60	294	664	64	553	45	3
1893	68	563	1,300	183	992	125	3

The above figures relate to the cases of anthrax in ordinary farm stock only and are exclusive of a number of deer attacked in 1889.

Anthrax increase in Great Britain.

From the above Table it will be seen that the number of anthrax-infected counties in Great Britain increased from 60 in 1892, which was then the highest number on record, to 68 last year, while both the number of outbreaks and animals attacked was nearly doubled.

With regard to the 68 infected counties, 45 were in England, 5 in Wales and 18 in Scotland. This is an increase of 1 in the number of infected counties in England, 4 in Wales, and 3 in Scotland, as compared with the number in which anthrax existed in 1892.

Anthrax-infected counties in England.

Only 5 counties in England were free from anthrax last year, these were London, Monmouth, Isle of Ely, Isle of Wight, and Isles of Scilly, in the 4 former of which the disease existed in 1892. In the course of the year anthrax reappeared in the counties of Bedford, Cambridge, Cumberland, Middlesex, and Sussex (West), in none of which had cases been reported in 1892, although the disease had in previous years existed in all of them. It may be here mentioned that the only part of England which has enjoyed a complete immunity from anthrax during the past seven years has been the Isles of Scilly.

Anthrax-infected counties in Wales.

In Wales 7 counties were free from anthrax last year, these were Anglesey, Brecon, Carnarvon, Denbigh, Flint, Montgomery, and Radnor, the last named being the only Welsh county in which it existed in 1892, but while the disease disappeared from Radnor last year it appeared in Cardigan, Carmarthen, Glamorgan, Merioneth, and Pembroke, in none of which it existed in the four preceding years.

Anthrax-infected counties in Scotland.

In Scotland the following 16 counties were free from anthrax last year, Argyll, Berwick, Bute, Caithness, Clackmannan, Cromarty, Dumbarton, Haddington, Inverness, Kinross, Lanark, Nairn, Orkney, Renfrew, Shetland, and Sutherland.

Cases of anthrax occurred last year in the following 5 Scotch counties in which none were reported in 1892, viz., Kincardine, Linlithgow, Peebles, Selkirk, and Stirling, but it disappeared from Berwick and Nairn in which it had previously existed.

Report by the Assistant Inspector.

Anthrax.

With regard to the distribution of anthrax in different parts of Great Britain, the following Table shows the number of infected counties, fresh outbreaks, and animals attacked in England, Wales, and Scotland separately in the seven years 1887–1893.

ANTHRAX in ENGLAND, WALES, and SCOTLAND in the Seven Years 1887–93.

	England.			Wales.			Scotland.		
	Infected Counties.	Fresh Outbreaks.	Animals Attacked.	Infected Counties.	Fresh Outbreaks.	Animals Attacked.	Infected Counties.	Fresh Outbreaks.	Animals Attacked.
1887 - -	38	214	594	1	1	6	12	22	49
1888 - -	37	158	310	1	1	6	11	26	91
1889 - -	33	145	264	—	—	—	11	23	51
1890 - -	37	139	510	—	—	—	11	18	32
1891 - -	39	200	416	—	—	—	12	34	68
1892 - -	44	243	557	1	1	3	15	50	104
1893 - -	45	413	1,005	5	29	77	18	121	218

Anthrax, increase of outbreaks and animals attacked.

The above figures show a remarkable increase last year in both the number of outbreaks and animals attacked with anthrax all over Great Britain as compared with the preceding year.

Not only does this appear from the returns of England, Wales, and Scotland, as represented in the above Table, but the fact of the increase being a very general one is further borne out by the returns for individual counties in which the disease existed in both 1892 and 1893.

General increase in England.

In England out of 40 counties in which anthrax existed in both the years above mentioned, only 5 showed a decrease in the number of outbreaks last year. These were Northampton, with a decrease of from 20 to 15, Rutland from 2 to 1, Wilts from 5 to 3, York, W.R., from 42 to 38, and Soke of Peterborough from 3 to 2, but in many English counties the number of outbreaks rose to nearly or quite double what they were in 1892. With regard to Wales the anthrax outbreaks of last year appeared in counties in which it did not exist in the previous year.

Increase in Scotland.

In Scotland out of 13 counties in which anthrax existed in both 1892 and 1893, in only one was there a decrease, that in Roxburgh, where the outbreaks fell from 2 in 1892 to 1 last year. In some the increase was nearly double, as in the case of Aberdeen where the outbreaks increased from 14 to 27, in Perth they increased from 7 to 24, in Kirkcudbright from 1 to 9, and in Wigtown from 3 to 10, while in Fife, where 3, and Forfar where 2 fresh outbreaks occurred in 1892, the numbers were 10 and 14 respectively.

In comparing the number of outbreaks with the number of animals attacked it will be seen that taking the returns for the whole of Great Britain only a little over 2 animals were attacked for each outbreak, which cannot be said to be a very heavy mortality from a disease of so infective a character that legislation for it was considered advisable.

The total number of animals attacked with anthrax in Great Britain last year was 1,300, or more than double the number (664) in the previous year.

In England the increase was from 557 in 1892 to 1,005 last year, the increase in Wales was from 3 to 77 and from 104 to 218 in Scotland. Report by the Assistant Inspector.

Anthrax.

It is difficult to assign any reason for the great increase of anthrax last year, it was supposed by some to be in some way connected with the unusually dry and hot summer, this might have been the case as regards England, but in Scotland which did not suffer from heat and drought the increase was quite as great as in England.

The question might well be asked was there really such a great increase as represented by the returns or was it that stockowners reported more freely last year than they did formerly. It has often been said with regard to contagious diseases of animals that if information is wanted as to the centres in which they exist that information must be in some way paid for and an inducement given to stockowners to give early notice of the existence of disease.

This was the case with regard to anthrax last year. Formerly a farmer could gain nothing by reporting to the Local Authority the existence of anthrax on his farm, and when he did so he might even have been subjected to somewhat irksome restrictions as to the movement of his other animals from the place in which a case of anthrax had occurred.

Slaughter and compensation in anthrax.

On the 1st January 1893 an Order came into operation giving power to Local Authorities to slaughter and pay compensation in outbreaks of anthrax. This no doubt induced owners to report all cases of sudden or mysterious death amongst their animals more freely than formerly. Some Local Authorities availed themselves of this power to slaughter and pay compensation rather too freely, considering that anthrax is not a disease to be stamped out by slaughter. Anthrax does not spread from animal to animal during life as does pleuro-pneumonia or cattle-plague, but from the dead animal or its surroundings, and the slaughter of the whole of the cattle, sheep, or swine, on a farm will not prevent its recurrence among fresh stock from the soil or premises in which the anthrax bacillus or its spores may exist and retain their vitality apart from animal life.

As an instance of unnecessary slaughter of animals where anthrax existed one striking example out of several may be quoted. On a Lincolnshire farm where a few cases of anthrax occurred among the sheep in the early part of last year, a whole flock of ewes in lamb were slaughtered and compensation paid out of the local rates.

With regard to anthrax last year there is good reason to doubt whether all the cases reported as such were genuine ones. In several cases where animals were reported as dying from anthrax inquiries showed that the animals had died from other causes, and such mistakes as to the real cause of death probably helped to swell the anthrax returns for the year.

All the animals of the farm are susceptible to the infection of anthrax, but it is a disease more of cattle than of sheep, pigs, or horses, as shown by the following table which gives the number of the different kinds of animals attacked with anthrax during the past five years.

Report by the Assistant Inspector.

Anthrax.

Anthrax.—Different animals attacked in Great Britain in 1889-93.

	1889.	1890.	1891.	1892.	1893.
Cattle - - -	236	253	300	445	833
Sheep - - -	4	72	15	11	108
Swine - - -	69	210	156	190	313
Horses - - -	6	7	13	18	46

It will be seen from the above figures that cattle are much more frequently attacked with anthrax than any other animals. Of the 1,300 animals attacked with anthrax in Great Britain last year 833, or over 64 per cent., were cattle, 108, or about 8 per cent., were sheep, 313, or 24 per cent., were swine, and 46, or nearly 4 per cent., were horses.

Although a good deal has been said and written about the increasing prevalence of anthrax in this country it must be admitted that our losses from it are very small.

Animals affected compared with the total animals in the country.

Taking the total cattle in Great Britain as 6,700,676, as published in the agricultural returns for 1893, there was a loss last year from anthrax of 1 head of cattle out of every 8,044 ; the loss in sheep was 1 out of every 252,595, in pigs of 1 in every 6,752, and of horses 1 in 33,141, certainly not a mortality to cause any excitement or alarm.

With regard to the disposal of the 1,300 animals attacked with anthrax last year, and 3 diseased animals that remained alive at the commencement of the year, 183 were killed, 992 died, and 125 recovered. This may seem a rather large percentage of recoveries, but it must be remembered that pigs often recover from anthrax and these recoveries last year were to a great extent among pigs.

The map here inserted shows the number of outbreaks of anthrax in each county in Great Britain in 1893.

OF
OUTBREAKS
OF
ANTHRAX
in each County in
GREAT BRITAIN
in 1893.

Wyman & Sons, Ltd., Lith., 63, Carter Lane.

Rabies.

Report by the Assistant Inspector.

There was a considerable extension of the area over which rabies was distributed in Great Britain last year, as well as a great increase in the number of cases. The number of infected counties last year was 18, as compared with 12 in 1892.

Rabies in Great Britain.

The principal increase both in the number of infected counties, and cases of the disease took place in Scotland, a country which had for several years prior to 1892 enjoyed a remarkable immunity from rabies.

Rabies returns were received from 12 counties in England last year, as compared with 10 in 1892.

Of the 12 English counties in which rabies existed, cases occurred in seven of them in 1892, these were Essex, Lancaster, London, Middlesex, Wilts, York (N.R.), and York (W.R.), and while the disease disappeared from three viz.: Cornwall, Hants, and Sussex (East), it was introduced into the following 5 in which it did not exist in 1892, viz.: Chester. Kent, Oxford, Stafford, and Surrey.

Rabies in England.

In Scotland rabies was more widely spread than we have any previous record of. In the autumn of 1892, it appeared in Scotland for the first time since it was made a disease under the Contagious Diseases (Animals) Acts, and cases then occurred in Lanark and Midlothian. Rabies did not exist in Midlothian last year, but cases occurred in the following 6 counties, Ayr, Dumbarton, Lanark, Linlithgow, Renfrew, and Stirling.

Rabies in Scotland.

The following Table shows the number of cases of rabies in different animals in Great Britain in the five years 1889–93.

Animals attacked, 1889–1893.

RABIES in different ANIMALS, 1889–93.

Kind of Animal.	1889.	1890.	1891.	1892.	1893.
Dogs - - -	312	129	79	38	93
Cattle - - -	9	2	—	2	—
Sheep - - -	11	—	1	—	—
Swine - - -	4	1	—	—	—
Horses - - -	4	2	1	—	1
Total - -	340	134	81	40	94

From the above Table it will be seen that the total cases of rabies last year in Great Britain were more than double the number in 1892, and in excess of the total for 1891, but below that of the two previous years.

With regard to the kind of animals attacked, it will be seen that the disease is almost exclusively confined to dogs, comparatively few animals of other species being attacked, and then only when bitten by a rabid dog.

Report by the Assistant Inspector.

Rabies.

This disease, always resulting in dogs as well as other animals, from the bite of a rabid dog, might be exterminated in this country by strictly enforcing the regulations dealing with the slaughter of all rabid and suspected dogs, the muzzling of dogs in infected districts, and the seizure and destruction of all stray ones by the Local Authorities, but many Local Authorities do not care to make and enforce such regulations because they are unpopular and difficult to enforce.

Increase in England.

In England last year the cases of rabies increased from 37 to 46, of which 45 were in dogs and 1 in a horse. The English counties in which the disease was most prevalent were, Lancaster with 13, London 11, York (W.R.) 8, and Middlesex 3, only 1 or 2 occurred in the other infected counties.

The above figures show an increase of 5 in Lancaster, 10 in London, 2 in Middlesex, and 2 in York (W.R.), while there was a decrease of 9 in York (N.R.)

Great increase in Scotland.

The chief increase of rabies last year was in Scotland, where it increased from 3 cases in 1892 to 48 in 1893, or 16 times the number in the former year. The greatest number of cases in Scotland occurred in Lanark, viz., 33 or over two thirds of the total, and there can be little doubt that the other 15 cases originated from the Lanarkshire outbreak, as they occurred in the adjoining counties.

Disposal of affected animals.

Of the 93 dogs attacked with rabies in Great Britain last year 66 were killed and 27 died. The only other animal besides dogs affected with rabies last year was a horse in Middlesex and that was killed.

Danger of keeping rabid dogs alive.

With regard to the destruction of these rabid dogs last year the returns show that in England 10 out of 45, or about 22 per cent., were allowed to live until they died, while in Scotland 17 out of 48, or about 35 per cent., were thus allowed to live and have an opportunity of biting other dogs and thus spread the disease.

The great increase in Lanarkshire was no doubt due to the keeping alive of rabid dogs until they died, for we find that out of 33 rabid dogs 15, or over 45 per cent., were kept alive and given opportunities of perpetuating and spreading this much to be dreaded disease.

The keeping alive of rabid dogs cannot be attributed to any neglect on the part of the Local Authorities, but it must be due to the negligence of the owners to give early information to the Local Authorities of the existence of the disease, and thus rabid dogs are often allowed to wander about for several days before they die or are discovered by the police and destroyed.

The map here inserted shows the number of cases of rabies in each county in Great Britain in 1893.

Wyman & Sons, Ltd. Lith, 63, Carter Lane.

Glanders, including Farcy.

Report by the Assistant Inspector.

Glanders.

Although the outbreaks and cases of glanders in Great Britain, were much fewer in 1893 than in the preceding year, the area over which the disease was distributed was very considerably increased the number of infected counties having risen from 34 to 40, but this wider distribution may, for the following reason, probably be more apparent than real. Until the Glanders Order of 1892 came into operation in the autumn of that year, Local Authorities had no power to slaughter horses affected with glanders and pay compensation to the owners. Under the new Order permissive power was given to Local Authorities, to slaughter horses affected with glanders and pay compensation not exceeding half value, and no doubt the prospect of obtaining some compensation for their diseased animals acted as an inducement in some instances to horse-owners, to report more readily the diseased and suspected cases in their stables.

Number of infected counties.

Of the 40 counties in Great Britain, in which glanders was reported last year, 32 were in England, or one more than in the previous year, three in Wales, being an increase of 2, and 5 in Scotland, as compared with 2 in 1892.

Glanders existed in both 1892 and 1893, in the following 24 counties in England viz. :—Bucks, Chester, Durham, Essex, Hants (ex Isle of Wight), Herts, Hunts, Kent, Lancaster, London, Middlesex, Norfolk, Notts, Oxford, Stafford, Surrey, Sussex (East), Sussex (West), Warwick, Westmorland, Wilts, Worcester, York, (W.R.), and Isle of Ely. On the other hand while the disease maintained a continued existence during the past two years in the above counties, it disappeared from the following 7, viz. :—Berks, Devon, Lincoln (Holland), Lincoln (Lindsey), Somerset, Suffolk, and York (E.R.), but was introduced into 8 others in which it did not exist in 1892; these were Bedford, Cambridge, Gloucester, Lincoln (Kesteven), Northampton, Northumberland, Salop, and the Soke of Peterborough. With regard to the 3 infected counties in Wales, Flint, Merioneth, and Montgomery, the disease was introduced into all of them last year, while it disappeared from Glamorgan which was the only Welsh county in which glanders existed in 1892. Of the 5 infected counties in Scotland in 1893, in only 1, viz., Lanark, did the disease exist in the previous year, and while it was introduced into Ayr, Haddington, Perth, and Wigtown, it disappeared from Midlothian.

Number of outbreaks.

With regard to the number of fresh outbreaks of glanders in Great Britain during the past year, we find a decrease of 276, *i.e.*, from 1,657, in 1892 to 1,381 last year.

In England there was a decrease of 280 and in Wales of 1, in the number of outbreaks, but in Scotland there was an increase of 5 as compared with the number of outbreaks in the preceding year.

In Great Britain there was also a decrease of 868 in the number of animals attacked last year, as compared with 1892; *i.e.*, from 3,001 to 2,133; the decrease amounted to 858 in England, 2 in Wales and 8 in Scotland.

It will be seen from the above figures that although glanders was more widely spread in Great Britain last year, there was a material decrease in the number of outbreaks and animals attacked.

Report by the Assistant Inspector.

Glanders.

It has been stated in former reports, that London and the adjoining counties of Essex, Kent, Middlesex, and Surrey, are never free from glanders, and they have always furnished a very large proportion of the fresh outbreaks and number of animals annually attacked. The past year has been no exception to the rule, for although there has been a decrease in the above-named counties of 306 in the number of outbreaks, and 910 in the number of animals attacked, they still furnished about 88 per cent. of the outbreaks in the whole of Great Britain, and over 87 per cent. of the total animals attacked.

Decrease in the Metropolitan district.

The decrease in the metropolitan district, was almost entirely in London, for we find, on examining the returns relating to these counties separately, that in Essex the outbreaks decreased by 5 viz.: from 40 to 35, and the animals attacked by 15 or from 70 to 55, while in Kent there was an increase of 5 in the outbreaks, viz., from 16 to 21, and of 2 in the animals attacked from 26 to 28; in Middlesex the outbreaks decreased from 106 to 87, while the number of animals attacked remained the same, viz., 121 in both 1892 and 1893; in Surrey the outbreaks increased from 33 to 39, and the animals attacked from 35 to 45; in London there was a decrease of 293 in the number of outbreaks, from 1,344 to 1,051, and a decrease of 907, from 2,526 to 1,619 in the number of animals attacked.

Glanders in England outside the Metropolitan district.

With regard to the glanders returns from other counties in England, there is little worthy of special mention; it may be noted, however, that in Herts the outbreaks increased from 10 to 14, and the animals attacked from 14 to 28; in Warwick, the outbreaks increased from 12 to 25, and the number of animals attacked from 14 to 42, while in York (W.R.) there was an increase of from 4 to 9 in the number of outbreaks and from 5 to 12 in the animals attacked. The glanders returns relating to Wales, call for no comment beyond what has been already made.

Glanders in Scotland.

With regard to the returns from Scotland, it is worthy of notice, that although the number of outbreaks has increased, taking the whole country, there was a decrease in Lanarkshire, which has hitherto been considered the principal centre of the disease in Scotland, and the one from which it has usually extended into other Scotch counties.

Danger of partially recovered animals.

With regard to the disposal of the 2,133 animals attacked with glanders during 1893, and six that remained in a diseased condition from the previous year 2,075 were killed, 55 died and 9 are returned as recovered. These recovered animals were probably affected with the form of the disease known as farcy, but it is very doubtful whether their recovery will be complete and permanent, most of these so-called recoveries from farcy, end ultimately in decided cases of glanders, under debilitating influences, such as hard work or insanitary surroundings. It is these partially recovered cases which show no outward evidence of the disease that often prove the means of spreading the infection sometimes on the premises of their original owners, but not infrequently they are sold and break down with the disease in the hands of others owners.

Difficulty of diagnosis.

The diagnosis of glanders is often extremely difficult, and any means which proves useful in detecting the existence or non-existence of glanders in suspected animals, which do not show sufficiently marked symptoms to warrant their slaughter, must be looked upon as of material advantage to the veterinary profession as well as to the owners of horses in all countries in which glanders exists. Within the last year or two,

a substance known as mallein, cultivated from the virus of glanders, has been used for the purpose of diagnosing doubtful and suspected cases of the disease. Report by the Assistant Inspector.

A small quantity of this mallein is injected under the skin and the temperature of the suspected animal carefully watched from hour to hour, when in the case of a glanders-infected animal, the temperature rises two or more degrees accompanied by other signs of illness, whereas in an animal free from the infection no reaction takes place. Experiments with mallein.

A number of experiments and observations have been made with regard to the action of this mallein as a means of diagnosing glanders by the professors at the Royal Veterinary College and others in this country, during the past year, the result of which goes to show that it is a valuable, though not infallible, aid to diagnosis in some doubtful cases.

At the time the Glanders Order of 1892 was passed, very little was known about the action of Mallein, and even now it seems doubtful whether the Board of Agriculture would be justified in consenting to the use of Mallein by Local Authorities as a means of diagnosis in animals suspected of glanders. At present it can only be used with the consent of the owner, and even if reaction occurs as the result of the inoculation, the owner may still object to the slaughter of his animal until some more definite symptoms of glanders make their appearance.

Although the Glanders Order of 1892 gives the power to slaughter and pay compensation, few Local Authorities have, during the past year done so, but they have, in many cases, exercised their powers with regard to movement of suspected horses, and the cleansing and disinfection of infected stables.

Sheep-Scab.

Report by the Assistant Inspector.

Sheep-scab.

For years this has been the most widely spread and the most prevalent of the contagious diseases of animals in Great Britain. This is the more to be wondered at seeing it is the one that might be most easily got rid of. The eradication of sheep-scab from this country would not involve the slaughter of any diseased sheep, and as no compensation would have to be paid, the cost would therefore be small. The proper application periodically of some of the dressings or dips, advertised so largely in the agricultural papers, to the affected sheep, would be sufficient to cure them, and the strict isolation of every scabby flock would prevent the spread of the disease to others.

Every flock-owner and shepherd can recognise a scabby sheep when they see one and they know they can easily cure it, but as the presence of one case of scab in a flock renders the dipping or dressing of the whole flock necessary and as this involves a considerable amount of labour, the thorough dressing of the whole flock is often neglected or very imperfectly carried out.

As the losses from scab in this country are small, owing to the limited numbers of our flocks and the way in which they are managed, many flock-owners and their shepherds are very careless about the matter and allow the disease to linger on in their flocks for several weeks or months and even longer.

Number of sheep-scab infected counties.

During the past year sheep-scab was more widely spread in Great Britain than in any of the five preceding years. It existed in 86 counties as compared with 82 in 1892, 80 in 1891, and 75 in 1890. Only 10 of the 96 counties in Great Britain were entirely free from the disease last year.

The 86 counties in which sheep-scab existed were distributed as follows: 46 in England, 11 in Wales, and 29 in Scotland. As compared with the number of infected counties in 1892, this shows an increase of one in England and three in Scotland, the number being the same in Wales in both years.

Although there was this increase in the number of infected counties, there was a decrease in the number of fresh outbreaks and of sheep attacked.

The number of outbreaks of sheep-scab in Great Britain last year was 2,603 as compared with 2,821 in 1892, showing a decrease of 218, while the number of sheep attacked was 45,393 as compared with 53,214 in the previous year.

Sheep-scab in England.

In England as already stated, there was one more infected county than in 1892. Of the 50 English counties only 4 were free from sheep-scab last year, these were Dorset, London, Isle of Ely, and Isles of Scilly. Even with another county added to the infected list there was a material decrease in the number of outbreaks and of sheep attacked with scab in England last year.

The outbreaks which numbered 1831 in 1892, were only 1,544 last year, a decrease of 347, or more than the total decrease over the whole of Great Britain. The number of sheep attacked in England in 1892 amounted to 40,400 in 1892 whereas in 1893 they only numbered 31,120, and here again we have a decrease of 9,280, which is greater than the general decrease over the whole of Great Britain.

Sheep-scab in Wales.

With regard to Wales only 1 county was free from sheep-scab last year, viz., Brecon, and that was the only Welsh county free from the disease in 1892.

Report by the Assistant Inspector.

Although there was no extension of the area over which sheep-scab was spread in Wales last year, there was an increase of 70 in the number of outbreaks and of 1,694 in the sheep attacked as compared with 1892.

Sheep-scab in Scotland.

In Scotland the number of infected counties increased from 26 in 1892 to 29 last year, thus leaving only 5 Scotch counties free from sheep-scab. These were Clackmannan, Cromarty, Inverness, Kincardine, and Orkney.

With an increase of 3 in the number of infected counties in Scotland there was a decrease of 1 in the number of outbreaks, and of 235 in the sheep attacked.

From the above it will be seen that the increased prevalence of sheep-scab in Great Britain last year was entirely due to Wales, there having been a decrease in both England and Scotland.

W. Duguid,
Assistant Inspector.

Board of Agriculture, 1894.

Report by the Chief Travelling Inspector.

Swine-fever.

Report by the Chief Travelling Inspector for the Year 1893.

During the year some of the functions formerly exercised by Local Authorities in connection with swine-fever were transferred to the Board of Agriculture, and the most important duties performed by the Inspectors of the Board have consisted in carrying out that part of the work of dealing with this disease for which the Board is now responsible.

It is only in recent years that swine-fever has attracted any special attention. In 1862 an outbreak was investigated in Berkshire, and though a disease of swine of a virulent and fatal character had previously been known to Bristol dealers under the names of "red disease," "soldier," or "purples," it cannot be said that swine-fever was scientifically recognised until this date. No attempt was made to check the spread of the disease till 1878, when an Order was passed, in consequence of representations made by Local Authorities of several districts, which provided for the slaughter of diseased swine by Local Authorities, gave powers for the slaughter of swine that had been in contact with diseased swine, and prohibited movement of swine out of a place in which swine-fever existed or had existed within six days, except for slaughter. Since the date of the above-mentioned Order various expedients for dealing with the disease have been tried, and several Orders have been passed. In 1882 the necessity for imposing restrictions on the movement of swine was recognized, and infected areas were declared by the Privy Council. At the same time Local Authorities were empowered to prohibit or regulate movement of swine into their districts. In 1884 an Order was passed under which movement of swine within half a mile of a swine-fever infected place was restricted. In July 1885, the Swine-Fever, Markets and Fairs Order was passed, prohibiting exposure for sale of swine in markets or fairs without a licence of the Local Authority. The measure was fairly successful, but owing to the outcry raised by dealers and auctioneers, these restrictions were removed, and Local Authorities were required to cause the slaughter not only of diseased swine, but also of those in contact. This last Order only remained in force about nine weeks, and apparently failed to produce any good results, and since this period until 1st November last slaughter has been optional with Local Authorities.

The result of the efforts of the Privy Council and Local Authorities cannot be exactly estimated. Official returns have been made since 1879, but swine-fever is sometimes difficult to diagnose, and always easy to conceal, and it is probable, that as a rule, the disease has been far more prevalent than has been indicated by the returns. But the attempts made to cope with the disease under the above Orders had at least the effect of bringing into notice certain difficulties which necessarily stood in the way of Local Authorities while acting independently of each other. It was found that whenever one Local Authority undertook to stamp out the disease within their district, suspected pigs were moved by unscrupulous persons from that district into the districts of other Local Authorities, as the owners of pigs supposed to be affected with swine-fever, preferred selling them at a small price to giving notice of disease, and having their premises closed. Again, it was found difficult for Local Authorities to protect their own districts against the introduction of disease, except by prohibiting the movement of swine into their districts altogether. For any regulation against the introduction of swine from specified districts was easily evaded by moving the swine out of the specified district into a district against which there was no

Report by the Chief Travelling Inspector.

Swine-fever.

prohibition. In fact, a principal result obtained by the authorities by their action with regard to swine-fever, was a demonstration of the inherent futility of any local and occasional effort to cope with the disease, and of the necessity of establishing uniformity of action by the intervention of a central authority.

In consequence of numerous representations to the above effect made to the Board of Agriculture, a Committee was appointed on 7th April 1893, "to inquire into the working of the provisions of the Contagious " Diseases (Animals) Acts, in so far as they relate to swine-fever, and " having regard to the nature of that disease and to the conditions " under which swine are infected therewith, to consider whether any " more effective measures could be adopted for its prevention and " extirpation."

The following important recommendation was made amongst others by this Committee:—

"The administration of the Contagious Diseases (Animals) Acts, throughout Great Britain and Ireland, so far as they relate to slaughter compensation and regulation of movement of swine in herds or on premises where an outbreak of swine-fever has occurred or in the surrounding area, shall be subject to and under the direction of a central authority in Great Britain and Ireland respectively."

The recommendations of the Committee obviously did not contemplate that the whole of the work of dealing with swine-fever should devolve upon the Central Department, but aimed at securing uniformity of action on the part of all concerned, by giving to a Central Authority an increased influence in the administration of the Contagious Diseases (Animals) Acts so far as they relate to that disease. In accordance with the above recommendation, the Board of Agriculture obtained powers under the Contagious Diseases (Animals) Act, 1893, and undertook certain executive duties under that Act, including the diagnosis of the disease, slaughter, and disinfection. At the same time the Local Authorities remained responsible for a very important share in the undertaking and all duties connected with notification of outbreaks, isolation of suspected swine, and the enforcement of the regulations as to movement, which they might find it necessary to make or which might be made by the Board of Agriculture.

That the Board should undertake the diagnosis of the disease was made necessary by the following circumstances:—Considerable differences of opinion existed locally as to the exact nature of the disease contemplated by the Act, and in some parts of the country some admittedly non-contagious affections were supposed to come within its intention, and consequently the Board did not feel justified in spending public funds in slaughtering swine except where satisfied as to the existence of the disease by the Board's veterinary officers. It was therefore arranged that in every case where disease was reported, a local veterinary surgeon should be instructed in the first instance to examine the suspected swine, and if in his opinion they showed symptoms of swine-fever, he was to slaughter a pig and forward the viscera to London that his opinion might be confirmed by a post-mortem examination, made by the Board's veterinary officers.

The positive verification of the disease is in some cases found to be very difficult, and may necessitate professional supervision of the suspected animals for some considerable time. The interval that may thus follow the report of the supposed existence of the disease and the final decision of the Board has in some instances been somewhat criticised. But it is obvious that a careful and complete investigation is absolutely

Report by the Chief Travelling Inspector.

Swine-fever.

necessary both in the interests of the owner of the swine and for a proper protection of public funds, and it has been satisfactorily shown that no undue risk of the spread of the disease will occur in any such cases, provided that the Local Authorities exercise their powers with promptitude and energy, and the isolation of the suspected animals is properly enforced.

Very stringent precautions for the isolation of suspected swine in an infected place are contained in the Swine-Fever Order of 1893, and if the infected place is declared by the inspector of the Local Authority as required by the Swine-Fever Orders, immediately on receipt of notice of the suspected disease, and the rules under the Order are strictly enforced, a delay in slaughter does not involve any serious risk.

At the outset each outbreak of swine-fever was dealt with separately by slaughtering out the swine involved, and no general restrictions on movement were imposed. This course was adopted with the double object of reducing the amount of disease and of inducing owners to report disease, in the hope of obtaining compensation, so that the Board might ascertain where disease was most prevalent and in what districts restrictions on movement might be necessary after completion of slaughter.

Premises on which the disease has been found have been thoroughly disinfected, and in some cases the stys in which the pigs were kept were altogether destroyed. These precautions have been so successful that, although outbreaks have in some cases occurred on premises that had been disinfected by the Board, there has never been an instance in which there was any reason to suppose that disease was contracted owing to infection remaining in the premises.

The experience of the Board for the two months during which they have been engaged in dealing with swine-fever leads them to the conclusion that slaughter to be effectual must be combined with restrictions on movement which should be made stringent, even to absolute prohibition, in proportion to the prevalence of the disease and the density of the pig population in the district to which they are applied. The Board have further been led to conclude that the amount of swine-fever existing in the country is much greater than was at first supposed, and that the difficulty of extirpating the disease, and at the same time the urgent importance of checking its ravages, have not hitherto been sufficiently recognised.

Pleuro-pneumonia.

During the past year there have been nine outbreaks of pleuro-pneumonia. The first of these occurred in Forfarshire at the beginning of April. No clue could be obtained as to the origin of the outbreak, but all cattle that had been exposed in any way to infection were traced and slaughtered, and veterinary surgeons, practising in the neighbourhood, were employed for some time to inspect and report weekly on the health of the stock in the district.

Another outbreak occurred on 9th May in the West Riding of Yorkshire. In this case the first animal found affected was pronounced by the veterinary officers of the Board to have contracted the disease recently, but on slaughtering eight cattle that had been in contact, one was found to be affected with the disease in the encysted condition. This animal had been on the premises more than three months, but as the veterinary officers of the Board were of opinion that it had been affected for a still longer time, it was regarded as having introduced the disease. This cow was found to have been purchased in Derby market, but could not be traced any further with certainty.

Report by the Chief Travelling Inspector.

Pleuro-pneumonia.

The next four cases are so far connected that far the purpose of estimating the present position of the country in respect of pleuro-pneumonia all four outbreaks might be regarded as one.

The first of these outbreaks occurred on the 23rd May, on a dairy farm near London, and a large number of cattle that had been exposed to infection were traced and slaughtered, but the origin of the outbreak was not at the time discovered.

Another outbreak occurred in the same neighbourhood about four months later. In this case the only clue as to the origin of the outbreak was that one of the in contact cattle which, in the opinion of the Board, had introduced the disease about eleven months before, had passed through the hands of the owner of the cattle involved in the outbreak near London, already mentioned.

Another outbreak occurred 27th July on the premises of a dealer in Middlesex. This outbreak, like that which occurred near Barnsley, seemed to have been introduced by a cow brought from the neighbourhood of Derby.

But a considerable amount of light was thrown on the above three cases by the occurrence of a fourth outbreak at the end of September among the stock of a cow-keeper in premises situated near London. In this case disease was found to have been introduced by a cow brought about three months before from the premises on which the third of this series of outbreaks occurred, and in the course of the inquiries made as to the history of this animal, information was obtained which pointed plainly to the conclusion that all the four outbreaks were more or less directly connected.

In the meantime another outbreak had occurred on 22nd July, in Dundee, Forfarshire. The animal that was regarded as responsible for this outbreak was traced to Dublin.

Two other outbreaks, one in November and one in December, occurred during the year. Both were in the County of London and neither could be very satisfactorily accounted for, but all cattle that had been exposed to infection were traced and slaughtered, and it may be hoped that no further danger need be apprehended from these sources.

In consequence of the reappearance of pleuro-pneumonia in London, the restrictions on movement of cattle in London cow-sheds which had been in force from June 1891 to October 1892, were revived by the London (Cow-Sheds) Pleuro-pneumonia Order of 1893, which took effect on the 27th of November. This Order, which applied to the districts of the City of London and County of London, was intended to prevent the concealment of disease by secret removal of affected animals, and provided that no cattle should be removed from a cow-shed to which the Order applied between the hours of 7 p.m. and 5 a.m., nor at any time without a licence of the Local Authority.

At the same time restrictions were placed on movement of cattle into, within, or out of a district comprising the parishes of Finchley, Hendon, Kingsbury, and Willesden, by the Middlesex Pleuro-Pneumonia Movement Order, 1893.

The following encouraging features in the history of the disease for the year may be noticed. The number of outbreaks was 9 only, as against 35 in 1892 and 192 in 1891. Seven out of the nine outbreaks occurred in urban districts, and in the stock of dairymen which are usually kept under circumstances in which the risk of spreading the disease is minimised. The distribution of the outbreaks may also be regarded as satisfactory. Six cases occurred within a limited area about London, and one was traced to Dublin, so that only three cases

Report by the Chief Travelling Inspector.

tend to weaken the conclusion that the country is on the whole nearly free from this disease.

Rabies.

The number of cases of rabies among dogs reported during the year 1893 was 93 as compared with 38 in 1892, 79 in 1891, 129 in 1890, and 312 in 1889.

During the past year the disease unfortunately made its appearance in several districts in Scotland, a portion of the country that had for several years previous been almost entirely free from the disease.

Although it will be seen that a considerable increase of cases have been reported as compared with 1892, the figures still compare very favourably with those of 1889 and 1890.

The increase in the disease is principally due to the fact that Local Authorities generally show great unwillingness to exercise their powers to enforce the muzzling of dogs on the first appearance of the disease in their locality or neighbouring districts. The disease is thus allowed to get a firm hold, and to extend at once to several districts before serious efforts are made to deal with the matter, and where the disease has been allowed to spread over a wide area Local Authorities do not readily combine to enforce efficient muzzling regulations. The steps that are usually taken, however, though tardy, no doubt tend to check the progress of this scourge.

Transatlantic cattle trade.

A further very satisfactory decrease in losses experienced in the Transatlantic trade from those years previously reported on has occurred during the year 1893.

It was reported that during 1892 the losses experienced were only about 6 per thousand. In the year 1893 the losses fell to the satisfactory figure of only a little over 3 per thousand, the approximate figures of the losses experienced since the year 1888 being as follows :—

Year.	Loss per Thousand Cattle.
1889	21
1890	16
1891	14
1892	6
1893	3

Transit of animals in Great Britain.

The regulations affecting the land transit of animals in Great Britain have for the most part been satisfactorily carried out, and with regard to sea carriage of animals around the coasts of Great Britain, but few complaints have been received. In the trade between Ireland and British ports, however, the losses have on some occasions been of a serious character, and were due in some instances, no doubt, to the exceptional violence of the storms experienced in the Irish Channel during the autumn months. Numerous complaints have been made by different cattle trade associations as to the unsatisfactory arrangements made by shipping companies for the transit of cattle.

J. T. TENNANT,
Chief Travelling Inspector.

Board of Agriculture, 1894.

LEGISLATION FOR THE YEAR 1893.

The Contagious Diseases (Animals) Act, 1893.

[56 & 57 Vict. c. 43.]

The above Act confers further powers under the Contagious Diseases (Animals) Acts, 1878 to 1892 with respect to swine-fever, and received the Royal Assent on the 12th of September 1893.

The Act came into operation on the 1st of November 1893, and enacts that any money applicable under the Contagious Diseases (Animals) (Pleuro-Pneumonia) Act, 1890 [53 & 54 Vict. c. 14], in cases of pleuro-pneumonia shall be applicable in cases of swine-fever, and any powers exercisable under that Act with respect to pleuro-pneumonia and cattle may be exercised with respect to swine-fever and swine, and those powers include power to take such measures under the said Acts of 1878 to 1892 as may seem to the Board of Agriculture, or to the Irish Privy Council, necessary for preventing the spread of swine-fever. The amount of compensation in swine-fever to be the value of the animal immediately before it was slaughtered, or, if the animal was affected with disease, one half of the value of the animal immediately before it became so affected.

The Act also contains provisions as to costs of its execution.

The Board of Agriculture passed 98 Orders under the Contagious Diseases (Animals) Acts during the year 1893.

Pleuro-Pneumonia.

The Orders dealing with pleuro-pneumonia infected places are treated hereafter under the various counties to which the Orders relate.

The Orkney Pleuro-Pneumonia Movement Order of 1892, No. 4987, which was passed on the 8th of July 1892 and prohibited the movement of cattle into Orkney from the district of any other Local Authority in England or Wales or Scotland, except from any district in Scotland as therein provided, was revoked.—Order 5067 (4 Feb. 1893).

The York (Knavesmire) Pleuro-Pneumonia Movement Order of 1891, No. 4573, passed on the 8th of July 1891, and which regulated the movement of cattle for grazing purposes on to the tract of land in the city of York called the Knavesmire, over which the freemen of Micklegate Ward in that city had rights of pasturage and which included the adjoining pieces of land called Scarcroft and Hob Moor respectively and over which the said freemen had the same rights of pasturage, was also revoked.—Order 5077 (3 Mar. 1893.)

The Zetland Pleuro-Pneumonia Movement Order of 1891, No. 4464, dated the 21st of April 1891, which prohibited the movement of cattle into Zetland from the district of any other Local Authority in England or Wales or Scotland, except cattle from Orkney and breeding bulls from any district of Scotland as therein provided, was likewise revoked. —Order 5079 (13 Mar. 1893.)

In consequence of pleuro-pneumonia having reappeared in the county of London it became necessary to again apply the restrictions on the London cowsheds which had been imposed by Order No. 4521 passed

Legislation in 1893.

in June 1891 and revoked in October 1892. The present Order was called the London (Cow-Sheds) Pleuro-Pneumonia Order of 1893, and took effect on the 27th of November. Its operation was restricted to the districts of the city of London and the county of London, and its object like the former Order was to prevent the smuggling of cattle out of the London dairies, especially at night. The Order applied to the premises of every registered cowkeeper—that is "any person "carrying on the trade of cowkeeper who for the time being is registered "under any Order of the Privy Council or Local Government Board "made under the powers conferred by Section 34 (*Dairies, Cow-sheds, "and Milk Shops*) of the Act of 1878 as amended by Section 9 of the "Act of 1886." The movement of cattle out of or from such premises was prohibited between the hours of 7 p.m. and 5 a.m., and movement at any other time could only take place with the licence of the Local Authority granted on a certificate of a Veterinary Inspector certifying that all the cattle on the premises from which the cattle were to be moved were not affected with pleuro-pneumonia, and had not, to the best of his knowledge and belief, been exposed to the infection of pleuro-pneumonia. The person granting the licence had to satisfy himself that the premises out of which the cattle were to be moved were not in a pleuro-pneumonia infected place. The Order contained a proviso that no licence was necessary in the case of movement of cattle for 500 yards from premises to other premises in the same occupation within the districts of the city of London and of the county of London, or either of them. The Order further provided that no carcase nor any portion thereof was to be removed out of a registered cowkeeper's premises, except with the licence of the Local Authority granted on the certificate of a Veterinary Inspector certifying to the effect that to the best of his knowledge and belief such carcase or portion of carcase was not the carcase or formed a portion of the carcase of a head of cattle that was when it died or was slaughtered affected with pleuro-pneumonia. The permission in writing of the Local Authority granted on a similar certificate was necessary for the burial or destruction of a carcase or portion thereof on registered cowkeepers' premises. The carcases of cattle affected with pleuro-pneumonia on the premises of registered cowkeepers were to be dealt with in such manner as the Board might direct. The Order also contained regulations as to the manner in which applications for licences under the Order were to be made, and a form of movement licence was given in a schedule. A copy of every licence granted was to be sent to the Board.—Order 5140 (21 Nov. 1893.)

On the same day the Middlesex Pleuro-Pneumonia Movement Order of 1893 was passed. This Order was issued in consequence of outbreaks of pleuro-pneumonia having occurred in the neighbourhood of Finchley, Hendon, and Willesden. The Order restricted the movement of cattle into, within, or out of a district comprising the parishes of Finchley, Hendon, Kingsbury, and Willesden. Cattle to be moved into the district must have a movement licence of the Middlesex Local Authority, to be granted on a declaration of the owner of the cattle, or his agent, declaring that, to the best of his knowledge and belief, each of the cattle to be moved was not affected with pleuro-pneumonia, and had not been in any way exposed to the infection of pleuro-pneumonia. Cattle to be moved within the district must also have a movement licence of the Middlesex Local Authority, to be granted on a similar declaration of the owner, or his agent. Provision was also made for the granting of occupation movement licences which were to be available for one month for movement within the district. Cattle to be moved out of the district must also have a

movement licence of the Middlesex Local Authority, to be granted on a certificate of a Veterinary Inspector certifying that each of the cattle to be moved was in his opinion free from pleuro-pneumonia, and, as far as he could ascertain, had not been in any way exposed to the infection of pleuro-pneumonia.

The Order contained a saving for through movement by railway and for the Inspectors and officers of the Board.—Order 5141 (21 Nov. 93.)

Swine-Fever.

The provisions of Article 73 (*Swine-Fever Infected Circle*) of the Animals Order of 1886, No. 3446, as amended by Order 3701, were applied to the following districts :—

Borough of Darwen by Order 5093 (19 April 1893).
County of Bedford by Order 5094 (20 April 1893).
Borough of Chipping Wycombe by Order 5098 (13 May 1893).

In consequence of the passing of the Contagious Diseases (Animals) Act, 1893 [56 & 57 Vict. c. 43] which received the Royal Assent on the 12th of September and came into force on the 1st of November, and which conferred special powers on the Board in relation to the slaughter of swine for swine-fever, and to the payment of compensation out of Imperial funds, in cases in which, in the opinion of the Board, slaughter was desirable for the purpose of stamping out that disease, it became necessary for the Board to issue a new General Order on the subject of swine-fever. Accordingly the Swine-Fever Order of 1893 was passed on the 12th of October and commenced to take effect on the 1st of November. It revoked all the existing regulations relating to that disease. In a circular letter A. 23 c. sent by the Board the attention of Local Authorities was called to this Order as follows :—

" Article 1 prescribes the mode in which the existence, or suspected existence, of swine-fever is to be reported. It is important that owners of swine generally should be made acquainted with the obligations imposed upon them under this Article, and it is also very desirable that the police in the district of the Local Authority should be made thoroughly conversant with the course to be taken by them upon receipt of a notification that swine-fever exists or is suspected to exist.

" Articles 2 and 3 prescribe the course which is to be adopted by the Inspectors of a Local Authority on receipt of information as to the existence or supposed existence of the disease. It will be observed that the Inspector is to act forthwith in the manner set out in the Articles, without awaiting any confirmation by a Veterinary Inspector of the existence of the disease, as heretofore. The decision of the Inspectors as to the limits of the infected places should be arrived at after due inquiry as to the number and location of the swine on the premises. As a general rule, it will be desirable that the limits of the infected place should include only a limited area, and should be restricted to the sty, shed, or other place in which the diseased swine are or have been located.

" Article 4 contains Rules applicable to swine-fever infected places, and the Board desire to impress upon Local Authorities the importance of a rigid enforcement of these Rules.

" Article 10 gives power to the Inspector of the Local Authority, as well as to the Board's Inspector, to prohibit the movement of any swine from any farm, field, shed, sty, or other place. This power may be usefully employed in cases where there is reason to suppose that any pig has recently been in contact with disease or

Legislation in 1893.

" in any way exposed to infection, but where there is not sufficient " evidence to justify the declaration of an infected place.

" Article 20 imposes upon Local Authorities the duty of providing " their Inspectors with the forms referred to in the first schedule " of the Order.

" I am also to call attention to the fact that, although it will no " longer be the duty of Local Authorities to make regulations affect- " ing the movement of swine into their districts, regulations made " by them with reference to such movement previous to the " commencement of the Order will, under Article 23 of the Order, " remain in force until revoked by the Local Authority or the " Board.

" In conclusion, the Board desire me to observe that, although " the power to slaughter and pay compensation will, for the future, " be exerciseable by the Board, Local Authorities will continue " responsible for the execution of many duties of the very first " importance in connection with the extermination of the disease. " The success of the new Act must therefore depend very much " upon the co-operation and goodwill of those Authorities and their " officers, and the Board trust that, as in the case of pleuro- " pneumonia, they will receive that full support and assistance in " the performance of the business now devolving upon them, " without which it is impossible to hope that the disease will be " stamped out within a reasonable period."—Order 5134 (12 Oct. 1893.)

Miscellaneous.

The operation of Order No. 5019 passed on 22nd of September 1892 prohibiting the sale or exposure for sale of any cattle sheep or swine in or at Mr. Henry Johnson's sale-yard, Old Fair Ground, Kendal, from the 31st of December 1892 (which date was by Order No. 5051 postponed until the 31st of January 1893) was further postponed until the 28th of February 1893.—Order 5066. (24 Jan. 1893.)

The above three Orders, Nos. 5019, 5051, and 5066, relating to Mr. Henry Johnson's sale-yard were revoked on the 3rd of March.—Order 5076. (3rd March 1893.)

The Regulations of Local Authorities Order of 1893 provided that where a Local Authority after the 8th of March made a regulation prohibiting or regulating the movement of animals, or any specified kind of animals, into their district, or into any part of their district, or where the Local Authority after that date by regulation revoked or amended any such regulation as first described, and there was within the district of the Local Authority, or the part of their district to which the regulation applied a railway station of any railway company, the Local Authority were forthwith to send a copy of the regulation to such railway company, and were also forthwith to send a copy of the regulation to the Secretary, Railway Clearing House, 123, Seymour Street, Euston Square, London, N.W.—Order 5074. (28 Feb. 1893.)

On the representation of the Local Authority for Cornwall that parasitic mange existed amongst horses in their district, the Cornwall (Parasitic Mange) Order of 1893, extending to the county of Cornwall and the boroughs of Penzance and Truro only, was passed on the 5th of June. The Order, which came into force on the 10th of June, declared horses, asses, and mules to be animals, and parasitic mange of horses,

asses, and mules to be a disease for the purposes of certain sections of the Act of 1878. Legislation in 1893.

Under the provisions of this Order every person having in his possession or under his charge a horse, ass, or mule affected with parasitic mange, or suspected of being so affected, is bound to give notice to a police constable of the police force for the police area in which the horse, ass, or mule, so affected or suspected is. The constable must forthwith give notice to the Inspector of the Local Authority who must forthwith report the same to the Local Authority.

A person having in his possession or under his charge a horse, ass, or mule affected with parasitic mange, must treat that horse, ass, or mule, or cause it to be treated, with some dressing or other remedy for parasitic mange.

The Local Authority may, for the purpose of preventing the spreading of parasitic mange, make regulations for the following purposes, or any of them :—

(*a.*) For providing for the cleansing and disinfection of places used by, and of utensils, mangers, feeding-troughs, pens, hurdles, harness, or other things used for or about, any horse, ass, or mule affected with or suspected of parasitic mange :

(*b.*) For prescribing the mode in which such cleansing and disinfection are to be effected :

(*c.*) For providing that such places, utensils, mangers, feeding-troughs, pens, hurdles, harness, or other things shall be cleansed and disinfected at the expense of the Local Authority, or of the owner, lessee, or occupier thereof.

If any person fails to cleanse and disinfect as above, the Local Authority may cause such cleansing and disinfection to be done, and may recover the expenses from such person.—Order 5104. (5 June 1893.)

A similar Order to the above called the Warwickshire (Parasitic Mange) Order of 1893 extending only to the county of Warwick (including the borough of Warwick and also including the several parishes of Alderminster, Oldberrow, Shipston-on-Stour, Tidmington, Tredington, and Yardley in the county of Worcester, which borough and parishes were transferred by agreement to the district of the Local Authority of the county of Warwick), and to the boroughs of Coventry and Leamington, was passed on the 26th of July, and took effect from the 31st of that month.—Order 5117. (26 July 1893.)

Another Order similar to the above called the Borough of Hanley (Parasitic Mange) Order of 1893, and which extended to the borough of Hanley only, was passed on the 9th of August and took effect from the 14th of that month.—Order 5125. (9 Aug. 1893.)

Owing to the unsatisfactory condition of the following sale-yards, market, and auction mart, Orders were passed prohibiting the sale or exposure for sale of any cattle sheep or swine in or at :

The sale-yard known as Mrs. Simpson's sale-yard situate near the Market Weighton Station of the North-Eastern Railway at Market Weighton ; and the sale-yard known as English's sale-yard situate near the Pocklington Station of the North-Eastern Railway at Pocklington, both in the East Riding of Yorkshire, from the 30th of September.—Order 5111. (29 June 1893.) English's sale-yard at Pocklington was from the 9th of October specially excepted from the operation of the last-mentioned Order. —Order 5133. (9 Oct. 1893.)

Messrs. Harding and Low's sale-yard at Hatfield, Herts from the 3rd of October.—Order 5112. (3 July 1893.)

Legislation in 1893.

Messrs. George Durrant and Son's sale-yard at Harleston, Norfolk from the 3rd of October.—Order 5113. (3 July 1893.) The operation of this Order was postponed until the 3rd of November by Order 5132 (3 Oct. 1893), and was further postponed until the 31st of December by Order 5135 (28 Oct. 1893).

The Borough Cattle Market in the borough of Guildford from the 3rd of October.—Order 5114. (3 July 1893.) The operation of this Order was postponed until the 3rd of January 1894 by Order 5128 (2 Sept. 1893), and was further postponed until the 3rd of July 1894 by Order 5146 (16 Dec. 1893).

The auction mart belonging to the Elgin Market Green Auction Mart Company in the burgh of Elgin from the 3rd of October. —Order 5115. (3 July 1893.) This Order was revoked on the 7th of September.—Order 5129. (7 Sept. 1893.)

The Cattle Market at Petersfield, Hants from the 31st of March 1894.—Order 5143. (1 Dec. 1893.)

Foreign.

Foot-and-mouth disease having been reported from South Africa an Order intituled the Animals (Amendment) Order of 1893 prohibited, from the 13th of May, the landing in Great Britain of animals brought from Natal, Zululand, and the Portuguese State of East Africa.—Order 5089. (11 Apr., 1893.)

The Canadian Cattle (Slaughter and Examination) Order of 1893 provided that from the 30th of April the lungs of all Canadian cattle were to be examined by an Inspector of the Board before being removed from the foreign animals wharf, and with this view it was provided that the cattle were only to be landed at certain foreign animals wharves specified in the Order at the ports of Bristol, Glasgow, Liverpool, and London. When landed the animals were to be marked, and were to be slaughtered in slaughter-houses to be specially appropriated for the purpose, a notice being affixed to that effect at or near the entrances thereof.—Order 5092. (17 Apr. 1893.)

By a subsequent Order called the Canadian Cattle (Slaughter and Examination) Order of 1893 (Amendment), the port of Newcastle-upon-Tyne was added to the list of ports in the last-mentioned Order where Canadian cattle might be landed.—Order 5103. (2 June 1893.)

The last two mentioned Orders—Nos. 5092 and 5103—specially dealing with Canadian cattle were revoked from the 8th of July.—Order 5116. (6 July 1893.)

On the 27th of July two Orders were passed, and came into operation on the 21st of August, one called the Foreign Animals Revocation Order of 1893, No. 5119, which revoked all the general provisions relating to foreign animals in force, and the other called the Foreign Animals Order of 1893, No. 5120, which consolidated all the general regulations relating to foreign animals. The latter Order practically made no alteration in the then existing regulations regarding the importation, landing, treatment, and transit of foreign animals and things.—Orders 5119 and 5120. (27 July 1893.)

By the Foreign Animals (Amendment) Order of 1893 Norway (except the province of Finmark) was withdrawn from the list of *Prohibited Countries* and was added to the list of *Free Countries*, the province of Finmark in Norway still remaining in the list of *Prohibited Countries*.—Order 5130. (26 Sept. 1893.)

The following special transhipment Order was passed, on the application of Messrs. Allan Brothers and Company, permitting a cargo of cattle expected to arrive at the port of London from Buenos Ayres in the

vessel Buenos Ayrean on or about the 17th of February to be transhipped in the river Thames from such vessel to another vessel provided that for purpose by the Local Authority for the city of London for conveyance to the Foreign Cattle Market at Deptford.—Order 5070. (17 Feb. 1893.)

The following Orders were passed in 1893 having reference to foreign animals wharves or quarantine stations or reshipment stations or landing-places for foreign animals at the following ports:—

Aberdeen.—In consequence of the operation of the Board's Order of the 4th of November 1892, No. 5040, which ordered that cattle brought from Her Majesty's Possessions in North America were only to be landed at a foreign animals wharf for slaughter, the Aberdeen Harbour Commissioners applied for permission to use during the continuance of that Order the landing-place for foreign animals not subject to slaughter or quarantine at Pocra jetty for the purposes of the ordinary trade of the port. Accordingly an Order was passed revoking Order No. 4600 approving of that landing-place, which in effect closed for the time being the port of Aberdeen for the landing of foreign animals.—Order 5064. (16 Jan. 1893.)

Glasgow.—By the provisions of the proposed Canadian Cattle (Slaughter and Examination) Order, Canadian cattle were only to be landed at certain specified wharves to be named in the Order. The Local Authority of Glasgow were desirous that the landing-place for foreign animals at Shieldhall should be defined as a foreign animals wharf and be included in that Order. This was done by revoking Order No. 3456 approving Shieldhall Wharf as a landing-place and by defining it as a foreign animals wharf and including it in the list of wharves where Canadian cattle might be landed.—Orders 5090 and 5091. (17 Apr. 1893.)

Grimsby.—An Order was passed on the 16th of March defining a temporary foreign animals quarantine station for the purpose of quarantining four performing pigs and one performing goat brought from Bucharest *viâ* Hamburg, and being part of Carl Hagenbeck's Zoological Show for the Chicago World's Fair.—Order 5081. (16 Mar. 1893.) This Order was revoked on the 29th of March.—Order 5086. (29 Mar. 1893.)

Harwich.—A temporary foreign animals quarantine station was defined at Parkeston Quay, for quarantining 2 antelopes, 2 zebus, 1 Cape buffalo, 1 Aden sheep, 1 Soudan sheep, 1 English sheep, and 2 common goats belonging to Mr. James Bostock, and forming part of Edmonds' Windsor Castle Menagerie, arriving from Antwerp.—Order 5069. (9 Feb. 1893.)—This Order was revoked on 25th March.—Order 5084. (25 Mar. 1893.)

Liverpool.—An application having been received for permission to land at Liverpool certain consignments of zebus to be brought from Bombay for exportation to Brazil, an Order was passed defining a re-shipment station at the Alexandra Dock.—Order 5068. (4 Feb. 1893.)

At the desire of the Mersey Docks and Harbour Board, Order No. 4033 approving of the landing-place for foreign animals not subject to slaughter or quarantine at the Canada and Huskisson Docks at Liverpool was revoked, that landing-place not being now required for the landing of foreign animals.—Order 5073. (22 Feb. 1893.)

The Mersey Docks and Harbour Board having decided, with the concurrence of the Board of Agriculture, to connect the two foreign foreign animals wharves at Wallasey and Woodside landing-stages at Birkenhead by means of a cattle run, so as to form one foreign animals wharf, and also to extend the limits of the wharf so as to provide

Legislation in 1893.

additional accommodation for foreign animals subject to slaughter, two Orders were passed, one revoking Orders No. 3998 defining Woodside foreign animals wharf, 4508 approving of the landing-place for foreign animals at the south side of the Alfred Dock, and 5006 defining Wallasey foreign animals wharf, and the other defining the Birkenhead foreign animals wharf.—Orders 5121 and 5122. (2 Aug. 1893.)

London.—A temporary foreign animals quarantine station was defined at the Tilbury Docks, for the purpose of quarantining 4 camels and 2 Spanish oxen brought from Gibraltar for exhibition at the spectacle of Constantinople at Olympia, South Kensington.—Order 5145. (11 Dec. 1893.) This Order was revoked on the 21st Dec. 1893.—Order 5149. (21 Dec. 1893.)

Newhaven.—An Order (5050) passed on the 17th of December 1892 defining a temporary foreign animals quarantine station for quarantining the zoological specimens of Wombwell and Bailey's menagerie from Dieppe was revoked.—Order 5065. (18 Jan. 1893.)

Newcastle-upon-Tyne.—The landing place for foreign animals not subject to slaughter or quarantine at Ouseburn not having been used for some time past, Order No. 3202 so far as it approved of that landing-place was revoked.—Order 5085. (28 Mar. 1893.)

On the application of the Corporation of Newcastle-upon-Tyne three Orders were passed on the 2nd of June; the first Order revoking Order No. 3202 so far as it approved of the landing-place for foreign animals not intended for slaughter or quarantine at St. Lawrence, the second Order defining St. Lawrence as a foreign animal wharf, and the third Order amending the Canadian Cattle (Slaughter and Examination) Order of 1893, No. 5092, by adding the St. Lawrence Wharf to the list of wharves named in that Order at which Canadian cattle might be landed.—Orders 5101, 5102, and 5103. (2 June 1893.)

On the application of the Corporation, the landing place for foreign animals not subject to slaughter or quarantine at Ouseburn was again approved.—Order 5109. (21 June 1893.)

Portsmouth.—On the application of the Town Council of Portsmouth Order No. 978 defining the foreign animals wharf at the Camber Dock was revoked.—Order 5078. (13 Mar. 1893.)

Southampton.—Application having been made by the Superintendent of the Southampton Docks, on behalf of the South-Western Railway Company, that the limits of landing-place No. 1 for foreign animals not subject to slaughter or quarantine might be extended, Order No. 3334 was revoked so far as it related to that landing-place, and the landing-place as extended was re-approved and re-defined.—Orders 5147 and 5148. (20 Dec. 1893.)

Weymouth.—On the 1st of March an Order was passed approving and defining a landing-place for foreign animals brought from the Channel Islands only. This port had hitherto been open for the landing of foreign animals from all free countries, but for years past only Channel Islands cattle had been landed, and the landing-place had not previously been formally approved by Order.—Order 5075. (1 Mar. 1893.)

The importation of Channel Islands cattle into Weymouth continuing to be very small, the Board did not consider that they were justified in continuing the expense of a salaried Inspector at that port, and there being difficulty in obtaining a suitable Inspector who could be paid by fees, notice was given to the Local Authority of the borough of Weymouth that the port would be closed for foreign animals at the end of the year, and on the 6th of December the Board passed an Order revoking Order 5075, which in effect closed the port from the 31st of that month.—Order 5144. (6 Dec. 1893.)

Importation Regulations under the Contagious Diseases (Animals) Acts, 1878 to 1893.

Legislation in 1893.

In England and Wales and Scotland on the 1st January 1894—

The landing of cattle, sheep, and goats, and all other ruminating animals, and swine brought from any of the following countries was prohibited except for the purposes of quarantine :—

Austria-Hungary, (including Bosnia and Herzegovina).	Natal.
Belgium.	Netherlands.
Denmark (excluding Iceland).	Ottoman Dominions.
France.	Portugal.
Germany.	Portuguese State of East Africa.
Gibraltar.	Roumania.
Greece.	Russia.
Italy.	Servia.
Malta.	Spain.
Montenegro.	Sweden.
Morocco.	Zululand.
	Province of Finmark in Norway.

Cattle, sheep, and goats, and all other ruminating animals, and swine brought from any of the following countries, were allowed to be landed without being subject to slaughter or to quarantine :—

Iceland.
New Zealand.
Norway (excluding the Province of Finmark).
The Channel Islands.

Sheep brought from the following country were allowed to be landed without being subject to slaughter or to quarantine :—

The United States of America.

Cattle and goats, and all other ruminating animals (except sheep), and swine brought from the following country were only allowed to be landed at a foreign animals wharf for slaughter except for the purposes of quarantine :—

The United States of America.

Sheep and goats, and all other ruminating animals (except cattle), and swine brought from the following country were allowed to be landed without being subject to slaughter or to quarantine :—

Her Majesty's Possessions in North America.

Cattle brought from the following country were only allowed to be landed at a foreign animals wharf for slaughter except for the purposes of quarantine :—

Her Majesty's Possessions in North America.

Cattle, sheep, and goats, and all other ruminating animals, and swine brought from any country other than those above-named (except Ireland and the Isle of Man) were only allowed to be landed at a foreign animals wharf for slaughter except for the purposes of quarantine.

The landing of cattle, sheep, and goats, and all other ruminating animals, and swine brought from the Isle of Man was subject to no restriction.

Legislation in 1893.

The following Table shows the places at the several ports in England and Wales and Scotland where foreign animals could be landed on the 1st of January 1894.

BARROW-IN-FURNESS -	Barrow-in-Furness has 1 Foreign Animals Wharf— (*a.*) *Ramsden Dock* (Order 551), but is not open for animals not for slaughter.
BRISTOL - - -	Bristol has 2 Foreign Animals Wharves— (*a.*) *Avonmouth Dock* (Order 4016), (*b.*) *Cumberland Tidal Basin* (Order 4050), and has 2 Landing-places for animals not for slaughter— (1.) Avonmouth Dock (Order 3309), (2.) Bristol Docks (Order 3259).
CARDIFF - - -	Cardiff has 1 Foreign Animals Wharf— (*a.*) *Roath Basin* (Order 546), but is not open for animals not for slaughter.
DUNDEE - -	Dundee has not a Foreign Animals Wharf, but has 1 Landing-place for animals not for slaughter— (1.) North Bank of River Tay (Order 4564).
FALMOUTH - -	Falmouth has 1 Foreign Animals Wharf— (*a.*) *Penryn Wharf* (Order 1676), but is not open for animals not for slaughter.
GLASGOW - -	Glasgow has 2 Foreign Animals Wharves— (*a.*) *Yorkhill Wharf, Pointhouse* (Order 3675), (*b.*) *Shieldhall* (Order 5091), but is not open for animals not for slaughter.
GRANTON - - - -	Granton has not a Foreign Animals Wharf, but has 1 Landing-place for animals not for slaughter— (1.) North side of West Harbour (Order 3225).
GRIMSBY - - -	Grimsby has 1 Foreign Animals Wharf— (*a.*) *The 70 feet Lock of the Royal Dock* (Order 4556), but is not open for animals not for slaughter.
HARWICH - - -	Harwich has not a Foreign Animals Wharf, but has 1 Landing-place for animals not for slaughter— (1.) Parkeston Quay (Order 3162).
HULL - - - - -	Hull has 1 Foreign Animals Wharf— (*a.*) *Citadel Estate* (Order 3952), and has 1 Landing-place for animals not for slaughter— (1.) South Quay of Albert Dock (Order 3966).

LEITH - - - -	Leith has not a Foreign Animals Wharf, but has 1 Landing-place for animals not for slaughter— (1.) North side of Albert Dock Basin (Order 4160).
LIVERPOOL - - -	Liverpool has 1 Foreign Animals Wharf— (*a.*) *Birkenhead* (Order 5122), and has 1 Landing-place for animals not for slaughter— (1.) Shed No. 4 and Block C Warehouses on the south side of the Wallasey Dock, Birkenhead (Order 4547).
LONDON - - - -	London has 1 Foreign Animals Wharf— (*a.*) *Foreign Cattle Market, Deptford* (Order 2910), and has 1 Landing-place for animals not for slaughter— (1.) Thames Haven (Order 3351).
NEWCASTLE-UPON-TYNE	Newcastle-upon-Tyne has 1 Foreign Animals Wharf— (*a.*) *St. Lawrence* (Order 5102), and has 1 Landing-place for animals not for slaughter— (1.) Ouseburn (Order 5109).
PLYMOUTH - - -	Plymouth has 2 Foreign Animals Wharves— (*a.*) *Royal William Victualling Yard* (Order 502) *for Naval purposes only*, (*b.*) *Millbay Docks, Stonehouse* (Order 964), and has 1 Landing-place for animals not for slaughter— (1.) Sutton Pool (Order 3709).
PORTSMOUTH - -	Portsmouth has 1 Foreign Animals Wharf— (*a.*) *Royal Clarence Victualling Yard* (Order 3489) *for Naval purposes only*, but is not open for animals not for slaughter.

Legislation in 1893.

II.—LOCAL ORDERS RELATING TO FOOT-AND-MOUTH DISEASE.

County of London.

The Prohibition of Movement from London Order of 1893 passed on the 2nd of January prohibited the movement of cattle sheep goats and swine out of the following district, namely, —the county of London and the city of London. The movement of animals by railway through the above district without untrucking was excepted from the operation of the Order.—Order 5053. (2 Jan. 1893.)

Special Orders permitting movement of certain specified animals out of the above district were passed as follows, —Orders 5055 (4 Jan. 1893), 5056 (5 Jan. 1893), 5057 (10 Jan. 1893), 5058 (10 Jan. 1893), 5059 (10 Jan. 1893), 5060 (11 Jan. 1893), and 5061 (13 Jan. 1893.)

On the 2nd of January a shed and yard at the back of No. 2, Roman Road, Barnsbury, in the occupation of Henry Edwards was declared to be a foot-and-mouth disease infected place.—Order 5054 (2 Jan. 1893.)

An Order passed on the 14th of January revoked from the 15th of that month, the Prohibition of Movement from London Order of 1893 (No. 5053).—Order 5062 (14 Jan. 1893.)

An Order passed on the 16th of January removed from that date the last of the restrictions in force in the county of London by revoking Order No. 5054 declaring a foot-and-mouth disease infected place at Roman Road, Barnsbury.—Order 5063 (16 Jan. 1893.)

Sussex (Eastern Division).

The East Sussex Prohibition of Movement Order of 1893 passed on the 20th of February prohibited the movement of cattle sheep goats and swine out of the following district, namely,—the petty sessional divisions of Battle, Hastings, and Rye (including the municipal borough of Rye and the town of Winchelsea) in the Eastern Division of the county of Sussex, and also comprising the borough of Hastings. The movement of animals by railway through the above district without untrucking was excepted from the operation of the Order.—Order 5071. (20 Feb. 1893.)

The East Sussex (Markets and Fairs) Order of 1893 prohibited from the 21st of February the holding of public and private sales of cattle sheep and swine in the above district.—Order 5072. (20 Feb. 1893.)

By an Order called the East Sussex Prohibition of Movement Order of 1893, Amendment the district described in Order No. 5071 was from the 18th of March contracted or altered so as only to include the following district, namely,—the parishes of Fairlight, Ore (extra-municipal), and Guestling, and so much of the parish of Pett as is outside the town of Winchelsea.—Order 5082. (16 Mar. 1893.)

And by another Order called the East Sussex (Markets and Fairs) Order of 1893, Amendment, the district described in Order No. 5072 was also from the 18th of March contracted or altered so as only to include the following district, namely,—the parishes of Fairlight, Ore (extra-municipal), and Guestling, and so much of the parish of Pett as is outside the town of Winchelsea.—Order 5083. (16 Mar. 1893.)

An Order passed on the 30th of March removed from the 31st of that month all the restrictions then in force in the Eastern Division of Sussex by revoking Orders Nos. 5071, 5072, 5082 and 5083.—Order 5087. (30 Mar. 1893.)

On 1st January 1894 there was no *Foot-and-Mouth Disease Infected Zone or Area* in Great Britain. Legislation in 1893.

On 1st January 1894 there was no place declared to be a *Place Infected with Foot-and Mouth Disease* by Order of the Board of Agriculture in Great Britain.

III.—LOCAL ORDERS RELATING TO SWINE-FEVER INFECTED AREAS AND PLACES.

§ By Orders which came into operation on the 1st October, 1886, Anthrax and Rabies were declared to be contagious diseases for the purposes of the Contagious Diseases (Animals) Acts. The Year 1887 is the first complete year for which there is any official record of the results of either of these Diseases.

¶ Prior to the Year 1893, Horses, Asses, and Mules were not included in the definition of the word "Animals" in the Orders relating to Anthrax.

(Continued on the next page.)

* There were 53 Saturdays in each of the Years 1870, 1876, 1881, 1887, and 1892, and the figures given for those Years (except in the case of Sheep-Scab) include the results for 53 Weeks.

† By an Order which came into operation on the 3rd July 1873, Farcy was declared to be a contagious disease for the purposes of the Contagious Diseases (Animals) Acts. The Year 1874 is the first complete year for which there is any official record of the results of the Disease.

‡ By an Order which came into operation on the 24th December 1878, Swine-Fever (or Typhoid Fever of Swine) was declared to be a contagious disease for the purposes of the Contagious Diseases (Animals) Acts. The Year 1879 is the first complete year for which there is any official record of the results of the Disease.

CONTAGIOUS or INFECTIOUS DISEASE existed, in each Year, &c.—(*Continued.*)

§ See Note § on page 91.

‖ By an Order which came into operation on the 17th October 1892, Glanders was declared—for the purposes of the Contagious Diseases (Animals) Acts—to include that form of glanders which is commonly known as farcy.

¶ On the 1st November 1893, the Board of Agriculture assumed the powers vested in them under the Contagious Diseases (Animals) Act, 1893, with respect to Swine-Fever. For the number of animals which were Killed and which Died in the Year 1893, see Table IV.

Tables XXIII. to XXXIV.

INTERNATIONAL

TRADE IN ANIMALS.

Note.—The following Tables are compiled from the Official Trade Statistics of the several Continental Countries named. They are prepared with the view of showing what movements of live animals are recorded as taking place between the States in question. The figures represent, so far as the records permit,—

1.—The Imports of Cattle, Sheep, and Swine into each Country, distinguishing the Countries whence these imports are stated to have come.

2.—The Exports of Cattle, Sheep, and Swine from each of the Countries named, showing the Countries to which, according to these returns, the exports were sent.

The varying forms and methods of the Trade Accounts of different Countries preclude the numbers of imported and exported animals being in agreement in all cases, and the data must be accepted as approximate only.

REPORT

OF THE

IRISH LAND COMMISSIONERS

FOR

THE PERIOD FROM THE 1st OF APRIL, 1893, TO THE 31st OF MARCH, 1894.

TO HIS EXCELLENCY ROBERT OFFLEY ASHBURTON BARON HOUGHTON,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

WE, the Irish Land Commissioners, beg to submit to your Excellency this Report of our proceedings during the period from the 1st April, 1893, to the 31st March, 1894.

APPENDIX TABLE NO.

JUDICIAL RENTS.

The Staff for the working of the Sub-Commissions consisted of four Legal and twenty-four Lay Assistant Commissioners from the 1st April, 1893, to the 1st January, 1894, and from that date to the 31st March, 1894, three Sub-Commissions were at work; the members of the fourth Sub-Commission have since been employed in valuing for us in cases where Notices of Appeal or for re-hearing have been served, for purchase, and in other duties.

Sub-Commissions.

The number of fair-rent notices disposed of by the Sub-Commissions during the period stated, was 5,268. Of this number, 4,129 were cases of applications by yearly tenants, and 1,139 were applications by leaseholders.

Fair rent applications disposed of. I.

The entire number of fair-rent notices disposed of, from the date of our last Report up to the 31st March, 1894, was as follows:—

By the Commissioners as a Court of first instance, principally on consent,	623	I., XI.
By the Sub-Commissions,	5,268	
By the Civil Bill Courts,	1,005	
Total,	6,896	

The entire number disposed of by both Land Commission and Civil Bill Courts from the date of the passing of the Land Law (Ireland) Act, 1881, to the 31st March, 1894, was 232,951. II., XII.

Number of cases undisposed of.

The number of Fair Rent Notices awaiting hearing by the Land Commission on the 31st March, 1893, was 6,102, and our Records showed an arrear of undisposed of cases in the Civil Bill Courts of 5,378.

The numbers similarly awaiting hearing on the 31st March, 1894, were:— II., XII.

By the Land Commission,	2,916
By the Civil Bill Courts, apparent arrear,	5,129

Of the 2,916 applications so awaiting hearing by the Land Commission, 2,705 were received since the 31st March, 1893, and of the cases pending in the Civil Bill Court, 1,091 applications were received during the same period. I., XI.

As we entertained considerable doubt that there were as many as 5,129 applications to fix judicial rents awaiting hearing in the Civil Bill Courts, and believed that the apparent arrear might be accounted for by the fact that the Clerks of the Peace in many instances had omitted to transmit to this Department (as it is their duty to do) certified copies of the Orders made by their respective County Court Judges in cases which have come before them, the attention of the Lord Chancellor was recently called to the matter.

APPENDIX TABLE No.

C. From a Return which has been received from the Lord Chancellor a few days ago, and which will be found in the Appendix, it would appear that there are no more than 214 applications, and not 5,129 as our Books show, awaiting hearing in the Civil Bill Courts. But, until further particulars of the cases disposed of have been received, we are unable to reconcile our Books with the Return now given, or to show how the remainder of these applications, amounting to 4,915 in number, have been disposed of by the Civil Bill Courts.

Rents fixed on Valuers' reports, Agreements, Judicial Leases, and Fixed Tenancies.

I., V., XVII., XIX., XLI., XLV. Judicial Rents have been settled during the year by us on the report of Court Valuers in 39 cases, and originating declarations and agreements have been lodged under the provisions of the 8th Section of the Land Law (Ireland) Act, 1881, in 1,463 cases, of which 1,414 were lodged in the Land Commission, and 49 were lodged with the Clerks of the Peace of the Civil Bill Courts; 5 judicial leases were executed, and 6 fixed tenancies were created, making altogether 1,513 cases which were settled during the period under review without litigation.

XVIII., XX. The total number of originating declarations and agreements to fix fair rents lodged, since the passing of the Act of 1881, up to the 31st March, 1894, was 121,902.

II. The total number of rents fixed by us on the reports of Court Valuers during the same period was 1,391.

XLII., XLIV., XLVI. The total number of judicial leases executed has been 133, and the number of fixed tenancies sanctioned was 36.

Arbitration not availed of.

XXI., XXVII., XXII., XXVI. Since the Act of 1881 came into operation in 37 cases only have the powers conferred by the 40th Section of the Act been availed of to nominate arbitrators to fix the amount of the Judicial Rents by arbitration. During the last five years the parties have not moved in a single case to have Judicial Rents fixed by this method.

Leaseholders.

I., XI. During the year the number of leaseholders who applied under the provisions of the Land Law (Ireland) Act, 1887, to the Court of the Land Commission, was 263, and to the Civil Bill Courts 99; and 99 applications were also made to the latter Court during the same period to fix Judicial Rents in cases where ejectments were pending, pursuant to the provisions of sec. 6 of the Act referred to.

Period extended.

By the 56 & 57 Vic., Cap. 59, the period during which the Civil Bill Courts and the Land Commission were authorized to receive applications from leaseholders, has been extended to the 31st December, 1894.

II., XII. The total number of leaseholders who have applied under the provisions of the Act referred to, up to the 31st March, 1894, is 32,794, and of these applications 31,642 have been disposed of.

XLIX. Total effect of Fair Rent sections of Acts of 1881 and 1887, and Redemption of Rent Act, 1891.

The entire number of rents fixed by all the methods enumerated from the passing of the Land Law Acts of 1881 and 1887 to the 31st March, 1894, was 294,654, not including judicial leases and fixed tenancies. The total rental dealt with was £6,140,602, and the aggregate judicial rent fixed in respect thereof was £4,861,127, amounting to a reduction of 20·8 per cent. over the entire country. The number of cases struck out, withdrawn, or dismissed, was 60,236.*

II., XII. The total number of cases disposed of during the period from August, 1881, to 31st March, 1894, was therefore 354,890.*

CI. In the Appendix will be found for each of the years from 22nd August, 1881, to 31st March, 1894, the number of Fair Rents fixed by the various methods therein enumerated, with the amounts of the former rental, and of the total Judicial Rents fixed, with per centage of reduction for each year.

APPEALS.

XXIX., XXXIII. Number of Appeals disposed of.

1,530 appeals from the Civil Bill Courts and re-hearings from the decisions of the Sub-Commissions were heard by us during the period stated at sittings held in Dublin or in the country. We held 25 sittings at principal towns throughout the country, and 14 sittings in Dublin, for the purpose of hearing such appeals. Sittings were also held in Dublin for the disposal of motions and other court business.

XXXIX., XXXIII. 981 appeals to us in judicial rent cases were withdrawn, making a total of 2,511 of such applications disposed of during the period under review.

XX., XXXIV., XXXVIII., XXX., XXXIV. Appeals.

The total number of such appeals disposed of since the passing of the Act in 1881 to the 31st March, 1894, was 41,160, which includes 14 appeals in cases under the Labourers Acts.

The number of appeals to us lodged or reinstated, excluding the 14 cases under the Labourers Acts, in the same period was 42,621.

The total number pending on the 31st March, 1893, excluding the 14 cases under the Labourers Acts, was 1,741, and on the 31st March, 1894, was 1,475.

* Until we receive information to show how the above-mentioned 4,915 applications to the Civil Bill Courts to fix Judicial Rents have been disposed of, the requisite alterations cannot be made in these figures

Since our last Report orders were sealed fixing rents under the Labourers Acts in 400 cases of applications from Boards of Guardians; 257 orders fixing rents were made by one of the Commissioners sitting in chamber in Dublin. The total number of such rents fixed up to 31st March, 1894, was 3,053. Rents fixed under Labourers Acts. APPENDIX TABLE No. LIV. LV.

In the Appendix particulars are given by counties of the number of such applications received and disposed of, and the average rent payable in respect of these cottage allotments. LIV. LV.

One application to set aside a Lease or Grant under Section 2 of the Act of 1887 was disposed of during the period. LVI.

PURCHASE OF LAND ACTS.

Proceedings Under Acts of 1885 and 1888.

From the passing of the Act of 1885 up to the 13th day of November, 1891, since which date no further applications have been received, the total number of Loans applied for was 29,335, for £11,378,932. Of these 3,354 applications for £1,320,460 have been rejected for insufficiency of security or other reasons; the amount so rejected during the period between the 1st April, 1893 and 31st March, 1894, being £95,799. During the same period 398 applications for £170,097 were provisionally sanctioned, making the total amount sanctioned from the passing of the Act in 1885 up to the 31st March, 1894, £9,907,480, after deducting cases provisionally sanctioned in former years, but rescinded since 31st March, 1893. There were thus 479 applications, representing £150,992, which on 1st April, 1894, had neither been sanctioned nor refused. Of these applications for £58,472 were in excess of the ten millions granted and which can only be met out of such residue as may be created by the refusal of prior applications which have not been finally ruled, or by the dismissal of applications in which the parties fail to comply with our requirements; 49 were applications for £10,401 in respect of one estate pending in the Land Judge's Court which have not yet been disposed of in that Court, and there remained applications for £82,119 in which our requisitions have not yet been complied with.

Loans applied for. Applications refused. Loans provisionally sanctioned. LXX. LXXI. Applications neither sanctioned nor refused. LXIX.

Of the total amount, £9,907,480, so provisionally sanctioned, we issued 23,815 loans to the amount of £9,529,978 in respect of sales for £9,697,800, the amount issued during the period just closed being £729,217 for 1,731 loans. The proceedings towards the issue of a sum of £377,502 (being the difference between the amount sanctioned and the amount paid) are now in various stages of progress.

Loans issued. LXXI. LXXIII. LXXII.

The total amount issued includes £448,219 advanced to 1,692 tenants upon 76 estates purchased by us in the Land Judge's Court. Purchase of Estates. LXXV.

Of the 23,815 Loans issued since 1885— LXXIII.

23,815	Total for period to 31st March, 1894.								£9,529,978

Of the 23,815 Loans issued, amounting to £9,529,978, 12,261, to the amount of £3,576,313, were for Ulster, 4,793, amount £3,033,785, were for Munster, 3,996, amount £2,290,501, were for Leinster, and 2,765, amount £629,379, were for Connaught. Loans issued.

In 379 of these cases the purchase money in excess of the advances was provided by cash payments amounting to £129,750, and by mortgages to the amount of £38,072. In 142 cases the tenants have lodged the necessary Guarantee Deposits, the amount so lodged being £32,568. Part payment of purchase money.

The total amount of Guarantee Deposits lodged or retained was £1,867,184. Of this amount £2,786 has been repaid to the parties entitled thereto, and £2,406 18*s.* 6*d.* was applied in discharge of arrears of instalments declared pursuant to the provisions of the Act of 1885 to be "irrecoverable," leaving a balance of £1,861,991 1*s.* 6*d.* on the 31st March, 1894. Of this amount, £232,719 16*s.* 3*d.* has been invested, on the application of the parties interested, in securities, as provided by the 10th section of the Act of 1887, and there remained at that date the sum of £1,629,271 4*s.* 9*d.* of which £1,561,753 15*s.* 3*d.* was in the hands of the National Debt Commissioners, and the balance is in cash in our hands. Guarantee Deposits.

Proceedings Under the Purchase of Land Act, 1891.

APPENDIX TABLE NO. LXXVI. Applications received.

During the year we have received 2,368 applications for advances from 225 estates for £718,950. These applications were received from the four provinces as follows :—

		£
Ulster,	1,094 for	319,186
Leinster,	466 for	150,497
Munster,	467 for	192,753
Connaught,	341 for	56,514

Applications refused.

Of these we have refused 248 applications for £83,990 for insufficiency of security and other reasons.

LXXVIII. LXXX. Loans sanctioned and issued

We have provisionally sanctioned during the period under review, 1,878 applications for £654,280, and 1,615 Loans have been issued for £623,969.

LXXXII. LXXXIV. LXXXVI. Applications for purchase of estates.

We have also received during the year undertakings from 536 Tenants for advances amounting to £157,178 for the purchase of their holdings, portion of Estates in the Court of the Land Judge. We sanctioned 395 loans in such cases for £84,346, and issued 405 for £90,565. 78 undertakings for £25,639 were rejected either by us or our offer was refused by the Land Judge.

Since the passing of the Act of 1891 to the 31st March, 1894, we have received 6,246 applications for £2,013,221, of these 864 for £250,169 have been refused.

LXXIX. LXXXV. LXXXVII. XCIV. Total loans sanctioned and issued.

The total amount which has been provisionally sanctioned is £1,223,868 in respect of 3,410 applications, as well as 560 applications for loans for £117,253 in respect of sales in the Land Judge's Court. We have issued altogether during the same period 2,711 loans for £932,674, which does not include 15 loans for £17,811 issued under the Redemption of Rent Act.

Pending applications.

The proceedings towards the issue of £408,447, the difference between the amounts sanctioned and issued, are now in various stages of progress.

Returns required by statute.

LXXX. LXXXVI.

The periodical return required by the 33rd Section of the Act will shortly be sent forward by us for presentation to Parliament, setting forth in the prescribed form complete particulars of every case in which an advance has been made during the year ended 31st March, 1894, including the date of the advances, the names of vendor and purchaser, the situation, size, rateable value, and rent of each holding, the amount of the purchase-money, advance, and guarantee deposit.

Summary of particulars.

The Advances made by us between 1st April, 1893, and 31st March, 1894, in each Province and for the whole of Ireland, are as follows :—

Province.	Area.	Rent.	Purchase Money.	Advance.
	A. R. P.	£ s. d.	£	£
Ulster,	22,121 2 33	15,279 7 4	297,394	290,072
Leinster,	14,349 0 24	8,757 14 8	152,972	146,819
Munster,	20,475 0 13	15,521 5 10	224,048	215,738
Connaught,	8,233 1 30	3,963 18 0	62,118	61,905
Whole of Ireland,	65,179 1 10	43,522 5 10	736,532	714,534

Allocation of the sum available for purchase in proportion to the value LXXXVIII. of holdings, sec. 11, Purchase Act, 1891.

In the Return which will be found in the Appendix, we state the total amount of the advances for which applications were received by us during the period under review (and which appeared to us likely to be sanctioned) in respect of each county in Ireland for the purchase of holdings, the rental of which respectively exceeded, and did not exceed, a rental of £50.

189 applications were received under the 13th section of the Act, 1891, for £104,427 on 18 estates. Of these, 155 applications, for £84,539, were provisionally sanctioned, but for reduced advances, amounting to £80,404. In nine cases the applications for £4,015 were refused for insufficient security and other reasons. Fifteen applications have not yet been finally ruled upon.

Advances for £70,412 have been issued in respect of 138 applications.

Purchase by tenants formerly in possession of holdings. APPENDIX TABLE No.

Redemption of Rent Act.

776 applications under the Redemption of Rent Act have been received since the passing of the Act up to the 31st March, 1894, of which 155 have been received during the year. In 139 cases the landlord consented in the prescribed manner to the redemption of the rent. The total amount of the prices fixed by us in 83 cases, embracing 44 estates in which we made orders for redemption, was £84,663, in respect of a total rental of the holdings, as stated in the applications, of £5,717 17*s.* 2*d.*, and the total advances sanctioned in respect of the prices so fixed was £74,674. In 22 cases the applications for redemption were refused, and 34 cases have not been adjudicated upon.

Proceedings in purchase cases under Redemption of Rent Act. XC. LXXXIX. XCII.

Out of the total number of applications received by us under this Act, the landlords did not consent to the redemption in 624 cases, and consequently the lessees or grantees were, as the Statute and Rules provide, deemed to have made applications as if they were leaseholders under the Act of 1887 to have a judicial rent fixed; and in 13 cases where applications have been received the time to consent has not yet expired.

In 307 of such cases judicial rents have been fixed. The former rental was £24,969, the judicial rental amounts to £18,747, showing a reduction of 25 per cent. Ninety-two applications have been dismissed or struck out, and 32 have been withdrawn; thus 193 cases await hearing.

Proceedings in fair rent cases under Redemption of Rent Act. XC.

Number of judicial rents fixed. X.

Ascertainment of Annual Value.

Since the date of the passing of the Purchase of Land Act, 1891, 1,033 applications were received to fix the annual value, and in the majority of these applications the annual value, as set forth in the purchase agreement, was reduced in several instances to an amount which fixed the annuity at four per cent. on the advance, below which the annuity cannot be reduced.

Annual value.

On the 1st of November, 1893, being the last gale day preceding the date of this Report, 904 annuities, created under the Purchase of Land Act, 1891, and amounting for the half year to £7,939 13*s.* 10*d.*, were on our books for collection. 439 of these annuities for £3,124 included Purchasers' Insurance Money to the amount of £356 for the half year. The remainder of the annuities payable in November, in number 465, including 52 cases in which the advance did not exceed three-fourths of the price, were for amounts not exceeding four per cent. on the amount advanced.

Appended will be found a Table giving in counties the total number of those cases in which the annuities include Purchasers' Insurance Money with the amount of the Insurance Money payable in each county.

Purchasers' Insurances.

CIII.

Appeals in Land Purchase Cases.

During the period under review 26 appeals against the decision of one Commissioner acting alone in carrying the Purchase Acts into effect were heard by the Judicial Commissioner and two other Commissioners, pursuant to the 29th section of the Act of 1891, and 8 appeals in cases arising under the Redemption of Rent Act have similarly been disposed of.

Purchase appeals.

During the same period, 10 appeals, where the appeal had reference to a question of law only, were heard by the Judicial Commissioner sitting alone, and 3 appeals were similarly heard by one of the Judges of the High Court, acting as a Judicial Commissioner for the purpose of the Land Purchase Acts.

Appeals on questions of law only.

Payment of Purchasers' Instalments.

The receipt of instalments in repayments of advances under the Purchase of Land Acts continues to be satisfactory.

On the 1st November last, the total amount payable in respect of advances under the Act of 1885 for the half-year's interest and instalments which had then become due, including arrears amounting to £7,352 remaining unpaid on that date, was £190,542, payable by 22,264 payers. Of this amount £181,280 had been paid on 31st March,

Payment of Instalments Act, 1885 and 1891.

APPENDIX TABLE No.

1894, by 21,526 payers, leaving £9,261 16*s.* 9*d.* due by 738 purchasers. Of this sum £5,029 due by 646 persons is in respect of the half-year's instalment which accrued on the 1st November, 1893, and is being rapidly reduced.

With regard to the payment of the instalments created under the Purchase of Land Act, 1891, the amount receivable on the 1st November last, from 904 payers was £7,939 13*s.* 10*d.*, of this £7,854 7*s.* 5*d.* has been already received, leaving £85 6*s.* 5*d.* to be recovered from 6 payers.

Cases where default has arisen.

The holdings of forty-three purchasers who made default in payment of their instalments were advertised for sale during the period covered by this Report.

In twenty-three of these cases the sales were withdrawn, the arrears having been paid; in fourteen cases the holdings were sold to ordinary purchasers; in four cases where there was no competition the holding was purchased by the former landlord; and in two cases, in which there were no bidders, the holdings are in the hands of the Land Commission, pending re-sale.

General statement as to proceedings under Purchase Acts during period under review.

In the foregoing paragraphs we have given separately the general results of the proceedings under the Land Purchase Acts of 1885 and 1891, but taking the proceedings under both Acts in the aggregate during the period between the 31st March, 1893, and 31st March, 1894, 575 applications for £205,428 were rejected, 2,671 applications for £908,723 were provisionally sanctioned, and 3,751 loans, amounting to £1,443,751, were issued. 5,407 Vesting Orders were executed. Rulings have been issued upon all abstracts of title lodged up to the 31st March last, save in two cases where the titles were lodged in that month.

Agricultural Department.

Collection of Agricultural prices.

The Collection and publication of the prevailing prices of Agricultural Produce has been continued.

Diagrams showing the fluctuations of prices of beef, mutton, store stock, and agricultural produce in Ireland for the period from the years 1887, to the 31st of March, 1894, inclusive, with the Quarterly Report of Prices of Irish Farm Produce, will be found in the Appendix.

Experiments in the prevention of potato disease.

Further experiments in the application of dressings of a mixture of sulphates of copper and lime to the potato plant for the prevention of potato disease, were carried out during the summer and autumn of 1893, in selected districts on the south and south-west coast of Cork; the experiments gave satisfactory results. It is proposed to submit a further report upon this subject to your Excellency at an early date.

Markets and Fairs (Weighing of Cattle) Act, 1891.

The authorities of certain of the principal markets and fairs have been called upon to provide increased accommodation for weighing of cattle, pursuant to the provisions of the Markets and Fairs (Weighing of Cattle) Acts, 1887 and 1891.

The Commissioners have issued exemption orders to sixty-five market authorities where it has been shown to them that only small quantities of stock are exposed for sale.

Congested Districts Board.

At the request of the Congested Districts Board, the Agricultural Department has continued to carry out the working of the schemes approved by the Board for improvement in the breeding of cattle, horses, asses, swine, sheep, and poultry; and also for the improvement of agriculture and forestry; the department has also at the request of the Board purchased small quantities of seeds and manures which were afterwards sold and distributed to residents in Congested Districts. As the work carried out by the Land Commission for the Congested Districts Board is referred to *in extenso* on pages from 4 to 14 in the Report issued on the 30th December, 1893, by that Board for the year 1893, it is not necessary to recapitulate the details of the operations carried out in this Report.

Financial.

Total amount of Loans issued.

The total amount of Loans issued in cash by the Land Commission since the passing of the Land Law (Ireland) Act, 1881, under the Land Purchase Acts (exclusive of the Arrears Act, 1882, and the Purchase of Land Act, 1891), and the Tramways and Public Companies Acts, up to the date of this Report, has been £9,792,303. The total amount of principal re-paid by the purchasing tenants has been £373,480, the interest paid by them has been £1,178,252.

cv. Statement as to advances.

The detailed statement in the Appendix includes advances made by us under the 59th Section of the Land Law Act of 1881, in payment of arrears of rent, the total

APPENDIX TABLE No.

amount advanced being £18,793, of which £18,074 has been repaid, and excludes advances made under the Purchase of Land Act, 1891, as the advances under that Act are made in Guaranteed Land Stock.

Pursuant to Section 17 of the Act of 1891, we transferred Guaranteed Land Stock to the amount of £48,789 9*s.* 7*d.* to the Church Temporalities account for the redemption moneys of tithe rent charges and head rents, the property of the late Established Church, ordered to be redeemed in various purchase transactions, and such stock has been taken over by the National Debt Commissioners from us at par value.

Documents issued from Record Department.

14,834 copies of documents were issued from the Office of the Keeper of Records, in addition to which 11,276 folios of other miscellaneous documents were issued, for which the amount received from the public, for scrivenery and other fees, amounted to £853 9*s.* 8*d.*

Local Registration of Title Act.

Registration of Tenant Purchasers' Titles.

In our last Report we called attention to the inconvenience which had arisen owing to the non-registration of the Titles in 2,591 cases, where the sales to the tenant purchasers had been completed after the 1st of January, 1892, in respect of which the Local Registration of Title Act provided that the Title should be registered "forthwith," and we pointed out that this state of things was to be regretted, as until the cases referred to had been dealt with, we understood that the registration of applications where the sales took place prior to 1st January, 1892, in which we were the applicants, could not be proceeded with. The registration in the 2,591 cases referred to has since been completed, and the Titles have also been registered in 5,407 sales where the Vesting Orders were executed during the year, but, as the Commissioners anticipated, the Registrar of Titles has been unable hitherto to deal adequately with the applications made by the Land Commission in those cases where the sales took place prior to the 1st January, 1892. Out of 1,240 applications lodged by us, in only 26 have rulings on the Title and directions for searches been issued, and in 15 of these cases the Land Certificates have been issued.

It is apparent that the labour which must arise in carrying through the registration of the Titles of these past sales must be very considerable, as up to the date of this Report 7,371 cases have been entered in our books, in which the Land Commission as applicants must undertake the preliminary investigation of Title which is requisite before filing the application.

During the year, in 185 cases where the parties had in person applied to the several local registration offices for registration, the purchasers on receiving the requisitions as to Title on their applications and the directions for Registry Searches, have applied to us stating their inability to proceed in person with their applications, and that they were not prepared to incur the expense of employing Solicitors to act for them. In 45 cases Solicitors employed for the purpose indicated, have requested the Commissioners to complete the registration, as their clients refused to pay the costs of discharging requisitions on the Titles or to incur the expense of Registry Searches.

We consider that some time must elapse before the benefits which the Act in question was designed to bring about, by simplifying the Title and form of transfer deeds to enable tenant purchasers to dispose of their holdings at comparatively trifling expense, will be fully recognized.

There is an apparent indisposition to depart from the old method of transferring by lengthy Deeds containing full recitals of the previous Title, and to subsequently registering the same in the Registry of Deeds Office. We have observed reluctance also in cases where the Titles have been registered to keep up the registration when the registered owner has died.

Temporalities of Late Established Church.

Total rental produced to year to 31st March, 1894.

The property of the late Established Church which was vested in the Land Commission by the 44 and 45 Vic., c. 71, produced during the year a total income of £715,692, of which £141,340 was for redemption of income and sales of property. The total amount of payments from the Church Fund made by us during the year ending 31st March, 1894, was £710,366, leaving a balance of £5,326.

Annual liabilities on Church Fund. higher than rental. XCVI.

The total annual rental receivable by us taken on the 1st April, 1894, amounts to £523,472 ; whereas the liabilities of the fund, with cost of administration taken on the same date, amounted to £577,082.

It will thus be observed that our present liabilities exceed our receivable rental by about £53,000. We have in the period under review, been able to meet our liabilities and reduce the capital debt, owing to the fact that in addition to the rental referred to,

APPENDIX TABLE No.

the sum of £141,340 was as stated received for redemptions and sales of property, and the amount of arrears due to the fund at the commencement of the financial year have been reduced by £51,300.

It should also be borne in mind that the Fund is now charged with annual payments amounting to £328,704 to the National Debt Commissioners for discharge of capital debts, all of which will under existing arrangements terminate within about seven years from the present.

XCVI. Statement as to revenue and expenditure.

In the Appendix will be found a statement of the particulars of the Revenue as it stands at present, and of the expenditure to be met.

By payments made since the property vested, the total liability, inclusive of charges imposed by the Legislature since 1881, has been reduced to £8,106,196, exclusive of the annuity for £20,000 for the Royal University, which is not a capital charge.

Decrease of total liability since 1881.

The original debt of £9,000,000 for the purposes of the Church Act, and due to the Commissioners for the reduction of National Debt, has been reduced to £1,991,696. At the date of our last report the amount was £2,329,513.

Purchase by tenants on Church estate.

Fifty-two tenants occupying holdings on the Church Property estate have availed themselves of the provisions of the 10th Section of the Land Purchase Act of 1891, which enabled us to make advances to them amounting to £17,288 in Guaranteed Land Stock of the purchase money required.

Investigation of tithe rentcharge and liabilities.

Progress has been made in the investigation of Tithe Rent-Charge and Tithe annuity liabilities, in 73 parishes containing 490,742 acres, and subject to £12,385. These charges, payable by 1,254 persons, have been investigated and mapped since the date of our last report.

In all, 1,201 parishes, containing 11,403,054 acres, and subject to £220,617 annual charge payable by 21,423 persons, have been investigated.

(Signed),

E. T. BEWLEY.
S. J. LYNCH.
FREDK. WRENCH.
GERALD FITZGERALD.
MURROUGH O'BRIEN.

JOHN H. FRANKS, Secretary,

30*th April*, 1894.

24, Upper Merrion-street, Dublin.

APPENDIX.

Fair Rent Returns.—Tables I. to XVI. inclusive.

Section 8, Sub-section 1.—Land Law (Ireland) Act, 1881.
Section 1.—Land Law (Ireland) Act, 1887.
Redemption of Rent (Ireland) Act, 1891.

I.—Table showing, according to Provinces and Counties, the Number of Originating Notices to fix Fair Rents lodged with the Irish Land Commission, the Number of such Notices transferred from the Civil Bill Courts to the Irish Land Commission, the Number of Rents fixed by Chief Commission, Sub-Commissions, and Valuers, and of Cases Dismissed, Struck out, and Withdrawn during the year ended the 31st March, 1894.

(*a*.) The Rents stated in this Return are the Rents payable by the Tenants previous to the sale, except in a few cases where the Tenants agreed to purchase subject to a Head Rent, Crown Rent, Tithe Rent, or Drainage Charge, or other outgoing previously payable by the Landlord, and in such cases the outgoing has been deducted from the Rent previously payable by the Tenant.

Note.—In 21 cases the Provisional Orders sanctioning advances made prior to 31 March, 1893, were rescinded during the year ended 31 March, 1894, and particulars of these cases have therefore been deducted from this Return.

Proceedings under Purchase of Land (Ireland) Act, 1885.—Tables LXVII. to LXXV. inclusive—*continued.*

LXXII.—Returns showing, according to Provinces and Counties, the Number of Loans issued, the Number of Estates, and the Total Acreage and Rental of the Holdings in respect of which the Loans have been issued, also the Total Purchase-money and the Amount of Loans obtained from Land Commission, and the Number of Years' purchase of Rent, during the Year ended 31st March, 1894.

Province and County.	No. of Loans.	No. of Estates.	Acreage in Statute Measure.	Rent. (a)	Purchase-money agreed upon.	Amount of Loans.	No. of years' purchase of Rent.

NINETEENTH ANNUAL REPORT

OF THE

PUBLIC WORKS LOAN BOARD, 1893-94.

(Presented pursuant to Act 38 & 39 Vict. c. 89.)

THE Public Works Loan Commissioners, pursuant to Section 5 of the Public Works Loans Act, 1875, make the following Report:—

I. The Public Works Loan Commissioners, during the financial year 1893–94, made 786 advances for sums amounting together to 1,582,783*l.*, as against 623 advances for 1,157,947*l.* in the previous year, showing an increase of 163 in the number of advances, and of 424,836*l.* in the amount advanced, as compared with 1892–93.

The following statement shows the various classes of loans in which during the last financial year there has been an increase or decrease in the amounts advanced as compared with the preceding year; and from this statement it will be seen that the greater part of the increase is due to loans under the headings of Sanitary Loans (England) and School Boards (England):

ADVANCES.

II. (*a.*) The sum of 46,400*l.*, advanced for providing dwellings for the working classes is made up as follows:—

£. 20,000 to the Improved Industrial Dwellings Company (Limited), being the loan mentioned in this Board's Report for 1891–92.

£. 19,700 to the East End Dwellings Company, Limited, being 5,850*l.* towards defraying the cost of erecting two blocks of dwellings known as

Charlwood Houses and Kellet Houses in Midhope-street, and Tankerton-street, South St. Pancras; £. 6,400 towards the cost of erecting two blocks of dwellings in Mansford street, Bethnal Green, and 7,450*l.* towards the cost of erecting dwellings in Tonbridge-street, South St. Pancras, the loans in each case being repayable in 20 years, with interest at 3⅛ per cent. per annum.

£. 2,000 to Mr. Abraham Davis, being further advances in respect of the loan of 8,000*l.* mentioned in previous Reports; also 3,000*l.* in respect of the same loan to Mr. Charles Pennack, to whom Mr. Davis's interest in such loan to the extent of 5,000*l.* has been transferred.

£. 1,700 to the Thingoe (West Suffolk) Rural Sanitary Authority for the purchase of land and erection thereon of dwellings in the parish of Ixworth, repayable in 30 years, with interest at 3¼ per cent. per annum, this being the first loan granted by this Board to a Rural Sanitary Authority under the provisions of Part III. of the Housing of the Working Classes Act, 1890.

(*b.*) The sum of 54,000*l.* advanced for the purposes of the Harbours and Passing Tolls, &c., Act, 1861, is made up as follows:—

£. 3,500 to the Corporation of Torquay (as the Harbour Authority), being the residue of the loan of 8,500*l.* mentioned in this Board's last Report.

£. 5,000 to the Newlyn Pier and Harbour Commissioners, being the residue of the loan of 10,000*l.* mentioned in previous Reports.

£. 8,500 to the Corporation of St. Ives (the Harbour Authority), being the loan mentioned in this Board's last Report.

£. 7,000 to the Warkworth Harbour Commissioners, being the first instalment of the loan of 12,000*l.* mentioned in this Board's last Report.

£. 5,000 to the Mevagissey Harbour Trustees, being the first instalment of a loan of 22,000*l.*, the particulars of which are mentioned in Paragraph XIV. of this Report.

£. 8,000 to the Helmsdale Harbour Trustees, being further advances in respect of the loan of 14,000*l.* mentioned in previous Reports.

£. 1,500 to the Thurso River Harbour Trustees, being the residue of the loan of 13,000*l.* mentioned in previous Reports.

£. 12,500 to the Elgin and Lossiemouth Harbour Company, being the residue of the loan of 20,000*l.* mentioned in previous Reports.

£. 3,000 to the Eyemouth Harbour Trustees, being the residue of the loan of 10,000*l.* mentioned in previous Reports.

(*c*) The sum of 30,000*l.*, "Harbours, Docks, and Piers (Scotland)," is the loan to the Stornoway Pier and Harbour Commissioners mentioned in this Board's last Report.

(*d*) The sum of 5,690*l.* to Volunteer Corps under the Military Lands Act, 1892 (no advances having been previously made under that Act), is made up as follows:—

£. 2,190 to the 1st Durham Volunteer Royal Engineers, being the loan mentioned in this Board's last Report.

£. 3,500 to the 1st Midlothian Volunteer Artillery, for the purpose of acquiring the freehold of the headquarters of the corps in Grindlay-street, Edinburgh, repayable in 35 years, with interest at 3½ per cent. per annum.

III. The following Statements show—

(1.) The rates of interest payable to this Board in respect of the sum of 1,582,783*l.*, advanced during the last financial year;

(2.) The terms of years over which the advances have been spread;

(3.) The mode of repayment, *i.e.*, by equal instalments of principal and interest combined by way of annuity, or by equal instalments of principal, with interest on the principal from time to time outstanding.

The same information in respect of the preceding year is also given for comparison.

	£. 1,157,947									

The average rate of interest receivable in respect of the advances made last year amounts to 3*l.* 11*s.* 1*d.* per cent., being the same as in 1892-93.

IV. The sum received in repayment of principal was, as in the last five years, in excess of the sum advanced during the same period, and amounted to 1,729,792*l.* 5*s.* 11*d.* (as compared with 1,383,071*l.* 4*s.* 5*d.* in 1892-93).

Of these repayments, 780,562*l.* 3*s.* 10*d.* represents the amounts which were paid off by borrowers before they fell due (particulars whereof will be found in Appendix F.), as compared with 500,255*l.* 7*s.* 10*d.* paid in like manner in 1892-93.

This sum of 780,562*l.* 3*s.* 10*d.* bore an average rate of interest of 3*l.* 14*s.* 4*d.* per cent. per annum.

V. The amount received by this Board for interest during the year ended 31st March 1894, in respect of all their outstanding loans, was 926,171*l.* 13*s.* 8*d.*; and this sum computed on the balance outstanding on 31st March 1893 (25,676,804*l.* 7*s.* 1*d.*), is equal to 3*l.* 12*s.* 2*d.* per cent. per annum as compared with 3*l.* 11*s.* 2*d.* in the preceding year.

VI. Further information as to this Board's advances will be found in Appendix (A.) to this Report, which shows, under various classifications, the amount advanced during the last financial year and the repayments on account of principal and interest during the same period.

The advances by the Public Works Loan Commissioners, and the repayments in respect thereof, since the commencement of the Commission in 1817 to 31st March 1894, are also shown in separate columns in the same Appendix.

Appendix (B.) shows in detail the authorities to whom advances were made in 1893-94; the amounts previously advanced and not yet fully repaid, and the balances of principal outstanding on 31st March 1894.

Appendix (C.) is a classified summary of the outstanding balances and the rates of interest payable thereon.

Appendix (D.) shows the loans in arrear on 31st March 1894, with this Board's observations thereon.

Appendix (E.) shows the loan accounts closed during the last financial year.

Appendix (F.) shows the amounts paid by borrowers in discharge or reduction of loans before they fell due.

Appendix (G.) shows the loans, amounting to 1,803,084*l.*, which were granted by this Board during the last financial year, some of which were advanced during that year.

Appendix (H.) shows the applications for loans refused during the last financial year.

VII. Of the loans granted during the last financial year, but in respect of which no advance was made, the following may be mentioned:—

UNDER THE HARBOURS AND PASSING TOLLS, &c., ACT, 1861.

£. 175,000 to the River Wear Commissioners for the purpose of completing the two protecting piers now in course of construction at the entrance to Sunderland Harbour, repayable in 30 years with interest at 3½ per cent. per annum.

Under the Housing of the Working Classes Act, 1890.

£. 650 to the Trustees of Hayle's Charity Estate (Lambeth), towards the cost of erecting further dwellings (in Hayles-street, St. George's-road, Southwark), repayable in 30 years with interest at 3¼ per cent. per annum.

Under the Military Lands Act, 1892.

(*a.*) £. 1,200 to the 1st Volunteer Battalion Royal Lancashire Regiment, for the purchase of the Drill Hall and premises now used by the corps at Ulverston, repayable in 30 years with interest at 3½ per cent. per annum.

(*b.*) £. 1,500 to the 2nd Volunteer Battalion Royal West Surrey Regiment, for the purchase of the freehold of the present Head Quarters of the corps at Guildford, repayable in 35 years with interest at 3¼ per cent. per annum.

(*c.*) £. 9,500 to the Queen's Rifle Volunteer Brigade (The Royal Scots), for the acquisition of land with the Drill Hall and Buildings thereon, at Forrest-road, Edinburgh, repayable in 35 years with interest at 3½ per cent. per annum.

(*d.*) £. 5,216 to the 1st Lanarkshire Volunteers Royal Engineers, for the purchase of the Drill Ground which the corps had hitherto hired, and for the acquisition of an adjoining plot of ground on which to build Head Quarter Offices, repayable in 35 years with interest at 3¼ per cent. per annum.

Under the Small Holdings Act, 1892.

(*a.*) £. 6,500*l.* to the County Council of the Parts of Holland (Lincolnshire), for the purchase of Land in the parishes of Spalding and Frieston, for the purpose of providing small holdings, repayable with interest at 3½ per cent. per annum in 50 years by way of annuity.

(*b.*) £. 640*l.* to the County Council of Anglesey (being the amount which they proposed to lend to a tenant to help him to pay for a portion of his holding which he had agreed to buy from his landlord), repayable with interest at 3½ per cent. per annum in 50 years by way of annuity.

These were the first applications made to this Board for loans under the Small Holdings Act, 1892, and this Board, at the request of the applicants, acceded to the loans being repaid by way of annuity in 50 years, in order that the annual repayments might accord with the sums which would be receivable by the County Council from the tenants or purchasers of the holdings.

Under the Allotments Acts.

(*a.*) £. 178 to the Chipping Sodbury Rural Sanitary Authority, for the provision of allotments in the Contributory Place of Abson-with-Wick, repayable in 35 years with interest at 3½ per cent. per annum.

(*b.*) £. 800 to the Southampton County Council, acting in substitution for the New Forest Rural Sanitary Authority who had failed to carry out the Act, for the provision of allotments in the St. Mary Eling Special Drainage District, repayable in 30 years with interest at 3½ per cent. per annum.

VIII. The moneys required by this Board for the purposes of their advances during the last financial year were provided by the National Debt Commissioners, in accordance with the National Debt and Local Loans Act, 1887.

IX. The

IX. The fees received by this Board from borrowers, pursuant to the Public Works Loans Act, 1875, irrespective of Stamp Duty, amounted during the last financial year to 8,784*l.* 4*s.* as compared with 7,067*l.* 13*s.* 10*d.* received in 1892-93.

X. The expenses of this Department over and above the fees received are now, in accordance with the National Debt and Local Loans Act, 1887, borne by the interest of the Local Loans Fund, as will be seen by reference to the Local Loans Fund Account for 1892-93 (Parliamentary Paper, No. 50, Session 1894). The total expenses for that year including other voted services for 1891-92, amounted to 12,197*l.* 4*s.* 4*d.*, of which 7,067*l.* 13*s.* 10*d.* was defrayed by the Fees received, and the Balance (5,129*l.* 10*s.* 6*d.*) out of the interest of the Local Loans Fund.

XI. Particulars of the loans remitted and written off from 1817 (the commencement of the Commission) to 31st March 1888, were set out in detail in Appendix (D.) to this Board's Report for 1887-88.

As explained in this Board's Report for 1891-92 (paragraph XI.), the amount of such loans stood on the 31st March 1892 at 2,004,026 *l.* 11 *s.* 1 *d.*, and that amount remains unaltered, no addition having been made to the remitted loans during the last financial year.

XII. By Section 3 of the Public Works Loans (No. 2) Act, 1893, provision is made for the transfer of the Rosslare Harbour Undertaking, free from incumbrances, to a company to be constituted for the purpose of developing the harbour in connection with the Waterford and Wexford Railway and the Fishguard Bay Railway and Pier Undertakings; and for the remission of this Board's Loan of 75,000*l.* to the Rosslare Harbour Commissioners with all interest, on the above transfer being completed. An agreement has been entered into for the transfer of the harbour to a company, and a Bill is now before Parliament to carry out this agreement.

XIII. The outstanding balance of principal of loans written off from the assets of the Local Loans Fund by the Public Works Loans Act, 1887, has been increased from 254,386*l.* 12*s.* 1*d.* (the figures given in this Board's Report for 1891-92), to 276,386*l.* 12*s.* 1*d.*, by reason of this Board's Loan of 22,000*l.* to the Mevagissey Harbour Trustees having been written off the assets of the Fund by the Public Works Loans (No. 2) Act, 1893 (Section 2). Particulars of this Loan are given in paragraph XIV. of this Report.

Under the National Debt and Local Loans Act, 1887, the borrowers are not relieved from their liabilities in respect of loans written off the Local Loans Fund; and during the last financial year the following sums have been received on account of *interest* in respect of loans so written off, and have been paid over to the National Debt Commissioners as *income* of the Local Loans Fund, viz.:—

	£.
Carlingford Lough - - - - - -	900
Rosehearty Harbour - - - - - -	100
Maldon Harbour - - - - - - -	175
Anstruther Union Harbour - - - - -	300

XIV. *Mevagissey Harbour.*—This case was referred to in this Board's Reports for 1891-92 and 1892-93, as being in arrear on account of the damage done to the breakwater in 1891. This Board advanced in the years 1887-90 sums amounting together to 22,000*l.* to the Mevagissey Harbour Trustees, nearly the whole of this sum being required for the construction of a breakwater 600 feet in length called the South Breakwater. The advances were made repayable with interest at 3¾ per cent. in 40 years, interest only being payable

payable during the first three years. By the exceptionally severe gales which occurred in March 1891 the breakwater was practically destroyed, a breach of about 300 feet having been made in the centre portion, and the harbour rendered unfit for navigation. The Engineers' reports obtained both by the Harbour Trustees and by this Board showed that the damage was, in all probability, due partly to the defective foundations of the breakwater which had got undermined, and partly to the action of the sea water upon the concrete. It was further shown that it was impossible to repair the work, and that an entirely new work was necessary which would be more expensive than the original work, owing partly to the necessity for the removal of the débris of the original breakwater, and to the desirability of having a stronger work. After lengthened negotiations a plan was agreed upon for reconstructing the harbour at an estimated cost of 32,000*l.*, and towards this sum Mr. J. C. Williams promised to give to the Trustees 10,000*l.*, and the remaining 22,000*l.* was to be raised as follows:—

1. £. 20,000 to be advanced by this Board as a first charge on the harbour and to be repaid in 50 years with interest at 4 per cent. by half-yearly payments by way of annuity, interest only to be paid during the first three years.

2. £. 2,000 to be advanced by this Board as a second mortgage to be repaid in 50 years with interest at 4 per cent. by half-yearly payments by way of annuity, Mr. Williams further to guarantee the payments which should fall due in respect thereof during the first 12 years, in substitution for the guarantee which he had given for 2,000*l.* of the original loan of 22,000*l.*; and in respect whereof he had made all payments due to this Board up to the 24th June 1893 amounting to 220*l.* 15*s.* 9*d.*

3. The existing loan of 22,000*l.* from this Board to be postponed to the new loans.

These arrangements were subject to the approval of Parliament which was given by the Public Works Loans (No. 2) Act, 1893 (56 & 57 Vict. c. 40), and by the same Act the original loan was written off from the Account of Assets of the Local Loans Fund.

This Board made the first advance, 5,000*l.*, on account of the new loan of 22,000*l.* on 30th December 1893.

XV. The following Acts were passed in the last Session of Parliament by which this Board's powers have been extended, viz.:—

(*a.*) The Day Industrial Schools (Scotland) Act, 1893 (56 Vict. c. 12), which empowers this Board to advance loans for establishing and building certified industrial or day industrial schools in Scotland, on the same terms as they lend to School Boards in Scotland for Elementary Schools.

(*b.*) The Elementary Education (Blind and Deaf Children) Act, 1893 (56 & 57 Vict. c. 42), by which the Public Works Loan Commissioners are empowered, on the recommendation of the Education Department to lend any money to any school authority on the security of the fund applicable to the expenses of the Act, for the purposes of the Act, which include the provision of schools for the elementary education of blind and deaf children in England and Wales; such loans to be repaid within a period not exceeding 50 years, and to bear such rate of interest not less than 3¼ per cent. per annum as the Treasury may authorise as being in their opinion sufficient to enable the loan to be made without loss to the Exchequer.

No applications for loans under these Acts have yet been made to this Board.

XVI. The loans in arrear, Appendix (D.), amount to 250,584*l.* 11*s.* 9*d.* for principal, and 187,057*l.* 6*s.* 9*d.* for interest, as compared with 282,833*l.* 4*s.* 6*d.* for principal, and 200,929*l.* 18*s.* 10*d.* for interest in 1892-93; and this Board's observations against each case will be found in the same Appendix.

By

By the direction of the Treasury, and in order to make the accounts of the several lending Departments correspond, this Board have omitted in their account forming Appendix (A.), the interest accrued due on loans written off the assets of the Local Loans Fund, thus reducing the interest in arrear due by borrowers on 31st March 1894, and as set out in Appendix (D.), from 187,057*l.* 6*s.* 9*d.* to 69,363*l.* 9*s.* 4*d.*

XVII. The last of the loans under the heading Railway Companies (Ireland) Temporary Advances Act having been paid off, this class of loans has been transferred from "current and unclosed loan services" to the closed loan services in this Board's accounts.

The Act was passed in 1866, whereby in consequence of the then monetary derangement and the impossibility of Irish Railway Companies obtaining money for the works in progress upon reasonable terms, and of the fact that many of the companies were then called upon to repay at short notice large sums advanced on mortgage and other security, and that great embarrassment and widespread distress would follow in Ireland, unless the Companies should receive some assistance from the Government, this Board were authorised to lend a sum not exceeding 500,000*l.* for the purpose of paying off Debentures already issued and overdue, or falling due within the next three months. Under the powers of the Act, the Treasury fixed the rate of interest on the loans at 5 per cent., and by the Act the repayment of every loan with the interest was to be made not later than 12 months from the date of the advance; but by an Act passed in 1867, the period for repayment was extended for a further 12 months. This Board accordingly advanced in the years 1866-67, 159,356*l.* to seven railway companies. Of these loans, six were repaid within three years with all interest, and as regards the seventh (the loan to the Athenry and Tuam Railway Company), the Treasury by their Warrant reduced the rate of interest to 4 per cent., and extended the period for repayment to 30 years. This loan was paid off during the last financial year out of the proceeds of sale of the railway to the Waterford and Limerick Railway Company.

XVIII. The loans in the following four cases having been discharged, these cases no longer appear in the list of arrears.

Tralee Harbour.—The circumstances relating to this loan are set out in this Board's Report for 1880-81, paragraph 9. The composition which was sanctioned by the Treasury has now been completed, the final payment of 200*l.* on account of the sum of 2,600*l.*, which it was agreed should be paid by 13 annual instalments having been paid on 4th July 1893.

Greenock Harbour.—The arrangement referred to in this Board's previous Reports has been carried out, and the balance of the loan with interest discharged.

Finn Valley Railway.—The balance of principal which appeared in this Board's last Report has been discharged with all interest.

Athenry and Ennis Junction Railway.—This Board made advances to the Athenry and Ennis Junction Railway Company in the years 1867 and 1868, amounting to 59,000*l.* towards constructing their railway, and the loan was repayable with interest at 5 per cent. per annum by instalments in 20 years.

Payments were made in part discharge of the interest and instalments of principal, but the income of the undertaking proved insufficient to pay the whole of such interest and instalments as they fell due.

In 1893, the undertaking of the Athenry Company was sold under the Waterford and Limerick Railway Act (56 & 57 Vict. c. 164, local) to the Waterford and Limerick Railway Company, and the loan became a charge on the purchase-money for the undertaking.

By the Public Works Loans (No. 3) Act, 1893 (56 & 57 Vict. c. 65), this Board were authorised to accept in full discharge of the said loan of 59,000*l.* such a sum as would, after allowing for the payments then already made, discharge the loan with interest at the rate of 4 per cent. per annum, the sum to be calculated in the same manner as if the loan had from the first borne interest at the rate of 4 instead of 5 per cent. per annum, and as if the payments then already made had been applied first in payment of interest at such reduced rate, and the balance in reduction of the principal; and all necessary corrections in the books of this Department were directed to be made accordingly. The Company paid on the 4th October last the balance outstanding calculated as above stated.

The difference between interest at 4 per cent and 5 per cent. amounted to 16,076*l.* 11*s.* 4*d.*, which sum has been remitted by Parliament. In order to adjust the accounts in this Board's Books, 7,076*l.* 11*s.* 4*d.* was transferred from interest to principal account.

By order of the Board,

Public Works Loan Board,
30 May 1894.

R. Philpot, Secretary.

APPENDIX.

Appendix (D.)

mentioned in Columns Nos. 13 and 15 of Appendix (A.), pages 15 and 17.

OBSERVATIONS.
Now discharged.
The Harbour Authority have paid 175*l.* on account of interest as compared with 200*l.* in 1892-93. As the income of the Harbour is insufficient to pay a year's interest, the arrears are annually increasing.
Under the arrangement mentioned in this Board's Report of 1887-88, the Trustees were to pay annually 959*l.* to this Board, but during the last year only 359*l.* has been paid, as compared with 600*l.* in 1892-93. The Harbour Trustees have petitioned the Treasury for some relief in consequence of the falling off in their Revenue, and in the meantime have not paid over their net income.
The payment of these arrears was, as mentioned in this Board's Report of 1887-88, suspended pursuant to 43 & 44 Vict. c. 1, s. 3, until 18th October 1892. Out of the net revenue for the year ended August 1893, the Trustees made a payment of 300*l.* on account of the arrears of interest, being the first payment since the arrangement referred to in this Board's Report of 1879-80.
The sum of 258*l.*, which, as mentioned in this Board's previous Report, the Trustees have had to expend on repairs, has now been defrayed, and the Trustees have during the last financial year been enabled to pay in further reduction of the arrears of interest 40*l.*, being the first payment since 1889.
£. 20,000 interest has been paid by Her Majesty's Office of Works during the last financial year, as against 4,000*l.* in 1892-93.
Now discharged.
This Board have been in possession of these buildings since 10th November 1888, as mentioned in previous Reports. The net income for the year ended 31st December 1893, after discharging all outgoings and repairs, amounted to 425*l.* 19*s.* 8*d.*, as compared with 419*l.* 2*s.* in the previous year.
This instalment and interest fell due on 10th February 1894, and, not having been discharged, this Board have now been obliged to enter into possession of the premises. There is no reason to anticipate that the security will be insufficient to discharge the loan in full.
Now discharged.
Now discharged.
Now discharged.
These arrears represent one instalment on account of each loan. This Board anticipate that they will shortly be discharged.
Now discharged.
This Board have no observations to add to those contained in their Report for 1887-88, no alteration having taken place in the meantime.

APPENDIX (D.)—DETAILS of the Arrears on 31st March 1894, in respect of Principal and Interest,

Discharged to date of Report, as above				3,280 15 6	3,227 14 4
BALANCE			£.	165,403 12 10	66,135 15 –

mentioned in Columns Nos. 13 and 15 of Appendix (A.), pages 15 and 17—*continued.*

OBSERVATIONS.
All interest on the 46,015 *l.* has been discharged to 31st December 1893.
All interest on the 2,834*l.* 1*s.* 11*d.* has been discharged to 31st December 1893, and, in addition to the principal outstanding, has been reduced from 3,500*l.* outstanding on 31st March 1893 to 2,834*l.* 1*s.* 11*d.*
The Harbour Commissioners state that the 220*l.* mentioned in this Board's last Report as necessary for extraordinary repairs has nearly been defrayed out of the income of the Harbour, and they hope to resume payment to this Board on the 7th August next.
The circumstances relating to this loan and its postponement, pursuant to Act 56 & 57 Vict. c. 40, are stated in paragraph No. XIV. of this Report.
The amount received in 1893–94 was 210*l.* -*s.* 9*d.*, as against 180*l.* 12*s.* 11*d.* in 1892–93. The outstanding balance of the Loan is now 4,314*l.* 15*s.*, as compared with 4,381*l.* 16*s.* 8*d.* in 1892–93. The gross revenue for the year ended 31st January 1894, shows a slight increase as compared with the previous year.
This case appears for the first time in the list of arrears. This Board understand that the Harbour Trustees are applying for the consent of the Board of Trade to their levying full dues.
This case appears for the first time in the list of arrears. The Harbour Commissioners state that they are unable to make the payment on account of repairs being needed, and the accounts furnished show that the income of the Harbour is diminishing.
This Board received 199*l.* 6*s.* 8*d.* from the Harbour Commissioners in respect of this Loan during the last financial year, as compared with 571*l.* 3*s.* 9*d.* in 1892–93. The Board have, as stated in their Report for 1891–92, granted a further Loan of 10,000*l.* for completing the Harbour. This Loan has now been advanced, and the work is proceeding.
The period for suspension of this Loan expired on the 1st January last, and the Trustees have memorialised the Treasury with a view to further relief being afforded to them.
This Board received from the Harbour Trustees 100 *l.* in 1893–94 (the same as in 1892–93). The audited accounts of the Harbour are annually furnished by the Trustees. The amount paid to this Board from year to year is insufficient to keep down the interest, and the arrears are consequently annually increasing.
This case appears in the list of arrears for the first time. The Harbour Trustees have not yet levied the full dues, and the work has not yet been completed.
Now discharged.
As explained in this Board's Report for 1888–89, the income is insufficient to keep down the annual interest. £. 900 was received in 1893–94, as compared with 400 *l.* in 1892–93.
The negotiations relating to the proposed transfer of this undertaking are set out in paragraph No. XII. of this Report.

Appendix (E.)

STATEMENT in Detail of the Loan Accounts which have been closed during the Financial Year ended 31st March 1894, showing the Amount of Loan, the Year of Advance, the Period for Repayment, and the Rate of Interest.

Borrowers.	Amount of Loan.	Year in which Advanced.	Period for Repayment.	Rate of Interest.

PUBLIC WORKS, IRELAND.

SIXTY-SECOND ANNUAL REPORT

OF THE

COMMISSIONERS OF PUBLIC WORKS IN IRELAND,

FOR THE YEAR 1893–94.

TO THE LORDS COMMISSIONERS OF HER MAJESTY'S TREASURY.

MAY IT PLEASE YOUR LORDSHIPS,

Introduction.

IN submitting our Sixty-second Annual Report on the several services entrusted to our management, we propose to somewhat vary the arrangement on which previous Reports have been made, and to deal with the several divisions of the subject in the following order:—

(1.) Voted Services, *i.e.*, services for which provision is made by vote of Parliament.

(2.) Light Railways and Tramways.

(3.) Non-voted Services, *i.e.*, services provided for from other sources than Parliamentary votes.

(4.) Loans.

At the same time we propose in the body of the Report to deal only with the principal features that have presented themselves under each head during the year and to record in Appendices the details of administration or the statistical results of the year. We apprehend that in this way, while for official purposes the record of the year's operations will be no less complete and accessible, the salient points of the year's history will be followed with greater interest and convenience.

Duties of the Board.

As a general preface to our Report, we repeat from last year's Report the following extract from the Report of the Committee appointed in 1870, to inquire into the administration by the Board of the services with which it is charged:—

> "The variety of those services is very great. The Commissioners not only conduct all the business which is delegated to two separate Boards in London (namely, the Commissioners of Her Majesty's Works and Public Buildings, and the Public Works Loans Commissioners), and part of that which is intrusted to the Inclosure Commissioners (9 & 10 Vic., c. 101), but they also have under their charge a considerable amount of work which is not done in Great Britain at all by the Government, such as the maintenance of Inland Navigations, &c.; they are likewise members of the Board of Control for Lunatic Asylums, and of the Board of Control over the Royal Canal.
>
> "To be charged with the lending of sums of public money is, of itself, a trust, the importance of which it is not easy to overrate; and when to this is added the control of an expenditure of over £200,000 a year;* the care of a large amount of valuable public property; the interpretation and administration of very numerous Acts of Parliament; and the conduct of much extraneous business, some idea may be formed of the responsibilities thrown on this Board.
>
> "Moreover, the Board of Works occupies a position peculiar to itself. It is the only Department of the State which has under its charge loan operations as well as a large expenditure. In having to accommodate local authorities and individuals with capital, which they cannot so cheaply raise in the open market, and at the same time keep watch over a public expenditure, the Board has more or less conflicting interests to deal with; it has to consult the special interests of localities and persons and at the same time to protect the general interests of the public. Its duties, therefore, may at times be attended with more than ordinary difficulties."

Since the date of that report the duties of the Board have been largely increased both by automatic development and as the result of legislation.

* In the year 1893-4 the actual gross expenditure under the control of this Board, covered by the Civil Service Estimates, was—

(1) Class I.		
Vote 14 (p. 53).		
(*a*) Public Works and Building (Ireland),		£218,886
Vote 15 (p. 53).		
(*b*) Railways (Ireland),		250,467
(2) Class II.		
Vote 37 (p. 53).		
Public Works Office,		36,298
	Total,	£505,651

We may particularly refer to the loans authorized by the 31st Section of the Land Law (Ireland) Act, 1881, under which £813,155 in 10,006 separate accounts has been advanced, the Sea Fisheries Ireland Act, 1883, the Ancient Monuments Acts, the numerous amendments and extensions of our powers to lend for local and educational purposes, and the important duties imposed upon us in connection with the Schemes of railway extension presented under the Tramways and Public Companies (Ireland) Act, 1883, and the Light Railways (Ireland) Act, 1889.

Within the same period the duties of the Board have only been reduced by a reconstitution of the Board of Control, of which only the Chairman is now a member, though the whole clerical, accounting, draughtman's, and legal work is carried on by our staff, and by the transfer to the Congested Districts Board of the Sea Coast and Fisheries Fund and of the Irish Reproductive Loan Fund, with the exception of £20,000 which remains under our control.

In the Session of 1892 several Acts were passed affecting the status of the Board and their loan services.

By the Public Works Loans Act, 1892 (55 and 56 Vict., cap. 61, section 8), the Commissioners were incorporated for all the various duties they discharge with perpetual succession, and a common seal, with power to hold land, and such incorporation is thereby made retrospective as regards previous contracts or securities.

By the Ancient Monuments Protection Act, 1892 (55 and 56 Vict., cap. 46), the Ancient Monuments Protection Act, of 1882, has been extended, and by such extension the Commissioners have already become guardians of, and are thus enabled to protect and preserve monuments of historic and artistic interest which would otherwise be liable to be destroyed or become ruinous.

By the Drainage and Improvement of Lands (Ireland) Act, 1892 (55 and 56 Vict., cap. 65), tenants by agreement with their landlords or by order of the Board can promote and carry out Schemes for Arterial Drainage, under the Arterial Drainage Act of 1863, and the Acts amending and extending same.

By the same Act, sec. 11, we were given power to apportion charges for Drainage Maintenance on portions of lands liable to such a charge.

During the Session of 1893–94, several Acts affecting the operations of the Board were passed, but as they were not of a general character, they will be more conveniently alluded to in connection with the services to which they refer.

I.—VOTED SERVICES.

I.—Voted Services.

Under this head of our duties, comprising those services which are created by or maintained from, annual votes of Parliament, the accounts record the following net expenditures on each to 31st March, 1894, and the second column shows the net expenditure on the same votes for the preceding year 1892–93 :—

——	1893–94.	1892–93.
	£	£
Class I. Public Works and Buildings, and Railways, Ireland, .	469,383	517,776
Class II. Public Works Office, ...	36,298	33,534
	505,681	551,310

Showing the net total charge for the year for these services to be £505,681.

These services comprise — Voted Services,

Public Buildings, Ireland, viz. :—
Naval and Military; State and Official Residences; Civil Departments; Legal Departments; Metropolitan Police; Royal Irish Constabulary; Dundrum Criminal Lunatic Asylum; Science and Art Department; Public Education; Royal University and Queen's Colleges; Revenue Departments.

Royal Parks and Gardens :—
Phœnix Park; St. Stephen's-green; The Curragh of Kildare.

Royal Harbours :—
Kingstown; Howth; Donaghadee; Dunmore; Ardglass.

Inland Navigations :—
Boyne; Maigue.

Ancient Monuments Protection Act, 1882, 45 & 46 Vic., c. 73.
Ditto, Ditto, 1892, 55 & 56 Vic., c. 46.
Tramways and Light Railways—See also II., page 10.

Public Buildings.

General Observations.

The Public Buildings in charge of the Board number nearly 1,400, made up as follows :— Public Buildings,

Naval and Military Buildings,	221
Revenue Departments,	135
State and Official Residences,	18
Other Civil Departments,	1,004

National Education Buildings and School Grants.—A sum of £30,000 was voted for grants towards the erection of new schools and improvements to existing schools. Of this sum, £28,198 was expended, leaving unused £1,802 of the vote, although at the end of the financial year grants to the amount of £54,000, sanctioned by the Commissioners of National Education, remained to be met. School grants.

In our Report for the year 1892–3 we called attention to the difficulty of forecasting the probable expenditure in the financial year on the erection of new and the improvement of existing schools, owing to the want of any provision in the procedure under which grants are made by the Commissioners of National Education for requiring managers of schools to commence and finish works within a definite period after the making of the grant.

Some correspondence has passed on the subject with the Commissioners, and we understand that they are considering what steps should be taken to meet the necessities of the case.

Postal and Telegraph Buildings.—The approaching completion of the Amiens-street Parcel Post Depot made it necessary to decide as to the system of lighting to be employed. So far as we are aware, in Great Britain, whenever electric lighting has been introduced in Post Office buildings the supply has been obtained by a separate installation, for which as a rule the existence of engines required for the Postal and Telegraph work, and the presence of the Technical staff of the Telegraph Department gave special facilities. There would have been no difficulty in making similar arrangements at Amiens-street, but we considered that as the Corporation of Dublin had established a municipal electrical system it would be fair that the Government requirements should be supplied from that system, if the price per unit compared satisfactorily with the rate at which the energy could be generated by a separate installation on the premises. We do not think that the terms offered are as low as might have been given, considering the amount of energy that will be required, the hours at which it will be used, the permanence of the demand, and the regularity and certainty of payments by the Government, and we have therefore been obliged to give notice to the Corporation that we do not propose to take the current from them on the same terms after the expiration of three years. Parcel Post Depot.

The depot itself is practically finished, and only the fittings, which have been specially planned in consultation with the Post Office experts, now remain to be provided.

PHŒNIX PARK.

The Phœnix Park takes its name from a Manor House which formerly stood on the present site of the Powder Magazine. Phœnix Park.

The Phœnix Manor formed part of the lands of Kilmainham which were granted by Richard Strongbow, Earl of Pembroke in the year 1174, to the Knights Templars.

The Order of Knights Templars was suppressed by Edward II. in the year 1307, and in the year 1310 their lands and possessions were granted to the Knights of St. John of Jerusalem, otherwise the Knights Hospitallers. In 1535, amid the general dissolution of religious houses, the possessions of the Hospitallers in Ireland were surrendered to the King, but in the Reign of Queen Mary the establishment was allowed to be reconstituted by Cardinal Pole, and Sir Oswald Massingberd, who was appointed Prior in 1557, held office until the second year of Queen Elizabeth's reign, when the Crown re-asserted its claim to ownership.

The Queen seems to have resolved to form the estate into a deerpark, but this resolution was not put into execution before the year 1662, when James, Duke of Ormond, then Lord Lieutenant, purchased, on behalf of His Majesty Charles II., for the sum of £3,000, from Christopher Fagan, of Feltrim, County of Dublin, Esquire, and Daniel Hutchinson, of the City of Dublin, Alderman, their interest in a lease for 60 years of the lands of Phœnix and Newtownland, in the parish of Kilmainham, containing 467 acres 10 perches. Various additions were subsequently made, for which a sum of £10,000 was issued by the Treasury, and on that being found to be insufficient, a further sum of £10,000 was granted in 1665.

The estates thus bought were conveyed to Sir John Temple, Solicitor-General, and Sir Paul Davies, Secretary of State, in trust for His Majesty.

As a result of these additions, the Park stretched on both sides of the River Liffey, including the site and demesne of the present Royal Hospital at Kilmainham.

The high road ran through the Park, and in consequence of the deer trespassing on the neighbouring fields, that part of the Park which was situated on the north side of the river was, in 1682, enclosed by a stone wall, and the highway and the lands lying on the south side of the river were excluded. The Park was completed by the Earl of Chesterfield during his Lord Lieutenancy, and the Phœnix Column was erected by him in 1745 to commemorate the laying out and embellishment of the grounds by walks and plantations.

The Park, as a Royal possession, was under the control of the Commissioners of Her Majesty's Woods, Forests, and Land Revenues. In the year 1851 the management of it was transferred to the Commissioners of Her Majesty's Works and Public Buildings (Great Britain), and from them to the Commissioners of Public Works in Ireland on the 1st January, 1860.

tent of rk.

The total extent of the Park is 1,752A. 3R. 21P. English statute measure, made up from the following estates, which were in possession of, or purchased by the Crown, for the formation and subsequent enlargement of the Park :—

	A.	R.	P.
1. The Manor of the Phœnix and Newtownlands, Crown lands,	467	10	0
2. Part of the lands of Chapelizod, purchased of Sir Maurice Eustace, Knt., Lord Chancellor of Ireland,	441	0	0
3. The whole of the remaining lands of Chapelizod, with the Mills, Manor, and Town, purchased of the said Sir Maurice, but its dimensions or the additions to the Park are not stated.			
4. Part of the lands of Grangegorman purchased of Colonel John Daniel for £126 1s. Extent not stated.			
5. Certain lands from Thomas Pooley of Dublin, Gent., for £600.			
6. Certain lands from Sir John Temple, Knt., for £200.			
7. Part of the lands of Upper Castleknock, purchased of John and William Warren of Corduff, for £240,	16	2	0
8. Part of the lands of Ashtown, in the parish of Castleknock, purchased of John Connell of Pelletts Town, Gent., for the sum of £2,270,	152	1	24
9. Part of the lands of Castleknock, from Phillip Hore, Gent., in consideration of his other lands being confirmed to him,	28	0	0
10. Fields near Kilmainham, from T. Musgrave, for £35,	16	0	0
11. The interest in certain lands and a house in Chapelizod, part of the estate of Sir Maurice Eustace, Knt., purchased from David Edwards for £150,	30	0	0
12. Certain lands from Thomas Boyd. Extent not stated.			
13. A meadow near Oxmantown, purchased from Robert Bowyer for £44.			

Included in this area are the Demesnes attached to the

	A.	R.	P.
Vice Regal Lodge, area comprising	180	3	34
Chief Secretary's Lodge, „	75	2	27
Under Secretary's Lodge, „	51	3	23
Also The Ordnance Survey Office, comprising,	20	1	16
Royal Hibernian Military School, „	31	3	39
Royal Irish Constabulary Depôt, „	10	1	24
Magazine Fort, „	2	1	10
	373	2	10

In addition to these there are sundry small enclosures attached to the Bailiff's and Park Constables' Lodges, the Nursery, Deer Farm, &c., amounting in all to 14A. 1R. 25P. The enclosure to the Royal Zoological Gardens comprises an area of 19A. 1R. 5P., while at various times separate cricket grounds have been granted on licences to the Phœnix Club, Civil Service Club, the Garrison Club, the Constabulary Club, and the Working-men's Club, comprising altogether an area of 14A. 2R. 17P.

The area of the enclosures in the Park, it will be seen, amounts to 421A. 3R. 17P. out of a total area of 1,752A. 3R. 21P.

Cricket grounds.

As your Lordships are aware, at various times questions have been asked directed against the maintenance of the several cricket grounds above referred to. While we are of opinion that the practice of granting these grounds should not, if possible, be extended, it does not appear that any necessity exists for the withdrawal of the privileges enjoyed by the Clubs, whose matches are open to view without payment, and with the military and other bands frequently provided by the Clubs afford much enjoyment to the public. At the same time we have thought it desirable, in order to meet what appears to be a growing desire for cricket grounds in the Park, to establish a public cricket ground in the neighbourhood of the ground known as the Civil Service ground. The preliminary steps for this purpose were taken in the Autumn of 1893, and although the ground is of course not yet in first-class order, we hope in time to be able to bring it into good condition, and with the co-operation of those who use it to maintain it in good playing order.

Polo grounds.

We have also during the year slightly changed the position and improved the shape of the Polo Ground on the Nine Acres. The matches and games played on this ground form one of the most popular amusements of Dublin, and are watched by crowds of spectators of all classes. For the protection of the public a wooden barrier has been put up with the permission of the Board by the All Ireland Polo Club on two sides of the ground, leaving both ends open for pedestrians or equestrians when the ground is not being used, and for the further protection of the spectators we have moved the boundary line forward, so as to avoid any risk from falling branches of the elms which, though affording a grateful shade, constituted a possible source of danger from the decay to which (in this Park after a certain number of years) the elm is subject. The change of position has at the same time enabled us to afford facilities for the movement of vehicles and spectators round the ground which did not formerly exist.

In other parts of the Park we have taken steps to provide for the replacement of worn-out or decaying trees, and to secure in future years avenues and groups of trees that shall be worthy of this great Public Park.

Park roads.

For some considerable time our attention has been directed to the extent to which the roads of the Park were used for the general traffic of the district surrounding it. No restriction had ever been placed on what we may call pleasure traffic, and at the same time passes through the Park had been freely granted for market gardeners' carts from the Strawberry Beds, for farmers' carts, and for all sorts of traders' carts and vans. We came to the conclusion, upon an examination of the facts, that looking to the existence of county roads on the north and south, the Park roads were being excessively and unnecessarily used, and that the amount and character of the traffic was such as to detract from the primary object of the Park as a public pleasure ground. In particular, it had become clear that the Park roads were used for traffic from the Strawberry Beds, from Chapelizod, &c., in order to avoid the steep ascent on the county road outside the Park boundary, and to take advantage of the better condition in which the Park roads are kept as compared with the county roads.

Accordingly, at the beginning of the year 1894, we introduced as a temporary measure a change by which all traffic, other than pleasure traffic, was only allowed to pass between the Dublin gate and the Castleknock gate, the other gates being closed to business traffic.

Lest, however, any hardship should be caused to the market gardeners, &c., frequenting the Dublin market, we, with your Lordships' consent, agreed to give a temporary pass to them, so as to enable the question of the improvement and proper maintenance of the county road to be brought before the Grand Jury of the County of Dublin at their next meeting for fiscal business.

We have also relaxed the rule forbidding vans to pass through the side gates of the Park, and where real necessity has been shown by tradesmen serving public institutions, &c., in the Park, we have, as occasion required, granted passes between Dublin gate and Chapelizod gate, and between the North Circular Road gate and the Ashtown gate.

Lower Boyne Navigation.

Boyne Navigation.

The Boyne Navigation stretches from Drogheda to some distance above Navan, and consists of two portions, the Lower, 14 miles, under the charge of the Board, and the Upper, which has been in the hands of a local Board of Trustees. It has for some time been evident that if water communication between Navan and its natural port of Drogheda was to be maintained, some change of management would be necessary in order to give facilities for the repair of the Upper part of the Navigation, and to encourage and develop traffic on the whole system. The proposal for the formation of a new Company with this object has aroused considerable local interest in Navan and Drogheda, and, though it has not yet been completely worked out, it offers a prospect of future success.

Details of the above and other services comprised under this division of our Report will be found in Appendix A, pages 28–30.

II.—LIGHT RAILWAYS AND TRAMWAYS.

Tramways and Light Railways under the Acts of 1860 to 1890.

Light Railways and Tramways.

Under the provisions of the Tramways Acts of 1860 and 1861 we are required, on the application of the promoters of tramway and light railway projects, to cause an inquiry to be held into the merits of the undertakings from an engineering point of view, and into any modification in that respect which may be advantageously made, and to report our opinion thereon. These reports are directed to be submitted to the Grand Juries for their information in considering the proposals made.

In connection with undertakings proposed to be guaranteed under the Tramways and Public Companies (Ireland) Act, 1883, we are further directed by section 10 of that Act to furnish the Lord Lieutenant in Council with an estimate of the amount of paid-up capital which will be necessary for the purpose of the undertaking. The estimates having been examined and checked for that purpose, are submitted to the Privy Council at the hearing of applications for Orders authorizing the construction of any line of tramway or light railway, and the Engineers who checked those estimates attend at the hearing and are examined thereon.

The cost of these inquiries is defrayed out of funds deposited in our hands by the Promoters.

Tramway inquiries, 1893–4.

In the following cases the inquiry as to engineering merits required by the first named Act (Sect. 9) as modified by section 7 of the Act of 1861, was prosecuted in each case by an Inspector appointed by the Board, and the cases were duly reported on for the guidance of the local authority concerned :—

1. Dublin, Swords, and Garristown, in which a guarantee was applied for.
2. Dublin United Tramways.
3. Clontarf and Hill of Howth.

In the case of No. 1 we informed the Promoters and the Grand Jury concerned that there were no funds available under the Tramways and Public Companies (Ireland) Act, 1883, to be applied in aid of dividends guaranteed by the Baronies, Your Lordships having declared that, under the joint operation of that Act and of the Act of 1889, 52 & 53 Vic., cap. 66, all funds for State assistance to such projects were exhausted.

An amount is provided in the Estimates to enable us to meet any contributions which may become payable in respect of the two per cent. which may be repaid to the baronies under the 9th Section of the "Tramways (Ireland) Act, 1883." A General Statistical Return is appended (*vide* Appendix F.), showing the capital of each Line with the Revenue and expenditure in each year since its opening, and the annual charge both on the guaranteeing baronies and the Treasury.

State and Local aid to Railways.

The approaching completion of the railways to which the assistance of the State was given under the Light Railways (Ireland) Act, 1889, affords a convenient occasion for a summary of the various steps by which railway extensions in Ireland have been facilitated by State or local aid.

In 1836 the question of the construction of railways in Ireland was brought forward by the Government. A Royal Commission was appointed at the end of 1836, and renewed in 1837, for the purpose of considering a general system of railways for Ireland, and the best mode of directing the development of this new means of intercourse to the channels where the greatest advantage might be obtained by the smallest outlay, with a view to developing the resources of the country.

In consequence of the recommendations of that Commission, the Government submitted certain resolutions to the House of Commons in favour of the construction of the lines between Dublin and Cork with a branch to Limerick as public works for the execution of which the Treasury was to be empowered to issue Exchequer Bills and of the appropriation of the revenue :—

(1.) To the maintenance and working of the railways ;
(2.) To payment of interest at 3½ per cent. on the advances ;
(3.) To a sinking fund not exceeding 1½ per cent. per annum ;
(4.) To reduction of rates or extensions of the systems.

These resolutions were adopted by the House, but the question of Government interference was subsequently dropped, and private companies were allowed to proceed as in England and Scotland.

State Loans to Railways.

The Irish Railway Companies were, however, treated somewhat exceptionally. They early sought and obtained Government aid for constructing their railways, and under the Acts authorizing the advance of money out of the Consolidated Fund for public works several sums were advanced from time to time to aid the construction of railways in Ireland.

The first of these advances was made to the Dublin and Drogheda Railway Company in 1842.

The distress in Ireland caused by the famine led to increased application for such assistance, in consequence of which Parliament, in 1847, authorized the further issue of £620,000 out of the Consolidated Fund to the Great Southern and Western, the Waterford and Kilkenny, and the Dublin and Drogheda Railway Companies.

In 1849 Parliament also authorized the issue of £500,000 out of the Consolidated Fund to aid the Midland Great Western Railway of Ireland Company in completing the line of that Company. Other advances have since been made to Irish Railway Companies, which amounted in the whole, on the 31st March, 1893, to £4,197,746, out of which £3,383,278 had been repaid.

In 1866 Parliament sanctioned the advance of £500,000 out of the Consolidated Fund to Irish Railway Companies for a period not exceeding twelve months, to enable them to meet pressing liabilities. This latter loan was of advantage rather to pay off persons who had incautiously lent their money on the security of existing Irish railways than to increase the amount of railway communication in Ireland.

From the fact that railway extension in Ireland beyond the trunk lines has been effected to so great a degree by separate companies for each piece of line it is probable that a larger proportion of the capital has been locally subscribed than would be the case with a great company issuing additional stock at a financial centre.

(1) Aid from Landowners

But in addition to this the assistance of the locality has been largely given in Ireland in two other ways (1) contributions in the form of capital or guarantee by the landowners of the district, and (2) guarantees of the interest on portions of the capital charged on rates.

As examples of the former we may refer to the construction, by the Duke of Devonshire, of the line between Lismore and Fermoy, the guarantees given by the London city companies in respect of the interest on £20,000 in the case of the Dungiven Railway, £60,000 in the case of the Derry Central, £7,000 in the case of the Drapers-town, the collateral guarantee of £62,900 for the Southern Railway (by certain private individuals), and the guarantee given jointly and severally by landowners of the interest on a State loan of £100,000 required for the completion of the Sligo, Leitrim, and Northern Counties Railway between Collooney and Enniskillen.

(2) Local Guarantees.

But the most usual form of local assistance in Ireland for railway extension was the guarantee of interest on a certain portion of the capital by a charge on the local rates.

Thus in addition to the loan from the Consolidated Fund above-mentioned the Midland Great Western Railway Company was assisted by a guarantee, from the baronies through which it passed, of five per cent. upon the capital required for the purposes of its extension from Athlone to Galway. The Railway Company were required to render accounts, which were submitted to an auditor named by the Government, and the baronies were called upon to levy rates for payment of the guarantee during many years, but under the provisions of an Act passed in the year 1865, the baronies were, in October, 1870, relieved from all further liability to the guarantee, and the Railway Company was no longer required to submit the accounts of this portion of the line to Government audit.

The southern portion of the country has been especially liberal in giving these guarantees : *e.g.*, in the case of the line now known as the Cork, Bandon, and South Coast Railway, the extensions from Dunmanway to Skibbereen, and from Drimoleague

to Bantry, were made with the assistance of local guarantees of five per cent. for thirty-five years on capital sums of £53,000 and £40,000, respectively.

These local guarantees are at varying rates of interest: in some cases they are limited to a maximum sum leviable in each year, in others to a maximum poundage rate. Some are perpetual, others for a term of years: in some the net earnings have largely relieved the guarantee, in others the guarantee is being and is likely to continue to be paid in full.

The total amount guaranteed is slightly over a million pounds, exclusive of the Athlone-Galway guarantee mentioned above.

In the Relief of Distress Amendment Act, 1880 (43 and 44 Vic., c. 14, ss. 13--15), an attempt was made to combine both State and local assistance in favour of certain lines specified in the schedule to that Act. The Treasury was empowered to lend, on somewhat more favourable terms than the general law allowed, upon the security of a baronial guarantee. In few, however, of the schemes referred to was it found possible to make practical use of this concession; and it became apparent that if railway extensions were to be made, especially in the districts which most needed opening up, further assistance must in some form or other be granted by the State.

Tramways, &c., Act, 1883.

Accordingly in 1883 the Tramways and Public Companies (Ireland) Act, 46 and 47 Vic., cap. 43, was passed, based on the principle of resting primarily on local responsibility as regards both finance and control, but placing a partial Imperial guarantee as regards the former behind the local guarantee, with a view both of diminishing the pecuniary burthen on the locality and of improving the value of the security.

Procedure.

Persons intending to promote a scheme for a Tramway or Light Railway under the Act were required in the first instance to form themselves into a company under the provisions of the Limited Liability Acts. They must then publish certain notices, and deposit *inter alia* with the Secretary to any Grand Jury concerned, and with the County Surveyor and the Clerk of each Union through which the line passes, plans, sections, and lists of owners of property affected (the County Surveyor, particularly so far as their scheme affects the county roads in his charge) and obtain a report from an Engineer nominated by the Board of Works, that the scheme is feasible from an engineering point of view—these provisions having been laid down by previous Irish Tramway Acts which are incorporated with that of 1883. If these preliminary requirements were duly complied with, the case came before the Grand Jury, who, in the event of opposition, heard both sides by Counsel, and if favourable to the proposal made a presentment charging certain baronies or parts of baronies with interest at a stated rate on prescribed portions of the capital, either in perpetuity or for a fixed term of years, the district becoming bound to make good the ascertained half yearly deficiency in the net receipts to the amount of such interest. Such presentment has also to provide for the completion and working of the undertaking at the cost of the district in the event of the promoters making default in so doing, and for its becoming vested in the Grand Jury if such default continued beyond a certain period; also for the representation of the district in the management and in the finance of the line, and it had to satisfy other conditions laid down in the first section of the Act. The promoters having so far succeeded, had next to submit to the Privy Council of Ireland a Draft Order in Council embodying the scheme, and if all was in order the case was considered by a Committee of Council, promoters and opponents being heard by Counsel as before. If, however, there was any defect in these formalities the Privy Council had no power such as that possessed by the Standing Orders Committees of Parliament to overlook or condone such defect. The Committee of the Privy Council were supplied with the Report of the Board of Works on the estimated cost of the scheme, and after hearing the case might if the Order were unopposed finally approve (with the consent of the Treasury) or reject it; but if it were opposed and yet granted, confirmation by Parliament was necessary before it could take effect. This confirmation is given as was determined in the case of the Cork and Coachford Bill in 1886 by a public Bill. A deposit of five per cent. of the capital had to be made as in the case of a private Act of Parliament before the powers given by the Order could be put in force. The local guarantee runs from the date of the payment of each instalment of capital unless otherwise specially provided, but it is not until a line has been completed under this Act and opened for traffic that the direct pecuniary responsibility of the State begins. Section 9 of the Act authorizes the Treasury to repay to the district one half the amount it has been required to pay under the guarantee on account of any half year's working, subject to the limitations that:—

Treasury contribution.

(1.) The line is maintained in working order, and carries traffic;
(2). No more than 2 per cent. on the capital shall be so paid;
(3.) The liability of the State is limited to £40,000 per annum in all.

The Act of 1883 made some few relaxations in the then existing Tramway Law (Section 23), and it contemplated (Section 1 (6), a single company being responsible for two or more lines or (Section 11.), a subscription by an existing railway company to a scheme for a light railway or tramway.

Royal Commission of 1886.

The Royal Commission on Irish Public Works, of which Sir James Allport was Chairman, reported in 1888 that apart from the question of the extent to which the guarantee might require to be enforced, the results of the Act of 1883 had not been such as had been hoped and expected.

They attributed this comparative failure :—

(1.) To the cumbrous and consequently expensive procedure under the Act ;

(2.) To the form which the guarantee takes in practice, no payment being capable of being made for any half-year till several months after its close, and the Government contribution from its indirect character giving practically no additional value to the stock ;

(3.) To the great liabilities imposed upon the district, not only for interest, but for working expenses ;

(4.) To the great responsibility thrown upon the Privy Council ;

(5.) To the fact that no existing Railway Company could promote a line under the Act ;

(6.) To the encouragement given by the Executive Government to the promotion of lines on the three feet gauge.

The Commission also passed some general criticisms on the principles of the Act based on the want of independent control throughout the proceedings, the constitution of the public bodies by whom the guarantees were given, and the danger that such lines might become a means of investing money simply on the strength of the guarantee, the holders of the stock having no personal concern in the success or efficient working of the line, or even in its proper construction, inasmuch as the interest on their capital is in any case secured to them under the guarantee.

Recommendations of Royal Commission

The Royal Commission came to the conclusion (1) that railway extensions cannot be made without State assistance in the parts of Ireland in most need of them; (2) that if such assistance were given it should be given in the clearest and most direct way consistent with the preservation of local responsibility and with the existence of some provision for its ultimate discontinuance, and they, therefore, recommended that the Government should grant to the constructors of any approved line 3 per cent. on the necessary capital, and that the district should guarantee in addition the equivalent of a rate of sixpence in the £1 on the annual rateable value, this local contribution being allotted in the first instance to meeting any excess of working expenses above the income of the line, and subject to this to the reduction of the payments by the Government under the guarantee.

As regards the gauge they recommended that wherever possible the gauge should be the standard gauge and that the lines should be "Light Railways."

The Light Railways recommended were :—

(1.) From Downpatrick to Ardglass.

(2.) From Letterkenny *via* Kilmacrenan, Creeslough, and Dunfanaghy to Cross Roads.

(3.) From Stranorlar *via* Glenties and Ardara to Killybegs.

(4.) From Ballina *via* Killala to Belmullet.

(5.) From Galway to Clifden *via* Oughterard.

(6.) From Killorglin to Valentia.

(7.) From Skibbereen to Baltimore.

(8.) From Kinsale Station to Kinsale Harbour.

(9 & 10.) Short branches at Bantry and Dungarvan.

These recommendations are in addition to lines which have been, since the date of the Report, constructed under other arrangements.

Light Railways Act, 1889.

In the Session of 1889 the Government introduced the Light Railways (Ireland) Bill, the object of which was to give effect to some of the recommendations of the Commission.

It provided that the Lord Lieutenant in Council might from time to time declare that it is desirable that Light Railways should be constructed between certain places for the development of Fisheries and other industries, but that owing to the circumstances of the district special assistance from the State is required for their construction.

State assistance under Act of 1889.

The State assistance was to be derived (*a*) from the balance of the annuity of £40,000 given by the Tramways and Public Companies Act, 1883; (*b*) from a capital sum of £600,000 to be provided by Parliament; (*c*) from an additional annuity of £2,000. Owing to Parliamentary exigencies the Bill, as finally passed, was confined practically to these provisions and to the incorporation of the procedure of the Tramways Acts, and none of the desirable amendments in previous legislation were included.

The Act was to apply only (*a*) where the promoters of the Light Railways are an Irish Railway Company having a railway open for traffic, or (*b*) where the promoters have made an agreement approved by the Treasury for the maintenance, management, and working of the Light Railway by such Railway Company, or (*c*) where a baronial guarantee was given for the payment of dividends upon a portion of the capital pursuant to the provisions of the Act of 1883. The aid of the Treasury might take the form of a capital sum or of an annual payment or partly one and partly the other, and the capital sum might be a free grant or a loan, or partly one and partly the other. The adjustment of the two forms of aid, annual payment and capital sum, so as not to exceed the limits of the Treasury assistance already stated, was directed to be made on the basis of 3 per cent.

Scheduled Lines.

The Act received the Royal assent on 30th August, 1889, and in the *Dublin Gazette* of the 1st November, the following lines were scheduled :—

1. Buncrana to Carndonagh; 2. Letterkenny to Dunfanaghy and Gweedore; 3. Stranorlar to Gweedore; 4. Stranorlar to Glenties; 5. Donegal to Killybegs and Glenties; 6. Ballina to Belmullet; 7. Westport to Belmullet; 8. Galway to Clifden; 9. Headford to Kenmare; 10. Killorglin to Valentia; 11. Downpatrick to Ardglass; 12. Skibbereen to Baltimore; 13. Kinsale Pier; 14. Bantry to Bantry Pier.

And in the *Dublin Gazette* of 24th December the following further lines were scheduled :—

15. Letterkenny to Doochary Bridge, Glenties and Killybegs; 16. Claremorris to Clifden.

At the same time it was intimated that it must be distinctly understood that the money voted by Parliament would not be sufficient to construct all the lines so scheduled, and that the choice of those selected would in part be determined by the character of the arrangements which could be made with the promoters.

In addition to matters to be reported on by the Board under the provisions of the Tramway Act of 1860, we were required under this new Act of 1889 to report upon (1) the propriety of the amount fixed as the nominal capital for the construction of the line, &c., and (2) the merits of the proposed line in all points of view.

Statements of all the lines proposed under the Act, with the names of the promoters, and the investigators who held the inquiries on our behalf, are contained in former Annual Reports and need not be here repeated, but it may be observed that in the first instance no existing Railway Companies appeared to promote lines, except in the case of the line from Donegal to Killybegs, that from Downpatrick to Ardglass, and the short extension of the Bantry line to Bantry Bay.

Result of inquiries.

As a result of the inquiries held early in 1890 we recommended to the Grand Juries (subject to the limits of the financial assistance given by the State) the following lines, and the last column of the table shows the action of the Grand Juries thereupon at the Spring Assizes of 1890.

County.	Lines.	Length—Miles.	Gauge.	Estimate.	Free Grant.	Guarantee.	Action of Grand Juries.
				£	£	£	
Donegal, .	Donegal and Killybegs, . .	18¾	N.	116,600	115,600	1,000	Guaranteed.
„ . .	Stranorlar and Glenties, .	24½	N.	117,000	116,000	1,000	Do.
„ . .	Letterkenny and Crossroads, .	45	N.	236,000	235,000	1,000	Disapproved.
„ . .	Buncrana and Carndonagh, .	18½	N.	87,500	62,500	15,000	Guaranteed, but presentment not fiated.
Mayo, . .	Ballina and Belmullet, . .	39½	N.	154,000	153,000	1,000	Guaranteed.
„ . .	Westport and Mallaranny, .	18	B.	110,100	109,100	1,000	Do.
„ . .	Ballina and Ballycastle, . .	15	B.	74,500	73,500	1,000	Do.
Galway, .	Galway and Clifden, . .	49¼	B.	245,600	244,600	1,000	Do.
Kerry, . .	Headford and Kenmare, .	19¾	B.	110,000	50,000	60,000	Do.
„ . .	Killorglin and Valentia, .	26¾	B.	155,000	85,000	70,000	Do.
Cork, . .	Baltimore Extension, . .	7¾	B.	56,700	56,700	—	Approved.
„ . .	Bantry Bay Extension, . .	1¾	B.	30,000	20,000	—	Do.
Down, . .	Downpatrick and Ardglass, .	8	B.	51,000	30,000	17,000	Guaranteed.

Reconsideration.

In the prolonged and careful discussions which subsequently took place during the summer of that year both in London and Dublin between the Treasury, the Irish Government, and the Board of Works, the points chiefly emphasised were (1) the necessity of reducing as far as possible or at any rate of defining the limits of the local liability; (2) the necessity of securing the construction and if possible the future working and maintenance of the lines by existing Railway Companies in a strong financial position. The application of these principles to the above table would have excluded all the lines except the Bantry Bay Extension and the Ardglass line, as none of the principal Railway Companies of Ireland had come forward under the new Act to proceed with the schemes as approved by the Grand Juries, and would have necessitated the construction of the lines either by Companies with no capital, except that supplied by the State or by local guarantees, or else directly by this Board; and secondly the working and maintenance of the lines by those Companies under conditions of management and earning power least likely to lead to success, and involving very serious financial liabilities under the guarantee given by the localities not only for interest on the guaranteed capital but for any deficit in working expenses.

The Government therefore decided as far as possible to deal directly with existing Railway Companies, and a beginning was made with the Midland Great Western Railway Company in connection with the Galway and Clifden line.

Clifden and Killala lines

After prolonged discussion it was arranged that the Company should enter into an agreement for the construction, working, and maintenance of the line from Galway to Clifden, and of the first portion, from Ballina to Killala, of the North Mayo line in consideration respectively of the payment by the Government of capital sums of £264,600 and £44,000.

At the same time the Company undertook not to ask the localities for a guarantee on any capital in respect of these lines. This undertaking has the advantage to the Company of dispensing with local directors and audit of accounts, and to the localities of removing any liability for working expenses.

After the main features of this arrangement had been agreed to, as it was clear that fresh presentments would be required, and as it was desirable, in view of the possible necessity of providing relief works to meet distress in case of the failure of the potato

Railways (Ireland) Act, 1890.

crop, not to wait for the Spring Assizes of 1891, the Railways (Ireland) Act, 1890, was introduced and passed, for the purpose of enabling special sessions to be held to consider the Railway Schemes mentioned in the First Schedule to the Act, viz. :—

Galway to Clifden.
Westport to Mallaranny.
Ballina to Killala.
Headford to Kenmare.
Killorglin to Valentia.

Section 5 of the Act also authorizes the construction of a railway other than a light railway under any agreement made by the Treasury under section 4 of the Act of 1889.

The Railway Act received the Royal Assent on the 18th August, 1890, and shortly afterwards the then Financial Secretary to the Treasury came over to Dublin and entered upon personal negotiations as regards the other lines.

Baltimore and Bantry lines.

The terms of the agreement were settled for the construction of the Skibbereen and Baltimore line, and its future working and maintenance by the Cork, Bandon, and South Coast Railway Company, the free grant amounting to £56,700.

The same Company also entered into an agreement for the construction, working, and maintenance of the short extension from the existing station at Bantry to the water side, in consideration of a free grant of £15,000.

Mallaranny line.

An arrangement was made with the Midland Great Western Company for the construction, working, and maintenance of a Railway from Westport to Mallaranny, on terms similar to those of the Galway to Clifden, and Ballina to Killala agreements, except that in consequence of the greater difficulty of the line, the mileage rate of the Treasury contribution was largely increased.

Kerry lines.

In the case of the Kerry lines, while the Great Southern and Western Railway Company had expressed a willingness to work the line from Headford to Kenmare on not unfavourable terms, they were unwilling to work the Killorglin to Caherciveen line without a local guarantee.

In the end, however, the Company agreed to take over the construction, working, and maintenance of both lines in consideration of a free grant of £50,000, and a guarantee under the Act of 1883 at 4 per cent. on a capital of £60,000 in the case of the Kenmare line, and a free grant of £85,000 and a similar guarantee on £70,000 in the case of the Caherciveen line.

Transfer of Railways Act, 1890.

In the negotiations with this Company some amendments in the law were found to be desirable, and, accordingly, in the autumn Session of 1890, the Transfer of Railways (Ireland) Act was passed, giving powers for the transfer to and vesting in a Railway Company of any undertaking that had obtained a presentment under the Tramways (Ireland) Acts.

At the same time baronial guarantees were to remain in force, and the Railway Company to which the transfer might be made was authorized to issue baronial guaranteed shares, and themselves to guarantee punctual payment of dividends, or, in lieu of such shares, to create and issue debenture stock equal in amount to the guaranteed stock, the Company being regarded as the holder of the guaranteed stock unissued and entitled to receive the dividends thereon.

Section 17 of the same Act gave power to the promoters of any light railway with whom the Treasury had made an agreement to enter upon any land which they were authorized to take on depositing in the Bank of Ireland such sum as may be certified to be proper by a valuer appointed by the Board of Public Works.

South Donegal Railways: history.

The case of the South Donegal Railways presented the greatest difficulties.

The starting point of the system is at Strabane, from which the Finn Valley Company had constructed a standard broad gauge line to Stranorlar. This line was orginally worked by the Irish North Western Railway, but in more recent years the working has been carried on by the Company itself, with its own waggons and carriages, but with engines hired from, and run by the Great Northern Railway Company at a mileage rate.

In 1879, the West Donegal Line from Stranorlar to Donegal, on the narrow gauge, was promoted, and the Finn Valley Company entered into an agreement to work it for 70 per cent. of the gross earnings, with a guarantee that the owning Company's proportion should not be less than £2,500 per annum, the working per-centage to be lowered as the traffic increased.

The West Donegal Company were granted a loan of £50,000 by the Board of Works, on condition that the Company provided an equal amount. This condition not being fulfilled the issues of the Government loan were stopped at £40,000, and the

construction of the line ceased at a point known as Druminin, in a field four miles from Donegal. In consideration of this shortening of the line the minimum payment by the Finn Valley Company was reduced to £2,000 till the line should be completed, but the effect of the non-completion of the line was such that the earnings were never sufficient to produce £2,000 per annum after deducting the working percentage of the Finn Valley Company, and that Company had therefore to make up the deficit from the earnings of its own line and not only ceased to be a dividend paying concern but accumulated considerable arrears. At the same time the inconvenience to the public was excessive, and finally, in 1886, a separate Company (with a guaranteed five per cent. capital of £19,000), under the Act of 1883, obtained an Order in Council for building the remaining four miles to Donegal. In relief of the guarantee, £400 was hypothecated of the £2,500 minimum payment by the Finn Valley Company.

There were thus in existence (1) a broad-gauge line worked by the owning Company with its own waggons and carriages, but with engines hired from and run by the Great Northern Railway; (2) a narrow-gauge line, provided with rolling stock; and (3) a narrow-gauge line without rolling stock, both of which were worked by the broad-gauge Company. It should be added that the terminal station at Donegal was built under a separate arrangement, and was merely rented.

Under such circumstances it was obviously impossible to secure such substantial security for the working and maintenance of the lines with freedom to the locality for any liability for working expenses, as had been aimed at and attained in Mayo, Galway, and Kerry.

A further element of difficulty was introduced by the fact that one of the proposed lines (to Killybegs) was an extension of a narrow-gauge line and must be built of the same gauge.

Killybegs Line.

An agreement for the construction, working, and maintenance of this line was therefore made with the West Donegal Company which held the presentment of the Grand Jury for a guarantee on a capital of £1,000, carrying with it the liability of the guaranteeing area for any deficit on working expense.

Glenties Line.

It remained to deal with the Glenties line for the construction of which the Chief Secretary had given a promise during his visit to Donegal in the autumn of 1890.

In view of the weak financial position of the Finn Valley Company negotiations were opened with the Great Northern Railway Company for the construction, &c., of the line, but that Company was unable to come to terms with the Finn Valley Company for the acquisition of its line, on a working agreement, which it regarded as an indispensable preliminary, and the negotiations therefore fell through.

The only alternative was to make an agreement with the Finn Valley Company, and to obtain at the same time such a re-arrangement of the Donegal Railway system as would afford the best guarantee for its future success.

Amalgamation of South Donegal Companies.

With this object all the Companies concerned agreed to amalgamate, and it was decided to alter the Finn Valley line from broad to narrow gauge. This at first sight retrograde step was justified by the fact that it would enable the same engines and rolling stock to be used over the whole system from Killybegs and Glenties to Strabane, and would not only save the expense and delays due to the break of gauge at Stranorlar, in addition to the necessary change at Strabane, but would get rid of the arrangement for the hire of engines from the Great Northern Railway.

It was felt, however, that such a change should not be effected until every attempt had been exhausted to maintain the existing gauge to Stranorlar with a broad gauge extension to Glenties.

Accordingly a further meeting took place at the Treasury, between the representatives of the Great Northern Railway and the Donegal Companies, in the summer of 1891, and terms were agreed to for the working of the Finn Valley Line by the Great Northern Railway with a view to the construction and working of the Glenties line by the latter Company.

The arrangement, however, failed to obtain the approval of the proprietors of one of the lines concerned, and therefore fell through.

There was accordingly no alternative left but to construct the Glenties line as a narrow gauge line, as part of an amalgamated narrow gauge system for Southern Donegal.

The amalgamation of the Companies concerned was effected by an Act in 1892, under the style of the Donegal Railway Company, and by a further Act of 1893, the amalgamated Company obtained powers to build a separate station at Strabane with the necessary approach line.

These works to which your Lordships have given the assistance of a loan of £13,000 are now approaching completion. The Killybegs line was opened in August of 1893;

it is hoped that the Glenties line will be completed and opened before the autumn of 1894, and that by that time the whole narrow gauge system of 72 miles will be in full working order.

That this result was not reached without immense trouble to every one concerned will be apparent from the above statement, from which it will be seen that nearly every possible complication due to working arrangements, financial difficulties, legal obligations, and local and in some cases even personal feelings had to be reduced to order, but the final result will, we believe, justify all the trouble that preceded it, by the benefits that it will confer on the districts through which the old and new lines run, and on the Companies themselves.

Achill Extension Line.

In the case of the Westport Mallaranny line the fixing of the terminus at Mallaranny had been due partly to the limitations of the Parliamentary grant and partly to the uncertainty as to the direction of future extensions.

In the Autumn of 1890, however, the Chief Secretary, in view of the then approaching distress, decided that the line should be extended to Achill Sound, primarily as a relief work, and the Midland Great Western Railway Company intimated their willingness to work the line when completed.

The negotiations with the Company have been somewhat protracted, turning as they did on engineering and other details, on which, while there was great diversity of opinion, there was no means of obtaining an authoritative decision by a third party. We are glad, however, to be able to report that a settlement has been arrived at, and that a contract has been let and is now rapidly being executed for the completion of the line in accordance with the terms agreed upon with the Company.

Claremorris and Collooney Line.

The last line that we have to mention is that from Claremorris via Swinford to Collooney.

The works were first commenced as relief works. Subsequently presentments were obtained from the Grand Jury of the County of Mayo for a guarantee under the Act of 1883 at four per cent. on a capital of £40,000, in respect of the Claremorris and Swinford portion, and from the Grand Jury of Sligo for a similar guarantee on a capital of £80,000 for the Swinford Collooney portion. The remainder of the cost was made up by a free grant, and an agreement was made with the Waterford and Limerick Railway Company for the construction, working, and maintenance of the line.

This line in combination with the recent extension of the Athenry and Tuam line to Claremorris, will provide direct through communication from Limerick and the south, to Sligo, and via the Sligo, Leitrim, and Northern Counties Railway to Enniskillen and the North. There are no difficulties of construction, and the line should be opened and working before the end of 1895.

Financial arrangements.

The assistance given by the State to the lines above enumerated, involved an excess over the sums authorized by Parliament, and necessitated an extension by the Light Railways Act of 1893, of the annuities previously authorized by £5,000. It had been provided by the Public Accounts and Charges Act, 1891, that the permanent annuities under the Act of 1889 might be capitalized, and the equivalent sum borrowed from the National Debt Commissioners to be repaid by temporary annuities. This policy has been carried out, and the sums borrowed from time to time for the railway service from the Commissioners have been converted into annuities with a currency of 10 years.

Taken together the state assistance authorized by the Acts of 1883, 1889, and 1891, represents an annuity of £65,000.

Of this amount £25,682 is hypothecated to the payment of the Treasury contribution of 2 per cent. on the lines constructed under the Act of 1883 solely, the guaranteed capital of which amounts to £1,284,112.

A further sum of £5,040 is required for a similar contribution on a total capital of £252,000, guaranteed under the Act of 1883 for the lines constructed under the Act of 1889, viz., Killybegs, £1,000, Glenties, £1,000, Collooney-Claremorris, £120,000, Kenmare, £60,000, Caherciveen, £70,000.

The balance of £34,278 capitalised at 3 per cent. will be sufficient to cover the free grants made under the Acts of 1889, and leave a small margin for preliminary expenses incurred by this Department and contingencies.

Those of the agreements under the Act of 1889 that were completed before Orders in Council, January, 1891, and the relevant are included in House of Commons paper, No. 67 of 1891. Those since concluded have *mutatis mutandis* followed on the same general lines.

Under the Act of 1883, 295½ miles of railway have been constructed, of which only 50¾ miles are on the standard gauge.

The extensions under the Act of 1889 amount to 236¾ miles, of which only 43¼ miles are on the three feet gauge.

Of the 1883 lines only three are worked by established Railway Companies that were in existence before the passing of the Act, the remainder are worked either by the promoting Companies or by other Companies established under the Act or by committees of Grand Juries. In all there is a liability not only for the guaranteed interest but for any deficit on working expenses. For all the 1889 lines, arrangements for working and maintenance have been made with existing Companies, and in the majority of cases under such conditions that no liability for working expenses can accrue to the locality, while the amount of capital on which interest is guaranteed is, relatively, a small proportion of the total cost of the lines. The freedom from liability for working expenses is probably the point on which the 1889 lines bear the most favourable comparison with those of 1883.

III.—NON-VOTED SERVICES.

Non-voted services.

Arterial Drainage Works.
Arterial Drainage, Maintenance and Increased Rents, and Railway Clauses Consolidation Act.
Fishery Piers and Harbours Acts, 1846 to 1883.
Fishery Piers and Harbours Maintenance.
Arklow Harbour.
Shannon Navigation.
Sea and Coast Fisheries (Ireland) Loan Fund.
National Monuments and Ecclesiastical Ruins, 33 & 34 Vic., c. 46.
Post Road Repairs.
County Surveyors' Assistants.
Bridges between Counties.
Limited Owners' Residences.
Arbitrations—For Railways and other Public Works.
Loans—Receivers' Accounts.

This division of our duties comprises a variety of services placed under our control or management in pursuance of several Acts of Parliament. Though numerous, some of them are of only casual occurrence, and therefore do not form the subject of any special remarks.

Arterial Drainage.

Those on which reports follow include Arterial Drainage works, where, except in the matter of occasional maintenance, our functions, in addition to making loan advances, are confined to advice to Drainage Trustees and Boards, to making final awards for completed works, distributing the proper proportion of charges among the proprietors of land in each district, and subsequently apportioning the charge on any lands sub-divided, and, when called upon to do so, increasing the rents of tenants in respect of ascertained improvements.

Piers and Harbours.

We are charged with a variety of duties in connexion with fishery piers and harbours which have been constructed by Government grants and by contributions from counties, and persons locally interested in these works. This duty is not confined to new works, but extends to the very numerous piers which have been constructed from time to time by Government aid since the year 1820, and which, although vested in counties, frequently require the direct interference of Government, either in the matter of repairs or otherwise.

Navigations.

The administration of the Shannon and other navigations in Ireland, whether maintained from their own funds, as in the case of the Shannon, or partly by votes of Parliament, involves considerable care and attention.

Fishery Loans.

The whole assets of the Irish Reproductive Loan Fund and of the Sea Coast and Fisheries Fund have been handed over in accordance with the Purchase of Land (Ireland) Act, 1891, to the Congested Districts Board, with the exception of £20,000 of the latter Fund, which remains in our charge, and is available for Fishery Loans in all the non-congested portions of maritime counties of Ireland.

National monuments.

Another important branch is the care and preservation of 137 National ecclesiastical structures which have been vested in us from time to time, and are maintained out of

the balance and income of a grant of £50,000 allocated for the purpose from the Irish Church Fund in pursuance of the Irish Church Act, 1869. Particulars of the works undertaken during the year under this head will be found in Appendix (H).

Certain duties in connexion with the Grand Jury system of Ireland still devolve on us, the principal of which are the occasional repair of Post Roads, the examination of County Surveyors' Assistants, the building of bridges between counties, and other miscellaneous duties.

We are also charged with certain duties in connexion with Limited Owners' Residences, Arbitrations under the Railway Acts, and in aiding the Local Government Board with certain financial duties connected with the Public Health Act, Emigration Seed Supply, &c.

Lunatic Asylums.

The Commissioners for the General Control and Correspondence, and for Superintending and Directing the Erection, Establishment, and Regulation of the Asylums for Lunatic Poor comprise the Chairman of this Board associated with the Inspectors of Lunacy and other gentlemen, and the duties have been carried on as if forming part of the regular duties of this department.

Receiver Accounts.

The Board, acting under the powers conferred on them by the 45th, 46th, and 47th sections of the Act 1 & 2 Wm. IV., c. 33, and by deeds of mortgage, have entered into possession of the Letterkenny and Southern Railways, and exercise control over the revenues of Galway Harbour.

The Annual Accounts in these matters are included under the head of Miscellaneous Services, as detailed in the Appendix (D 7), pages 62–65.

Railway and Canal Traffic Act, 1888.

During the year we have been called upon to frame a Schedule of Tolls, &c., and classification of goods for the Shannon Navigation under the Railway and Canal Traffic Act, 1888. As the necessary steps under that Act have not yet been completed, we defer our complete report upon the matter to our next Annual Report.

Details of our operations under this division of our duties will be found in Appendix B), page 30. Details of Non-Voted Services.

Loans.

IV.—LOANS.

(1). Loans secured on Undertakings, *e.g.* :—

For Inland Navigation, Harbours, Railways, &c., under 1 & 2 Wm. IV., c. 33.
For Labourers' Dwellings in Towns, and Housing of Working Classes, under Acts of 1866, 1885, and 1890.

(2). Loans secured on Rates, *e.g.* :—

To Grand Juries for Roads, Bridges, Piers, Harbours, Lunatic Asylum Buildings, Courthouses, Reformatories, and Industrial Schools.
For purposes sanctioned by the Public Health Acts.
For Labourers' Dwellings under the Act of 1883.
For Dispensary Houses.

(3). Loans secured on Lands, *e.g.* :—

For Arterial Drainage Works.
For Arterial Drainage Maintenance.
To Owners for improvement of Lands, viz. :—Drainage, erection of Farm Houses and Buildings, of Dwellings for Agricultural Labourers ; Planting for Shelter (10 Vic., c. 32, &c.)
To Tenants for improvement of their Holdings, viz. :—Drainage, and most of the purposes included in the previous service (44 & 45 Vic., c. 49).
For Purchase under Land Act, 1870.

(4.) Miscellaneous Loans, *e.g.* :—

Glebe Loans.
For National School Teachers' Residences.
For Seed Supply under Acts of 1880 and 1890, &c.

(5.) Irish Church Fund Loans—secured on Rates or Lands.

The extent and variety of the purposes for which loans are made by the Board are made clear by the abstract of Accounts of Loans for Public Works given in Appendix (C), with the remarks on the several services following thereon, and as regards the year

1893-4, by the following statement of the different purposes for which loans have been made during the year.

Total Number of Loans for each Class.	PURPOSES OF LOANS SANCTIONED 1893–94.	No.	Amount.	Total Amount for each Class.
	CLASS I.—LOANS SECURED ON UNDERTAKINGS.		£	£
	Harbours,	1	3,000	
	Railways,	1	13,000

ADVANCES, REPAYMENTS, AND ARREARS.

Advances, repayments, and arrears.

The earliest mention of Public Works Loans to be found in the Abstract submitted by the Board is in connection with the Statute 57 Geo. III., c. 34, passed in 1817. The total of all loan advances from that date to 31st March, 1894 (with certain loans made under special Acts before 1817), is £39,922,334.

The classified abstract in Appendix (C), pages 42–45, shows how this amount has been disposed of, by repayments, remissions, balances outstanding, &c.

	£
Total Repayments,	23,293,054
Total Remissions,	7,992,265
Written off from Local Loans Fund,	197,125
Outstanding Balances,	8,439,890
	£39,922,334

This outstanding balance is represented in the books of the Office by 25,682 open accounts. The loans are generally in course of repayment by half-yearly instalments.

The advances to borrowers in the year 1893–94 out of moneys advanced by the National Debt Commissioners were £417,251, as against £460,648 in 1892–93, and £438,878 in 1891–92.

The amounts received in the year were £440,479, in repayment of principal, and £266,765 in respect of interest, making together £707,244. Of the latter amount, £649,371 was paid to the National Debt Commissioners, and £57,874 to the Irish Land Commission in discharge of principal and interest of loans made out of the Irish Church Fund.

Dublin South City Markets Company.

The amount outstanding of the loans to the Dublin South City Markets Company has been very largely reduced.

The Company were incorporated by their Act of 1876, with a share capital of £200,000 and a loan of capital of £50,000 for the establishment of a market, and in 1879, by the Dublin South City Market Amendment Act of that year they acquired further powers for improving their market undertaking, and for that purpose were authorized to acquire additional lands, and raise additional capital. By the same Act the undertaking of the Company was for the purposes of borrowing, divided into two portions—one called "the market," and the other "the residue of the undertaking." By a further Act obtained in the year 1883 the provisions of the Act of 1879 as to raising additional capital were amended, and the Company were authorized to borrow an additional sum of £25,000 upon the security of the net revenues of the market, and another sum of £75,000 upon the security of the net revenues of the market or any property comprised in the residue of the undertaking, including therewith if thought fit as additional security the net revenues of the market applicable to dividend on ordinary or preference capital.

On the security of the undertaking, the Company borrowed from this Board in 1881 £50,000, and in 1884 a further sum of £25,000, of which, on the 26th June, 1893, there remained due £46,992 16*s.* 9*d.* In 1884, on the security of "the residue," and of the net revenues of the market they borrowed a sum of £25,000, and in 1886 a further sum of £20,000, in 1888 a further sum of £10,000, and in 1889 a further sum of £10,000, making in all £65,000 out of which on the same date there remained £59,934 4*s.* 4*d.* still due.

The Company considered that it would facilitate the repayment of the monies owing to the Board and improve the position of the debenture holders and the undertaking generally if they were allowed, without increase of borrowing powers (1) to consolidate the several securities existing in respect of the advances made by this Board, and make them a charge upon the whole undertaking, and (2) to issue consolidated debenture stock, to be applied—1st, in exchange for or replacement of existing debenture stock; 2nd, for the purpose of providing funds for the repayment to this Board of their loan, or for the purpose of providing funds for the general purposes of the Company, the total amount including the outstanding amounts from time to time remaining owing on the existing loans not to exceed £150,000.

A Bill for the purpose of carrying out these objects was accordingly with your Lordships' consent given on the advice of this Board introduced into Parliament, and received the Royal Assent on the 26th June, 1893.

We are glad to be able to report that out of the proceeds of the Debenture stock issued under the Act, which now stands at a substantial premium, we have already received payments amounting to £30,000.

Arrears generally

With regard to the whole Loans Service, the following table shows the payments, and the arrears of principal and interest for the last four years :—

—	Payments.	Arrears.		
		Principal.	Interest.	Total.
	£	£	£	£
1890–91,	921,997	287,038	216,752	503,790
1891–92,	653,937	319,097	232,273	551,370
1892–93,	733,044	346,531	201,743	548,274
1893–94,	707,244	366,857	195,030	561,887

The following Abstract shows the services on which these arrears occur :—

—	31st March, 1891.	31st March, 1892.	31st March, 1893.	31st March, 1894.
	£	£	£	£
Public Works Loans generally,	24,274	30,147	30,825	33,824
Clare Slob Reclamation Loan,	33,442	38,517	—	—
Public Health Act,	2,340	2,488	2,056	2,029
Railways,	348,283	388,766	424,124	429,595
Land Charges, payable by Owners,	73,288	70,061	65,030	61,729
Do., do. Occupiers,	7,245	7,992	10,053	10,026
Seed supply,	14,918	13,399	16,186	24,684
	503,790	551,370	548,274	561,887

It will be observed that taken as a whole the arrears have increased by nearly £13,613 as compared with a decrease in 1892-3 of £3,096 over the arrears as they stood on the 31st March, 1892.

In order, however, to arrive at the real increase, it is necessary to take into account the arrears included in the amount written off from the Local Loans Fund by the Public Works Loans Act of 1893. That amount was £42,174, made up of principal arrears of £18,875 and principal not yet due of £23,299. The interest arrears connected with the amount written off are not specially mentioned in the Act, but they amounted to £18,040. The total arrears therefore on the 31st March, 1894, would, but for the operation of the Public Works Loans Act, 1893, have stood at £598,802.

Public Works Loans.

The increase of arrears under the heading—"Public Works Loans generally" by £2,999, is due to the re-inclusion in the arrears of some principal repayments due in respect of Carrickfergus Harbour, with which the Town Commissioners who guaranteed the loan are about to take powers to deal, and to arrears of principal on the earlier Newry Navigation loans which cannot for the present be avoided. The interest, however, continues to be punctually paid, and we have received an instalment of principal on the last Newry loan.

There is a small further reduction of £27 on Public Health Loans, continuing the satisfactory tendency of previous years.

Railway Loans.

On Railways there is apparently only an increase of £5,471, but to this must be added the large write-off made in the Loans Act, 1893, in the case of the Waterford and Wexford Railway between Wexford and Rosslare, in connection with the agreement by which the Harbour and Railway are to be taken over by a new Company.

Rosslare Harbour.

The fact that the Company has to expend a considerable sum on their acquisition implies a confidence on their part which encourages the hope that substantial public advantage may yet result from the large expenditure in connection with Rosslare Harbour.

As regards the other Railway loans we can only repeat from our report last year that the revenue returns do not show much sign of improvement, and while special expenditure in some cases is still necessary in order to put the lines into a satisfactory condition, the cost of working owing to the requirements of the Board of Trade and the public demands for increased facilities and accommodation has a constant tendency to rise. We fear, therefore, that for some years the arrears of both principal and interest cannot be expected to show any decrease.

Sligo, Leitrim, and N. C. Railway.

During the year we invited, by your Lordships' direction, offers for the purchase of the Sligo, Leitrim, and Northern Counties Railway on which we hold a mortgage for nearly £100,000, in addition to large arrears of interest.

The matter has given rise to considerable difference of opinion in the district immediately affected, and in the rival ports of Belfast and Londonderry which compete with Sligo. The offers received were submitted to your Lordships, and the matter is still under consideration.

Land Loans.

In the case of Land Charges payable by owners, there is a gratifying apparent decrease of £3,301, or an actual decrease of £1,647 after allowing for the operation of the Loans Act, 1893.

A similar allowance however in the case of Land Charges payable by occupiers, converts the apparent decrease of £27 into an actual increase of £573. An unsatisfactory feature in this case is the tendency for arrears to increase in particular districts.

The arrears due under the Seed Supply Act, 1880, remain as before at £12,057.

Seed Loans.

Under the similar Act of 1890, the fact that the second instalment fell due during the year, has caused an increase of the arrears by £8,498. We are glad, however, to be able to state that at the date at which we write the total arrears under the Act of 1890 have been reduced to £3,125.

This result is mainly due to the advice and assistance given to us by the Local Government Board in consequence of which we have been able to adjust our demands to the necessities and resources of the Unions concerned, and we have pleasure in calling your Lordships' attention to the service thus rendered.

Public Works Loans Act, 1892.

By the Public Works Loans Act, 1892, sec. 6, it is provided that unless payment be made within thirty-one days of the date on which it is due, of any sum payable in respect of principal and interest under any loan created, or any rentcharge granted after the passing of the Act, there shall be paid to us one shilling in the pound on the sum due as receiver's fee thereon, to be charged, payable, and recoverable in the same manner as the said sum.

Specific notice of this important clause is given to all new borrowers, and it can scarcely fail to have a considerable effect in encouraging promptitude of payment.

Legislation, 1893-4.

During the year 1893-4 the following Acts were passed affecting the Loans Services.

By the Act 56 & 57 Vic., cap. 33, we were empowered to lend for the housing of the working classes to Town Commissioners who were not Urban Sanitary Authorities, and by the same Act some uncertainty was removed as to our lending power for the same purpose in other cases.

Lunatic Asylum Loans.

Attention has, in recent years, been called to the deficiency in the accommodation and the insuficient provision even of necessary appliances for the lunatic poor in asylums in Ireland, as compared with the number of patients requiring to be dealt with, and in consequence a large increase of expenditure on asylums became necessary.

Loans for this purpose were formerly granted under the Public Works Loans Act, 1877, and bore interest at 3½ per cent., being payable by an annuity for a term of fourteen years.

The Public Works Loans (No. 3), Act, 1893, authorized us to lend money for lunatic asylums for such a period, not exceeding fifty years, as your Lordships might direct, at the rate of 3½ per cent., or such other rate as may in the judgment of the Treasury be necessary in order to enable the loan to be made without loss to the Exchequer; provided that in determining the time for the repayment of the loan, regard shall be had to the probable duration and continuing utility of the works in respect of which the loan is required.

This section applies also to loans for the purpose of lunatic asylums which have not at the passing of the Act come into course of repayment, although made in whole or in part before the passing of the Act.

Your Lordships under the powers given by this section have been pleased to make the following rules in respect of the manner and period of repayment of, and rate of interest on, advances made by way of loan for the erection, extension, and enlargement of Lunatic Asylums :—

1. (*a.*) Loans, for permanent works and buildings, or for the acquisition of land, or for any easement in connection therewith, &c. :—

	Rate of Interest.
If repaid within a period of 35 years,	3½ per cent. per annum.
If repaid within a period of 50 years,	3¾ per cent. per annum.

(*b.*) Loans, for furniture, fittings, &c. :—

	Rate of Interest.
Maximum period for repayment, 20 years,	3½ per cent. per annum.

2. Each advance made in respect of a loan shall be repayable by equal half-yearly instalments of principal, interest being charged on the balance of principal from time to time outstanding, and the first instalment in repayment of each advance shall be presented for at the presenting term or Assizes immediately following the date of the certificate made by the Commissioners of Public Works in Ireland in pursuance of the Public Works Loans Act, 1877, and the Public Works Loans (No. 3) Act, 1893, as to the amount of such advance.

It will be observed that by these rules for all loans made under the Act of 1893, a system of repayment by equal instalments of principal is substituted for the system previously in force, by which both interest and repayment of principal were covered by an annuity fixed for a term of years, and with the view of giving effect to the rules it will be necessary for the Board to seek a Presentment at each Assizes—during the term of loan—for the instalment of principal and interest which shall have accrued in the half year preceding such Assizes.

The new terms have already been applied to loans amounting to £290,000.

Donegal Railway Co.

As we have already noticed, a loan of £13,000, to the Donegal Railway Company, has been sanctioned for the works authorized by the Company's Act of 1893, and the bulk of it has already been issued.

Westport Harbour.

A loan of £3,000 has been granted to the Commissioners of Westport Harbour for the improvement of the harbour, and the works are in progress.

Land Loans.

Of the two classes into which loans for Land Improvement are divided, *i.e.* (1) Loans to persons having estates which constitute them owners under 10 Vic., c. 32; (2) Loans to occupiers under section 31 of the Land Act—the former shows an increase, the latter a decrease in the number of applications. The increase in the former and, to some

extent, the decrease in the latter, are accounted for by the fact that tenant purchasers who, in their former capacity of tenants, would have applied under the 31st section of the Land Act, are dealt with under 10 Vic., c. 32, on applications for loans after purchase. Details with reference to these services will be found on pages 36–40.

The purposes for which applications for loans are made are chiefly field works, farm houses, farm buildings, including iron hay barns. Probably one-fifth of the applications are for field works, most frequently through drainage. There appears to be an increasing desire to improve the farm houses. Though expenditure on this class of works is not financially so profitable to the actual occupant as that on field works, farm offices, or hay barns, it adds to the value of the holding on sale, and affects a great improvement in comfort, health, and convenience, the desire for which is in itself an indication of a higher standard of living.

On the whole, the evidence of our Inspectors goes to show that the tenant purchasers who have also the option of borrowing under the Land Improvement Acts, exhibit a greater desire to improve their holdings and are more judicious in their proposals of expenditure than the tenant occupiers. The tendency in nearly all applications is to reduce the amount of the loan as closely as possible to the sum required for cash expenditure on labour and materials, with the result that the total value of the works executed is in many cases larger than the amount of the loan.

As your Lordships have been already informed, we instructed our Inspectors towards the close of the year under report to take advantage on their journeys of opportunities to inspect works executed on holdings in previous years, with a view to seeing whether the borrowers have observed their covenant in the deed of charge to maintain the works in proper repair. Speaking generally, it may be said that the state of the works has been found to be fairly good, but in the case of field works, especially drainage, numerous cases have been found where borrowers were depriving themselves of the benefit of works for which they must for many years continue to pay an annual charge, by neglect to keep them in working order.

In such cases a reminder is sent to the borrowers of the obligation to maintain with a statement of the works requiring to be done. The Board believe that there is, generally speaking, a disposition on the part of borrowers to act on the requisitions thus conveyed. In cases of persistent neglect to do so, the Board, with a view to the protection of the security for the loan, will be prepared to enforce the obligation to maintain, if necessary by legal proceedings.

The system of maintenance inspection is new, but it is believed that it will be effective, and contribute much to the prosperity of borrowers and the security of the Board's advances.

We have the honour to be

Your Lordships' obedient Servants,

R. H. SANKEY.

R. O'SHAUGHNESSY.

G. A. STEVENSON.

P. J. Tuohy, *Secretary.*

30*th June*, 1894.

APPENDICES.

APPENDIX (A).

Details of Voted Services.

PUBLIC BUILDINGS.

Royal Hospital, Dublin.—The Great Hall has been re-floored with oak parquetry. The firemains have been extended and a number of new hydrants fixed. The sewerage of the Adjutant General's Office has been renewed. A fire occurred in the Master's Stables, believed to have been due to the carelessness of servants, which caused a considerable amount of damage, and the necessary renewals have been carried out.

Coast Guard Buildings.—The new buildings forming the Coast Guard Station at Portrush have been completed and occupied, and contracts have been signed for the erection of new Stations at Bunowen and Waterville.

A new Station, including a residence for the Divisional Officer, has been commenced at Bunbeg, County Donegal, and four new Signal Stations have been completed.

The Look-out Tower and Signal Station at Loop Head is nearly finished; a new wash-house at Balbriggan and a new slip way at Roche's Point Coast Guard Stations have been built.

Royal Naval Reserve Stations.—A new Firing Battery and Drill Shed have been completed at Galway, and tenders have been invited for a similar Battery and Drill Shed at Larne, which will be commenced early in the present financial year.

Ordnance Survey Office.—The second and third sections of the new Map Store have been completed and the fittings are in course of erection.

A well has been sunk to a depth of about sixty feet in the Phœnix Park at some distance from the buildings, and a plentiful supply of pure water for dietetic purposes obtained. The well is steined in enamelled brick covered with concrete, and provided with manholes for access, and a steam pump, suction, delivery, and storage tanks, have been erected for the distribution of the water. The new quarters for the Warrant Officer attached to the Barrack are well advanced and will soon be completed. New heating boilers have been supplied to the old Map Stores, etc.

State Residences.—The Supper Room in the State Apartments, Dublin Castle, has been completely re-decorated. The Conservatory at the Chief Secretary's Lodge has been refitted with hot water pipes, and several improvements have been carried out at the Under Secretary's Lodge.

Chief Secretary's and Prisons Board Offices.—The re-construction necessitated by the defects in the old building adjoining the City Hall have been carried out.

General Register Office.—The designs for the new strong room have been completed and tenders invited. The construction is of steel, brick, and concrete throughout.

Record Buildings.—Further portions of the Record Treasury and the basement have been fitted up with iron shelving for the accommodation of records, deeds, etc., etc.

Registry of Deeds Office.—The large works of re-construction at this Office are now completed and have afforded unqualified satisfaction to the Registrar and the legal profession, who, heretofore, were hampered in the discharge of business by the want of proper accommodation and general unsuitability of the old Offices. In the Public and Official Search Rooms a fireproof construction of rivetted steel work, terra-cotta tubes, and breeze concrete has been carried out.

Registration of Titles Office.—The commodious new Offices of the Chief Registrar, at Henrietta-street, are completed and in occupation.

The necessary supplies of office furniture have been provided for the various local registries.

Dublin Metropolitan Police Buildings.—A site has been approved for the proposed new Barrack for the neighbourhood of the Phœnix Park at Chapelizod, adjoining both the Main-street and the Phœnix Park, and when the lease is completed the building will be commenced. Several minor works of sanitation were carried out at the Dublin Barracks and Stations.

Dundrum Central Criminal Lunatic Asylum.—The general works of internal alterations and additions, as well as the new stores and workshops, have made satisfactory progress. The Asylum, though designed and erected many years ago, will soon be comparable as regards facilities for efficient administration with some of the best modern examples, especially in regard to the receipt and issue of stores and night inspection.

Science and Art Buildings.—The Natural History Museum has hitherto been heated by hot water pipes in connection with saddle boilers. The latter have been removed and the same circulation effected by steam injection from the steam boilers in the basement of the Art Museum. The heating arrangements of the School of Art have also been improved.

The new Science and Art Offices have been completed and are now in occupation, and arrangements are being made for the erection of the new Dublin Society Theatre. At the Botanic Gardens, Glasnevin, new fire appliances have been supplied and some new propagating pits built.

Royal Irish Constabulary Buildings.—The new Central Barracks at Belfast, which provide accommodation for 100 constables and five families of head constables and sergeants, as well as those at Roden-street and Leopold-street, have been completed and occupied. The new works at Goresbridge, Donegall Pass, Belfast, and Youghal Barracks have been completed. At the Depôt in the Phœnix Park some new latrines have been constructed and a small addition made to the Surgeon's Quarters.

Queen's Colleges.—The roof of the Pathological Museum at the Queen's College, Cork, has been reconstructed, and the new Chemical Laboratory at the Queen's College, Belfast, has been heated by hot water apparatus and the new fittings put in hands.

Royal University.—The usual works of maintenance have been carried out, and a contract entered into for fittings for the Physical Laboratory.

National Education Buildings.—The various district and minor Model Schools and the National Schools throughout Ireland vested in the Commissioners of National Education have been maintained in an efficient state of repair.

Postal and Telegraph Buildings.—The new District Offices at James's Street and Phibsborough have been completed.

The new Parcels Post Depôt at Amiens Street has been completed, with the exception of the fittings, furniture, and electric lighting. The works were greatly delayed by the financial difficulties of the building contractor, ending in a composition with his creditors, in consequence of which the Board were obliged to determine his contract, measure the unexecuted work, and call for tenders for completion.

The work of extension at the Accountant's Department, Upper Sackville Street, has also been executed to the same extent.

New Post Offices and Post Masters' Residences have been erected and occupied at Lisburn and Tipperary, and similar works are in progress at Wexford. At Drogheda a large building has been altered and improved for a similar purpose. The fittings and furniture of the new Post Office at Longford and the internal alterations at Limerick Post Office have been completed.

The Cork Telegraph Stores have been altered and rebuilt, and a number of linesmen's huts have been erected throughout the country for the accommodation of the men engaged on the telegraph work of the new Railway Block System.

Inland Revenue Buildings.—Extensive alterations and additions have been carried out at the Custom House at Galway. A third storey to give accommodation for the Surveyor of Taxes has been added, and the first floor has been fitted up for the Collector of Inland Revenue and his Staff. The premises are now occupied by the Inland Revenue Staff.

The alterations and improvements at the old Athenæum at Kilkenny in order to form offices for this Department have been completed, and some further improvements have been made in the Dublin Offices. Works have also been carried out at the Bonded Stores at Newry.

Public Gardens, &c.

The Phœnix Park and St. Stephen's-Green Park, Dublin, and the Curragh of Kildare.—The usual works of maintenance and repair in connection with the buildings, roads, grounds, plastering, &c., have been carried out. New latrines and a public drinking fountain have been erected at the People's Gardens, and improvements to the subsoil drainage at St. Stephen's Green were necessitated by the gradual rise of the water that has been taking place since the closing of the wells in the district.

Depositories for Parochial Records. (*Act* 39 & 40 *Vic., C.* 58.)—Under the provisions of this Act inspections of proposed Depositories have been made in 4 cases, and reports thereon forwarded to the Deputy Keeper of the Records.

SHANNON DRAINAGE.

The work at Killaloe was practically completed except the removal of some dams which was stopped by the floods. This will be done during the present summer. The Fish Pass here was altered according to the designs supplied by the Inspectors of Irish Fisheries.

Shannon Sluices.

These were maintained in good order.

RIVER MAIGUE NAVIGATION.

The Collector's house and swivel bridge were repaired and maintained.

LOWER BOYNE NAVIGATION.

The locks, lock-gates, buildings, and other works were maintained in good order.

River Suck Drainage (Parliamentary Grant under River Suck Drainage (Provision of Funds) Act, 1890).

These works are now nearly completed, with the exception of the removal of some dams in main river, and work on the tributaries and minor drains included in the authorized scheme. The cost of excavating the main river proved considerably higher than anticipated by the late Engineer of the Suck Drainage Board; and some additional funds will have to be provided for the due completion of the scheme, the savings on other portions of the works having proved inadequate to meet the excess cost of the main river work.

ROYAL HARBOURS.

A Summary of Rainfall and Tidal Observations at Kingstown, and remarks by the Harbour Masters on the Fishing Industry and Trade at the several Harbours, will be found in Appendix (G).

Kingstown Harbour, Co. Dublin.

The usual works of repair and maintenance to sea slopes of breakwaters, piers, wharves, roads, buildings, &c., were carried out during the year, and a quantity of 12,000 tons of silt was dredged from bed of harbour and deposited at back of East Pier. The dredging plant having become worn out, a contract has been entered into for the construction of a new dredger, it being important not only to maintain, but to deepen this harbour in the interests of the Mail Packet and Naval Services.

Water has been supplied to Her Majesty's ships, the vessels of the Irish Lights Board, and trading vessels; and a quantity of 533 tons of ballast supplied to the latter.

Howth Harbour, Co. Dublin.

The east breakwater and other works have been maintained in good order, although the winter storms were exceptionally severe.

Dunmore East Harbour, Co. Waterford.

The severe storms of the past winter caused only a trifling damage to the sea slope and about two hundred tons of large blocks were placed at toe of same for its protection. The works generally have been maintained in good order.

Donaghadee Harbour, Co. Down.

The works have been maintained in good order.

Ardglass Harbour, Co. Down.

Very slight damage occurred to the breakwater during the winter, and the works have been maintained in satisfactory order.

APPENDIX (B.)

Details of Non-Voted Services.

Arterial Drainage and Improvement of Lands (Ireland) Act, 1863, and Amendments.

26 & 27 Vic., c. 88; 27 & 28 Vic., c. 72; 28 & 29 Vic., c. 52; 32 & 33 Vic., c. 72; 35 & 36 Vic., c. 31; 37 & 38 Vic., c. 32; 41 & 42 Vic., c. 59; and 43 & 44 Vic., c. 27; and 55 & 56 Vic., c. 65.

The total number of applications received from the passing of the first of these Acts in the year 1863 to the 31st of March, 1894, is ninety-seven.

The maps, plans, estimates, and valuation schedules have been deposited, together with petitions for the constitution of the Drainage District of the Carrigrohane, Maglin, and Ballincollig Drainage District, county Cork, and the Thurles River, county Tipperary.

Works have been in progress in the year in the following districts:—

River Suck, counties Galway and Roscommon, and Killard River, county Cork.

A schedule of the final awards made under these Acts will be found in the Appendix, (D 8), page 68.

The total area of land drained or improved in the 55 districts in which final awards have been made, is 111,068 statute acres, and the total cost chargeable thereto amounts to £764,622. This has been in addition to the works of the 121 districts, carried out under the Act 5 & 6 Vic., c. 89, and the Acts amending it, between the years 1843 and 1860, on which an expenditure of £2,390,612 was incurred, of which £70,201 was for works chargeable on counties; £141,073 a free grant; £1,206,312 remitted; and £1,043,227 made repayable by annuity or otherwise; a total of 266,736 acres was drained or improved under the latter Act.

Drainage Maintenance.
29 & 30 Vic., c. 49.

The maintenance works of the Rinn and Blackriver District were completed during the year at a cost of £2,713. Those of the Kilcock District were undertaken and completed at a cost of £173. The Carrigans District was inspected and reported on.

Maintenance of Navigation Works.
19 & 20 Vic., c. 62.

A small repair in connection with the Ballinamore and Ballyconnell Canal was carried out at a cost of £125.

Railway Clauses Consolidation Act.
8 Vic., c. 20, sec. 25.

Certificates of minimum dimensions of culverts and waterways were issued in the following cases:—Ardee Railway (Great Northern Railway); Collooney and Claremorris Railway.

Fishery Piers and Harbours Maintenance.
16 & 17 Vic., c. 136.

The special repairs to Lackan Pier in the County of Mayo were practically completed during the financial year at a cost of about £2,300. Some damage occurred to Malin Head Pier, County Donegal, during the exceptionally severe storms of February last, and repairs are now in progress. A slight movement in the wharf wall of Carlingford Pier, County Louth, has been carefully watched; and proceedings are now on foot to deal with it in an effective manner. Steps were taken to ascertain if any damage had occurred to the other numerous fishery piers and harbours round the Irish Coast from the severe winter storms, and it is satisfactory that no other serious damage was reported, except the destruction of a small beacon at Boat Strand, County Waterford.

Sea Fisheries (Ireland) Act, 1883.

The principal work under this head during the year has been the completion of the North Groyne at Greystones Harbour which, however, has not as yet been vested in the County.

Plans and estimates are in course of preparation for the extension of the Pier at Clogher Head in County Louth, a work to which the unexpended balance of the Sea Fisheries Fund is, under the recommendation of the Royal Commission on Public Works and the approval of Government, to be devoted.

Arklow Harbour.

The North Groyne Works undertaken by the Harbour Commissioners, for which a grant of £3,500 and a loan of £3,500 were sanctioned, are not yet completed.

Shannon Navigation.

The canals, ferries, bridges, jetties, quays, lock-houses, &c., were maintained in good order, and new lock-gates put in at Killaloe, Meelick, and Tarmonbarry.

Increased Rents in respect of Arterial Drainage Rent Charges.

No applications to fix increased rents in respect of improvements were received by the Board during the past year.

Post Roads.
Act 6 and 7 Wm. IV., cap. 116, section 61.

Applications from the Postmaster-General were received during the past year for repairs of Post Roads situate in the following counties:—

County Waterford—Waterford to Lukeswell.
County Down—Meek's Mill to Cronin's Hill.
County Mayo—Ballinrobe to Portree.
Ditto. Claremorris to Ballinrobe.
County Tipperary—Modreeny to Knocknacree.

In these cases the repairs were executed under the superintendence of the respective County Surveyors from funds supplied by the Board, to be repaid by levy placed on the respective counties.

County Surveyors' Assistants.

Six candidates for the office of County Surveyors' Assistant have been examined for the following counties under Warrant of the Lord Lieutenant, pursuant to the provisions of the Act 6 & 7 Wm. IV., cap. 116, and their qualifications certified to the respective County Surveyors.

Arbitrations under "The Railways (Ireland) Acts,"

(1851, 1860, 1864),

14 & 15 Vic., c. 70; 23 & 24 Vic., c. 97; and 27 & 28 Vic., c. 71.

Arbitrations have been applied for and Arbitrators appointed in the following cases, viz.:—

Railway Companies:

The Midland Great Western—Lands required under Midland Great Western Railway Act, 1892; 55 & 56 Vic., cap. cxli.
The Midland Great Western—Additional lands required for the Ballina and Killala Railway.
Cork, Bandon and South Coast—Lands required for the Company's Line.
Belfast and Co. Down—Lands required for the purposes of the Company's Act of 1891.
Donegal Railway Co.—Lands required for the purposes of the Donegal Railway Act, 1893.
Waterford and Limerick—Lands required for the Collooney to Swinford, and Swinford to Claremorris Railway.
Great Northern—Lands required for the Ardee Branch Railway.
Baltimore Extension—Rights of Way in connection with footbridge at Skibbereen.
Cork, Bandon and South Coast—Lands required for the purposes of the Company's Line.

Town Commissioners:

Bangor—Lands required for Bangor Waterworks.
Athlone—Lands required for Athlone Waterworks.
Carlow—Lands required for Carlow Waterworks.

Corporations:

Belfast—Lands, houses, &c., required for North-street Improvement Scheme

Boards of Guardians of Poor Law Unions:

Rathkeale, Ballymoney, Fermoy, Edenderry, Mitchelstown, Rathkeale, Dundalk, Carrick-on-Suir Tullamore, Castlecomer, } For the purposes of the Labourers (Ireland) Acts.

Castletownbere, Ballycastle, Limavady, } For Waterworks.

Fermoy—For Burial Grounds.

Arterial Drainage Board:

Killard—Lands required for Killard Drainage District.

Others:

The Secretary of State for the War Department:—

(1) Lands required for Dublin Barracks Improvement Act, 1892; 55 and 56 Vic., cap. lxxvi.

(2) Lands required for Marlborough Barracks, Dublin, under Military Lands Provisional Orders Confirmation Act, 1893; 56 Vic., cap. xxxvii.

(3) Lands required for Buttevant Barracks, Co. Cork, under same Act.

APPENDIX C.

Details of Loan Services, with Abstract of Accounts and Tables.

Class I.—Loans Secured on Undertakings.

Labourers' Dwellings in Towns and Housing of the Working Classes. Nos. 7 and 8 in Abstract, p. 42.

Labouring Classes Dwellings (Ireland) Act, 1866 (29 & 30 Vic., c. 44); and the Housing of the Working Classes Acts, 1885 and 1890 (48 & 49 Vic., c. 72, and 53 and 54 Vic., c. 70).

Amount of loans sanctioned under Act of 1866, while it continued operative, *i.e.*, to the close of the year 1884-85—£281,334. Number of dwellings erected—3,416. Rate of Interest charged—4 per cent.

In previous reports we called attention to the stimulus to building under this service, arising from the favourable terms as to interest granted by Treasury Minutes of 21st and 25th January, 1886. During the past year 7 applications to the amount of £11,463, including £5,000 for clearing the site of White's Lane, Dublin, have been sanctioned, as against 8 for £44,270 in 1892-93.

The following table shows the number and amount of the loans made each year during the periods referred to.

Year.	No. of applications sanctioned.	Amount sanctioned.	No. of families to be accommodated.
		£ s.	
1866-67,	Nil	—	Nil.
1867-68,	1	638 0	8
1868-69,	Nil	—	Nil.
1869-70,	1	500 0	10
1870-71,	1	4,146 0	125
1871-72,	2	1,650 0	46
1872-73,	3	7,175 0	108
1873-74,	7	22,250 0	261
1874-75,	1	910 0	13
1875-76,	7	24,242 0	259
1876-77,	6	11,100 0	132
1877-78,	8	23,614 0	272
1878-79,	10	7,100 0	81
1879-80,	19	31,858 0	351
1880-81,	17	28,870 0	302
1881-82,	17	33,674 0	453
1882-83,	16	21,187 0	270
1883-84,	16	40,052 0	397
1884-85,	12	22,368 0	328
1885-86,	20	50,755 0	713
1886-87,	24	79,161 0	852
1887-88,	20	34,746 10	397
1888-89,	26	53,752 10	575
1889-90,	16	46,319 0	603
1890-91,	20	43,413 0	628
1891-92,	11	10,164 0	135
1892-93,	8	44,270 0	481
1893-94,	7	11,463 0	56
Total,	296	655,378 0	7,856

OBSERVATIONS ON CLASS (2).—LOANS SECURED ON RATES.

The amount of loans sanctioned under this head shows an increase, but the actual number of loans is reduced.

—	1892–93.	1893–94.
Number of Loans, . .	398	247
Amount of Loans, . .	£260,084	£419,884

Loans for Works carried out by Grand Juries. No. 9 in Abstract, p. 42.

Loans, for works carried out by Grand Juries, show £8,840 sanctioned in 1893–94 as against £10,400 in 1892–93.

Loans for Public Libraries, Reformatories, and Industrial Schools. No. 11 in Abstract, p. 42.

Two loans, amounting to £3,500, have been sanctioned for Industrial Schools.

Loans for Lunatic Asylum Buildings. No. 17 in Abstract, p. 42.

This service shows a marked increase both in number and amount of loans sanctioned, viz., 23 loans for £188,168 in 1893–4, as compared with 8 loans for £24,700 in 1892–3.

Loans under the Public Health Act. Nos. 19 and 36 in Abstract, pp. 42 and 44.

Loans under the Public Health Act of 1878 reached in number 65, and amounted to £164,736, as against the corresponding figures 57 and £99,654 for the previous year. The following table contrasts the two years in detail, and shows some of the many undertakings comprised under the title of "Sanitary Loans."

PURPOSE.	1892–93.		1893–94.	
	Number of Loans.	Amount.	Number of Loans.	Amount.
		£		£
Water Works, ...	27	49,060	24	68,726
Sewerage, ...	10	10,307	19	19,301
Burial Grounds, ...	1	696	6	6,700
Paving and Footpaths, ...	9	16,089	9	46,559
Buildings, ...	1	700	4	4,950
People's Parks, &c., ...	1	650	–	–
Gas Works and Public Lighting, ...	2	2,912	2	15,000
Markets, ...	2	14,280	1	3,500
Streets, ...	3	3,800	–	–
Scavenging, ...	1	1,160	–	–
	57	£99,654	65	£164,736

The total amount of Loans authorized for Sanitary purposes stood at £2,158,652 on 31st March, 1894, and the total amount issued at £2,116,582.

The distribution of the former sum between different sanitary purposes is as follows :—

	£
Water Works, ...	1,038,189
Sewerage, ...	357,987
Streets (Paving, &c.), ...	468,099
Public Baths, ...	18,350
Scavenging, ...	29,475
Buildings, Gas Works, Cemeteries, Parks, &c., .	246,552
	£2,158,652

Loans under Labourers Acts. No. 21 in Abstract, p. 42.

Loans under the Labourers Acts, 1883 and 1885, show a decrease in amount on the preceding year. The sanctions from the commencement of the service are stated below.

	£
1884–88,	820,998
1888–89,	188,742
1889–90,	89,682
1890–91,	106,427
1891–92,	50,426
1892–93,	117,998
1893–94,	45,390

The loans sanctioned under these Acts amounted at the end of the year under report to £1,419,663. Ninety-four out of 159 Unions had borrowed this sum; the remaining Unions had not up to that date availed themselves of the powers given by the Acts. The number of Unions which had borrowed, with the amount sanctioned in each province, appears from the following figures:—

		£
Munster,	45 Unions,	825,230
Leinster,	38 „	573,629
Connaught,	7 „	9,059
Ulster,	4 „	11,745
	94	£1,419,663

The advances under the Acts in 1893–94 amounted to £71,627, bringing the total advanced to £1,236,282.

Loans for Dispensary Houses. No. 22 in Abstract, p. 42.

Thirteen applications for loans for the construction, &c., of Dispensary Houses have been received, amounting to £14,010, of which seven have been sanctioned, amounting to £5,250.

Observations on Class (3).—Loans secured on Lands.

This class comprises, in addition to loans made to tenants for purchase of their holdings, in accordance with the provisions of the Land Act of 1870 (under which no advances are now made), the following loans, having for their object the improvement of land:—

(*a.*) Loans for arterial drainage under 5 & 6 Vic., c. 89.

(*b.*) Loans made for arterial drainage works (26 & 27 Vic., c. 88), and loans made for the maintenance of such works (29 & 30 Vic., c. 49).

(*c.*) Loans to "owners" of lands for improvements, under 10 Vic., c. 32, and amending Acts, and under sec. 19 of 44 & 45 Vic., c. 49.

(*d.*) Loans to occupiers of lands for improvements, under sec. 31 of the Land Law Act, 1881, 44 & 45 Vic., c. 49.

Loans for Arterial Drainage. Nos. 23, 24, and 41 in Abstract, pp. 42 and 44.

From 1842 to 1863 loans for Arterial Drainage were made under 5 and 6 Vic., c. 89. £2,082,052 was lent under this statute, the greater part during and after the famine of 1849. Of this amount £1,207,582 was remitted, and £873,984 principal repaid. The principal still repayable amounts to £485.

Since 1863 the loans for this purpose have been made under the Drainage and Improvement of Lands Act (Ireland), 1863, 26 and 27 Vic., c. 88, and amending Acts, and since that date the entire amount of loans made under 26 and 27 Vic., c. 88, up to March 31, 1894, is £823,080, including £6,136 lent out of the Irish Church Fund.

Loans for Land Improvement. *No.* 26 *in Abstract, p.* 44.

We submit the numbers of applications for loans, and the amounts issued in each year from 1847, when this service commenced, to 31st March, 1894 :—

	No. of Applications.	Amounts issued.		No. of Applications.	Amounts issued.
1847, June to Dec. (inclusive),	1,354	£72,790	1871–72,	160	£82,555
1848,	571	356,160	1872–73,	223	76,290
1849,	643	379,836	1873–74,	224	99,572
1850,	436	250,324	1874–75,	245	102,005
1851,	280	145,653	1875–76,	265	98,730
1852,	164	88,542	1876–77,	218	121,405

1859,	111	29,334	1882–83,	451	*a* 138,536
1860,	135	26,902	1883–84,	503	*a* 123,082
1861,	154	36,656	1884–85,	395	*a* 117,480
1862,	184	61,375	1885–86,	298	*ab* 79,678
1863,	138	58,830	1886–87,	219	*ab* 59,192
1864,	132	58,430	1887–88,	181	*b* 48,752
1865,	90	46,215	1888–89,	148	*b* 31,793
1866,	98	26,295	1889–90,	189	*b* 25,677
1867,	145	39,180	1890–91,	213	*b* 29,756
1868–9,	179	64,973	1891–92,	207	*b* 30,804
1869–70,	166	83,775	1892–93,	292	35,871
1870–71,	159	77,980	1893–94,	325	32,321

The business done under this service reached its lowest point in number of applications in 1888–89. Since that year there has been a decided increase. The number of applications received during the year 1893–94 was 325, showing an increase of nearly 12 per cent. on those received during the previous year. About one-third of the applicants are purchasers under the Land Purchase Acts, and it is probable that this class will avail itself largely of loans under the Land Improvement Acts.

We continue to receive encouraging reports from our Inspectors as to the character of the tenant purchasers, and the care they take to get the maximum benefit from the loans for which they apply, and their unwillingness to burden their holding with a rentcharge for loans in excess of the amount actually required for purposes of improvement.

Classification of loans under which works were *commenced* in 1893–94 :—

Class of Work.	No. of Loans.	Amount Sanctioned.	Average of each Loan.
		£	£
Drainage and other Land Works,	19	3,080	162
Farm Buildings,	135	18,235	134
Labourers' Cottages,	6	1,255	209
Mixed Loans—including Buildings and Land Works,	18	7,095	394
Totals,	178	29,665	—
General Average per Loan,	—	—	166

The following Table shows the certified expenditure on the various classes of works under loans *completed* during the year ending 31st March, 1894 :—

	£	*s.*	*d.*
Field Works,	4,977	16	7
Farm Buildings,	17,066	7	8
Labourers' Cottages,	3,980	10	6
Scutch Mills,	—		
Planting for Shelter,	465	6	6
	£26,490	1	3

(*a*) Including Relief of Distress Loans.

(*b*) Including Loans under 19th Section of the Land Law (Ireland) Act, 1881.

The following table gives the number of loans and the sums issued in the several counties of Ireland up to the 31st March, 1894 :—

*Main and Thorough Drainage or other Field Works.

The number of loans sanctioned for works, of which thorough drainage forms the principal part, since the commencement in 1847 to the 31st March in this year, is 8,206, for £3,712,517, and of this number 22, for £3,230, were approved during the year ended 31st March, 1894.

Planting for Shelter.

Since the passing of the Act 29 and 30 Vic., c. 40, 122 loans, amounting to £27,285, have been made, and of that number 2, for £230, were sanctioned during the year.

Farm Buildings.

Under this head 2,991 loans have been sanctioned since the passing of the Act 13 and 14 Vic., c. 19, the amount being £1,185,615. This includes 179 loans, for £27,720, approved during the past financial year.

Dwellings for Agricultural Labourers.

For this class of work the number of loans sanctioned since the passing of the Act 23 Vic., c. 19, is 736, for £345,860, 14 of which, amounting to £4,385, were approved in the year.

Under section 19 of the Land Law (Ireland) Act, 1881, we have power to make advances to tenant farmers, who, pursuant to the injunctions of the Irish Land Commission, and as a condition attached to the fixing of a "fair rent," proceed to erect labourers' dwellings on their holdings. Such tenants are deemed to be persons to whom a loan may be made under the Landed Property Improvement (Ireland) Acts, for the improvement or building of dwellings for labourers, as if such persons were owners within the meaning of the Act 10 Vic., c. 32, sec. 7. No loans were sanctioned under this section within the year ending 31st March, 1894, but the sum of £29 was issued. Under this provision of the Act 255 loans have been sanctioned since the commencement, amounting to £14,876, the instalments issued amounting to £13,491.

The following Table shows the number and amount of Loans sanctioned for Dwellings for Agricultural Labourers under the Act 23 Vic., cap. 19, and the Land Law (Ireland) Act, 1881, sec. 19, since the passing of the Labourers' Acts, 1883 and 1885.

Loans to Tenants for Improvement of Holdings. No. 28 in Abstract, p. 44.

Land Law (Ireland) Act, 1881, Section 31.

Under section 31 of the above Act, which provides for loans to occupiers of land for improvements proposed by themselves, the number of loans sanctioned since our last report was 496, amounting to £42,870, the sum issued being £41,182. This gives the total of loans sanctioned under section 31 since the commencement to 31st March, 1894, as 11,726—amount £1,009,107, the instalments issued amounting to £854,337.

The number of applications for loans lodged during the year 1893–94 was 748, being a decrease of 189 from last year. Of this number 40 were received from occupying owners.

* Owing to a mistake 11 loans amounting to £1,285 under this heading were omitted last year. The present return is correct to date.

The following table gives the distribution by Counties of the sums issued for all classes of work under the 31st Section of the Land Law (Ireland) Act, 1881 :—

SCHEDULE showing the NUMBER of LOANS SANCTIONED and AMOUNTS ISSUED up to the 31st MARCH, 1894.

We also beg to submit a statement classifying the loans in which works have been completed under the different descriptions of work, to the 31st March, 1894 :—

Description of Work.	Amounts Expended		
	From passing of Act to 31st March, 1893.	For year ending 31st March, 1894.	Total from passing of Act to 31st March, 1894.
	£ s. d.	£ s. d.	£ s. d.
Drainage, Fencing, Farm Roads, and other Land Works,	393,437 9 7	11,268 10 6	404,706 0 1
Farm Houses and Offices,	397,678 1 4	33,158 16 3	430,836 17 7
Labourers' Cottages, 19th section,	10,042 13 10	110 0 0	10,152 13 10
Labourers' Cottages, 31st section,	12,494 10 9	1,267 10 9	13,762 1 6
Scutch Mills for Flax,	698 13 6	Nil.	698 13 6
	814,351 9 0	45,804 17 6	860,156 6 6

The number of loans in which the amounts sanctioned have been expended, and the works certified as completed, is 9,729, and those in which the works were still in progress on the 31st March, 1894, were 454.

Observations on Class (4).—Miscellaneous Loans.

Glebe Loans. No. 30 *in Abstract, p.* 44.

Thirty-six applications for loans have been received during the year, amounting to £14,369, and 29 loans, for £8,944, have been granted. The issues for the year have amounted to £10,164. Since the passing of the first Act, in 1870, we have received 1,432 applications, of which the following is an abstract of those on which issues were made to 31st March, 1894.

—	No.	Amount.
		£
Church of Ireland,	279	132,632
Roman Catholic,	645	290,661
Presbyterian,	207	66,286
Wesleyan and other,	68	22,917
	1,199	512,496

Loans for National School Teachers' Residences. No. 34 *in Abstract, p.* 44.

Fifty-nine applications for loans have been received during the year, amounting to £12,745, and 45 loans have been sanctioned for £10,148. The total advances for these loans up to 31st March, 1894, was £147,279 10*s.* 0*d.* The number and amount of loans sanctioned shows a further decline as compared with the year 1891–2, in spite of the existence of the powers given by the National Education (Ireland) Act, 1892, for the compulsory acquisition of sites.

Loans for building Schools and Training Colleges. No. 35 *in Abstract, p.* 44.

Twelve applications for loans have been received during the year, amounting to £4,449 of which three, amounting to £2,580, have been sanctioned.

IRISH CHURCH FUND LOANS.

No loans or advances under previous loans were made from this fund during the year.

Out of £1,269,932 advanced from the Irish Church Fund under the Relief of Distress Act of 1880, £502,583 has been repaid, £28,336 has been remitted, and of the balance outstanding, £739,013, £729,926 is not yet due, and £9,087 is in arrear. The arrears have decreased during the year by £277.

The rate of interest on these loans is 1 per cent., but borrowers paying land improvement and arterial drainage charges, are allowed to redeem their principal liabilities on the basis of 3 per cent. interest, and the principal cancelled by such redemptions, now amounts to £9,261, including £1,536 in the present year.

RATES OF INTEREST.

The following statement shows the rates of interest chargeable on the several amounts making the aggregate balances in each year ended 31st March, 1892, 1893, and 1894 respectively:—

	31 March, 1892.	31 March, 1893.	31 March, 1894.
	£	£	£
Free of Interest,	22,349	15,459	13,473
3 per cent.,	6,000	6,000	6,000
3⅛ „	1,872,932	1,675,524	1,493,936

Total, .	17·32									

During the past year there were 9,307 hampers of fish landed as against 10,493 for 1893, and 10,986 for 1892.

This decrease may be accounted for by the fact that a less number of trawlers were engaged in fishing. In former years the average number of boats was 60, but this year the average did not exceed 50.

There were a good number of calms during the year, and there were frequent gales during the first three months of the year, but the take per boat has not apparently fallen off.

The number of herrings caught was limited. When the boats were expecting the arrival of the fish, a gale of wind came on which lasted two or three days, and which no doubt had the effect of dispersing the shoals.

The local boats engaged in mackerel fishing were not successful although the fish were more close to the shore and the harbour than in former years.

The long line fishing was more successful this season than it has been for a long time.

Howth Harbour.

There is still a falling off in the herring fishery. Returns for 1893–4 show as follows:—

Number of Boats using Harbour :—

Irish, ...	31
Scotch, ...	38
Manx, ...	1
Total, . .	70

Number of Boats Herring Fishing :—

Irish, ...	8
Scotch, ...	17
Manx, ...	1
Total, . .	26

Number of mease of herrings sold, 185, at average price of £1 5*s.* 6*d.* per mease. Total sum realised £235 18*s.* 11*d.*

There was also a large decrease in the imports of the harbour, as there was only 2,436 tons of coal. The decrease was caused by the strike in the coal mines.

Ardglass.

Herring Fishing.

Herring fishing commenced at this Station on 17th May, and continued up to 22nd September, and was a little better than the previous year—the total capture for the season being about 8,785 mease, or 3,525 mease over the previous year. The demand was pretty good all through the season, and the prices ranged from 35*s.* 6*d.* down to 7*s.* per mease, the average price being about 14*s.* During the latter end of the season mackerel were taken with the herrings in larger numbers than usual; in a very short time 41,000 were captured, but the price obtained was very small, ranging from 1*s.* to 4*s.* per hundred. After the herring fishing had ceased a few of the boats (about sixteen), belonging to the adjoining small ports of this neighbourhood, commenced trawling, and continued at this fishing all through the winter when the weather (which was most unfavourable) would permit, and the fishermen made pretty good wages; but there could be no check to calculate from, as they did not always come to this port to send off their fish to market, but the portion sent from here was equal to about 148 tons, the estimated value being £1,706,—the price of this class of mixed fish being from 8*s.* to 19*s.* per box, each box to contain 1 cwt. of fish; if good mixed flat fish, the same sized box might draw £4 or more, so that it is impossible to get at the average value.

The number of boats fishing from here during the last herring season equal 36 Scotch, 42 Manx, and 97 Irish—in all equal to a total of 175 boats; but only 98 of this number fished regularly from this port, and about 77 called from one to eight times to dispose of their fish; however the fleet was larger by 33 boats than last year.

Shipping Trade to and from Ardglass Harbour during the year ending 31st March, 1894.

—	Registered Tonnage.	Cargo Tonnage.	Description of Cargo.	Observations.
10 Sailing Vessels,	696	1,125	Coal,	Arrived in Port and Discharged.
7 Steamers,	852	11	Straw,	Arrived in Port and Shipped.
4 Sailing		1,275	Potatoes,	do.
		27	Hay,	do.
		10	Oats,	do.
21	1,548	2,448		

In addition to above, 15 tug boats called for shelter or for orders during the year. Ten sailing vessels and 3 steamers called for shelter during the year.

There was a considerable falling off in the trade of this port during the past year; there were 12 cargo vessels less than the previous year into port, with 660 tons less coal delivered, and 642 tons less potatoes shipped, and 204 tons less timber, lime, and stone delivered—in all equal to 1,506 cargo tons of a falling off in trade. The stormy winter, in addition to the great coal strike in England, should fully account for such a falling off.

Dunmore Harbour.—County Waterford.

Harbour Master's Report on the Fishing Industry.

The herring fishery in common with other fishings has suffered during the past year; both in summer and winter seasons fish were very scarce. The amount of herring sold was only 591 mease, average price realized was 13*s.* per mease, against 10,390 mease at 10*s.* 7*d.* per mease last year.

The beam trawlers had a very poor season, and for the past four months did very little on account of the stormy weather.

The otter trawl boats, principally Dungarvan hookers, fishing within the headlands of Waterford Harbour during the spring and summer months, did fairly well; they had some large takes of prime plaice for which they received a ready market and a good price.

The shell fishers did very well. The commencement of the season lobsters were scarce and sold as high as 16*s.*, and crabs 3*s.* 6*d.* per dozen. Later on they were more plentiful, and at the close of the season were sold as low as 8*s.* and 2*s.* per dozen respectively.

Donaghadee Harbour.

The boats engaged in the salmon fishing on the lower waters ot the Suir and Barrow had a very bad season; the fishermen attribute the failure to the dry season.

Number of boats employed at the different fishing industries:—Irish, 76; Scotch, 13; Manx, 2; English, 8—Total, 99. Men and boys employed, 652.

The number of cargo vessels were 15 in number, tonnage 701, men employed 77.

Imports:—

Coal, 1,100 tons.
Salt, 81 tons.

Exports:—

Salt, 79 tons.

Shipping of all kinds to and from Donaghadee Harbour during the year ending 31st March, 1894.

	Registered Tonnage.	Discharged Cargo.	Description of Cargo.	Observations.
		Tons.		
99 Colliers, 86 Sailing, and 13 Steam,	8,803	16,169	Coal,	Arrived in Port and Discharged.
1 Sailing Vessel,	34	56	Granite,	do.
1 do.,	53	80	Bone manure,	do.
4 do.,	229	335	Brick,	Shipped.
1 do.,	88	150	Turnips,	do.
106	9,207	16,790		

In addition to above, 96 tug boats called into harbour either for shelter or for orders; 39 trading vessels called for shelter or windbound; 5 fishing boats with herrings, and sold 107 mease; 41 pleasure yachts for shelter or for orders.

During the past year there were 7 cargo vessels less to this port, and 1,531 cargo tons less than during the previous year; however this falling off was general at the small ports around this coast.

APPENDIX H.

National Monuments and Ecclesiastical Ruins.

Irish Church Act, 1869, 32 & 33 Vic., c. 42; and Ancient Monuments Protection Act, 45 & 46 Vic., c. 73.

GLENDALOUGH CHURCHES, CO. WICKLOW.

The work carried out at the above National Monument consisted of repairs to the roof of St. Kevin's Kitchen, pointing, &c.; rebuilding a portion of the gable of St. Mary's Church; the construction of a new bridge over the river, the former one having become dangerous through decay; the fixing of labels on and cataloguing the various fragments found from time to time and stored in St. Kevin's Kitchen.

Beyond such repairs no work was undertaken or required.

MONASTERBOICE, CO. LOUTH.

Beyond the cutting of ivy, &c., and the under-pinning of walls, where they have been under-mined by the digging of graves, no work has been found necessary.

ABBEY KNOCKMOY, CO. GALWAY.

This extensive Abbey was in a most dilapidated condition. The nave and chancel were crowded with debris. The upper portions of the nave and chancel walls were nearly falling. The conventual buildings were in a similar condition. Careful measured drawings, sections, and elevations, showing the condition of the structure before works were commenced were made. All that was requisite to maintain the Abbey in a proper state of repair has been done. A caretaker has been appointed.

ATHENRY ABBEY, CO. GALWAY.

Extensive repairs were necessary; the walls required repair and pointing. The debris which had collected in the interior was removed. The fine tomb of the Berminghams has been repaired. Careful sections and elevations to scale have been prepared, showing the condition of the ruin prior to the works being undertaken. All that was requisite to maintain the building has been done.

ENNIS ABBEY, CO. CLARE.

The condition of the Graveyard attached to this ruin was found to be so serious, owing to overcrowding, that a committee of gentlemen brought the matter before the Local Government Board, who granted an order for its being closed. The coffins were so near the surface that great difficulty was experienced in lowering the graves near surface. The whole has now a satisfactory appearance.

The Abbey had been used as a parish church, having been roofed in 1819. All the woodwork of this date was ruinous, and had to be removed. The nave was excavated to the original level; arches which had been blocked in 1819 were re-opened; and the usual repairs to walls effected.

The date of the Abbey varies in parts, but the general style is that of the 13th century, with careful detail and fine mouldings.

KILMALLOCK ABBEY, CO. LIMERICK.

Owing to difficulties experienced regarding the vesting of this Abbey, little has been done.

Drawings have been made, and preliminary work connected with the general survey done.

SHERKIN ISLAND ABBEY, CO. CORK.

This is an extensive ruin, and was in a most dilapidated condition. Many of the walls were in a dangerous state, and care had to be taken not to make matters more serious during repairs.

The works were carried out satisfactorily under an experienced clerk of works.

INNISFALLEN ISLAND, KILLARNEY, CO. KERRY.

The ruins here consist of an Oratory built on the highest point of the Island, the ancient Abbey and surrounding conventual buildings. The date of the Oratory is twelfth century, portions of the Abbey the same date, part of it thirteenth century, and part sixteenth. The Oratory has been repaired, and falling walls secured. The debris filling the interior has been removed, disclosing many curious and interesting tombs. The eastern gable with two early English windows, counterparts of those at Aghadoe, in the vicinity of Killarney, had fallen, but the windows were perfect, and they have been replaced in their original positions. The high altar was discovered, and beneath it a curious relic, half bird, half fish, partly ivory and partly bronze. This relic has exercised the minds of learned societies, without, however, any definite result. Some further work is requisite on outlying portions of those conventual buildings, which it is hoped may be done this year.

BALLINSKELLIGS, CO. KERRY.

This extensive ruin has been carefully repaired under an experienced clerk of works. There is not much architectural detail of importance, but its history is interesting.

QUIN ABBEY, CO. CLARE.

Owing to the careful way in which former repairs were done at this Abbey, little remained to be carried out. The works were mainly in connection with the Dunboyne vault, which forms a portion of the Abbey.

MELLIFONT, CO. LOUTH.

The work done at this Abbey was simply repairs to portions of the walls which had fallen into decay since the last expenditure.

THE SEVENTY-SECOND

REPORT

OF THE

COMMISSIONERS

OF

HER MAJESTY'S

WOODS, FORESTS, AND LAND REVENUES,

IN OBEDIENCE TO THE ACTS OF 10 GEORGE IV. (Cap. 50),
AND 2 WILLIAM IV. (Cap. 1);

BEING

THE FORTY-THIRD REPORT

UNDER THE ACT OF THE 14 & 15 VICT. (Cap. 42).

Dated 28 June 1894.

Ordered, by The House of Commons, *to be Printed,*
2 *July* 1894.

LONDON:
PRINTED FOR HER MAJESTY'S STATIONERY OFFICE,
BY EYRE AND SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.

And to be purchased, either directly or through any Bookseller, from

90, West Nile Street, Glasgow; or
HODGES, FIGGIS, & Co., Limited, 104, Grafton Street, Dublin.

194.

THE FORTY-THIRD REPORT

Of the COMMISSIONER in charge of the LAND REVENUES of the CROWN in *England*, under a Warrant of the Lords Commissioners of Her Majesty's Treasury, dated the 13th November 1893.

UPON the 27th of October last Her Majesty was pleased to appoint Edward Stafford Howard, Esquire, to be a Commissioner of Woods, Forests, and Land Revenues, in the place of the late George Culley, Esquire, C.B., deceased, and by a Warrant dated the 13th of November 1893, a copy of which is inserted in Appendix, No. 1 (page 10), the Lords of the Treasury assigned to Mr. Stafford Howard the charge of the Royal Forests, and of other parts of the Crown property, which had been in charge of Mr. Culley, and assigned to me the management of the residue.

In compliance with the directions contained in the Acts 10 Geo. 4, c. 50, 11 & 12 Vict. c. 102, and 14 & 15 Vict. c. 42, I have to report to Her Majesty and the Houses of Parliament what has been done in the year ended on the 31st March last in the management of those portions of the hereditary possessions of the Crown which are in charge with me.

The property in charge with me consists of the following: —

Description of Crown Estates.

1. Windsor Great Park, Plantations, and property at Ascot, Bagshot, and Virginia Water, &c.

2. Manors, messuages, land, fee farm rents, &c., in various parts of England.

The property described under the first head consists of more than 14,000 acres, of which about 2,650 (including about 800 acres used in connection with the Forest Classes held at Cooper's Hill College) are let to tenants, and the remainder is in hand, being either planted and under the growth of timber, heathland, or pasture in the Park. The greater part of the land in hand is maintained as part of the domain attached to the residence of the Sovereign, and, like the Royal Parks in London, is largely used by the public for purposes of recreation.

Details of the Receipt and Expenditure upon the property described under the first head are given at pages 128 and 129.

In addition to the sums there shown as received, a further sum of about £. 468 was received during the year for gravel, clay, &c., obtained from the premises described under the first head, but that sum is credited to the Mines Account, pages 144 and 145, in accordance with the provisions of the Crown Lands Act, 1866.

The property described under the second head consists of (1) about 70,000 acres of land appropriated to agricultural purposes, of which about 2,487 acres are in hand; (2) about 444 houses, let at rack-rents, or at rents that have been fined down from rack-rents; (3) about 5,873 houses that have been

been built by Crown Lessees upon land let upon building leases; (4) various collieries and other mine works; (5) fee-farm rents issuing out of lands and premises in various parts of England, and (6) numerous small miscellaneous premises.

The Sixty-seventh Report to Parliament (1889) contains a Schedule with a detailed description of the whole of the property then comprised under the second head above-mentioned, showing the counties and parishes in which the different farms, houses, mines, &c., are situated, and the rents and royalties and proceeds of thinnings of plantations derived from that property, amounting altogether, in the year to 31st March 1889, to £. 384,533, from which, however, had to be deducted for allowances made to tenants sums amounting in the aggregate to £. 7,235.

Since that Report some changes have been made in that property by sale and by purchase, as set forth in the subsequent Reports, and by the addition of the fee-farm rents (amounting in the past year to £. 1,195) issuing out of lands and hereditaments situate in various parts of England.

Receipts in past year.

In the year ended on the 31st March last, the gross sum that was credited as received from the rents and royalties, &c., and the thinnings of the plantations, of the property described under the second head now in my charge, amounted to £. 404,732. This sum includes about £. 4,043 received for fines on the grant of two leases, and also about £. 4,020 paid by the Crown on account of tithe rent-charge, and subsequently collected, in pursuance of the Tithe Act, 1891, from the tenants.

Allowances.

From the gross receipts there have to be deducted various allowances made to tenants, amounting in the aggregate to the sum of £. 10,745. The amount allowed is substantially larger than usual, and is principally due to the extraordinary drought of the past year, from which many agricultural tenants sustained severe losses.

Arrears of rent.

The arrears of rents and royalties due to Michaelmas last, in respect of all the property under my charge, and remaining due on the 31st March last, are shown by the following Statement, viz.:—

	£. s. d.	£. s. d.
For agricultural land (24 farms), containing 8,224 acres, let at rents amounting in the whole to £. 9,043	7,294 15 8	
Less,—Allowances to be made on payment of rent	3,606 18 2	
		3,687 17 6
For tithe rent charge repayable by tenants		159 12 11
For building land, houses, &c.		1,283 3 10
For fee-farm rents		1,605 5 –
For miscellaneous items		174 14 –
For mineral royalties		882 19 2
TOTAL	£.	7,793 12 5

These arrears arise upon rentals amounting together to about £. 399,950 per annum, and represent therefore a total arrear of less than 2 per cent. thereon.

Agricultural land in hand.

The agricultural land in hand, for want of suitable tenants, remains the same as at the time of my last Report, viz., 2.487 acres, situate as follows. A farm, consisting of 323½ acres, in Bedfordshire; two farms, comprising together 1,027½ acres, in Oxfordshire; a tract of grass land, containing 357 acres, at Wingland,

Wingland, in Lincolnshire; another area of grass land of about 207 acres in the Isle of Sheppey, in Kent, and a farm comprising about 572 acres in Suffolk.

Agency, &c.

The Sixty-seventh Report to Parliament (1889) contains detailed information as to the agency and local management of the property described under the preceding heads, and the collection of the rents and profits arising from that property, including the names of the then principal agents, and the rates of remuneration that were then allowed. Since then, Mr. F. Simmonds, the Deputy Surveyor of the Windsor Parks and Woods, has been appointed Receiver of the rents and profits of the premises in the counties of Berks and Surrey, comprised under the first head above-mentioned, and the present members of the firm of Messrs. Clutton have been appointed in the place of Mr. J. Clutton, who retired, Crown Receivers for the southern counties except Middlesex, the properties described under the first head, and mines under the sea. The former appointment involved no change in the cost of agency and local management, but on the latter appointment the rates of poundage previously allowed were reduced on more than one-half of the collection, and the salary which had been previously paid for the management of certain woods in hand was discontinued; in other respects the terms on which the Messrs. Clutton were appointed were similar to those on which Mr. J. Clutton held the appointment.

Cost of collection and agency.

The cost in the past year of collecting the rents, royalties, &c., arising from the property comprised in the second head above-mentioned, and which amount, after deducting allowances made to tenants, as mentioned above, to £. 393,987, and of the agency and local management of the several manors and estates, including the superintendence of the agricultural land in hand, and of the execution of works of repair and improvement, is shown by the following statement:—

Collection and Management.	Amount.		
	£.	s.	d.
A poundage of 4 per cent. on £. 42,192. 10. 0. - - - - - -	1,687	13	9
A poundage of 3 per cent. on £. 38,949. 11. 10. - - - - - -	1,168	9	8
A poundage of 2½ per cent. on £. 18,640. 2. 5. - - - - - -	466	–	2
*Surveyors' charges for making plans of estates, preparing designs for farm-houses, buildings, and cottages, superintending the construction of such buildings, and the execution of drainage works, and for other services in relation to property out of London - - - - - - - - -	970	17	10
Apportioned salary to the Receiver of Crown Rents for Middlesex, &c., and allowance for clerk - - - - - - - - - - - -	800	–	–
(This officer performs other duties, as set forth on page 63 of the Sixty-seventh Report to Parliament.)			
*Surveyors' charges for valuing and letting land and houses, and for other services in relation to property in London - - - - - -	2,114	19	11
Apportioned salary and travelling expenses of mineral surveyor - - -	156	5	–

Audit dinners - - - - - - - - - - - - -	219	7	4
Incidental expenses - - - - - - - - - - - -	69	19	3
TOTAL - - - £.	9,292	14	11

The

* This statement does not include the charges for sales or purchases which are chargeable to capital, nor the sums paid by railway and other companies, and by individuals for valuations of, and for reports by, surveyors upon premises sold, enfranchised, &c.

The collection of rents, &c., amounting to £. 393,987, and the agency and local management of the manors and estates from which those rents, &c., are derived, including the superintendence of the agricultural land in hand, and of works of repair and improvement, and all incidental expenses, cost therefore less than two and one third per cent. upon the amount collected.

The total expenditure made during the past year in drainage works, erecting and repairing farmhouses and buildings, and labourers' cottages, and in other repairs and improvements on the estates under my charge, other than the Windsor Parks and Woods, amount, after deducting certain credits in aid, to £. 22,845. 1. 5.

The proportion of that outlay, which was expended in permanent improvements, falling within the definition of "Improvement of Land," within the meaning of Land Act, 1864, amounts to £. 11,776. 14. 6. That sum was paid out of the capital of the Land Revenue, pursuant to the provisions of the Crown Lands Act, 1866, which, following the principle of the general Act before mentioned, provides that the cost of such works executed on parts of the Land Revenues may be charged to capital, and repaid by annual instalments out of income. The residue of the outlay, amounting to £. 11,068. 6. 11., was paid out of income.

LEASES GRANTED. Appendix, No. 2.

During the period to which this Report relates, I have granted 44 leases of land, houses, and other premises, situated in different counties in England. The rents reserved under these leases, amount altogether to £. 5,695. 7. 3., and fines of £. 370 were received upon the grant of two of those leases.

The particulars of the several leases are inserted in Appendix, No. 2, and the property demised may be divided into five classes, viz.:—

1st. Farms or land for agricultural, &c., purposes.

2nd. Houses or other buildings.

3rd. Land for building purposes.

4th. Mines, minerals, and other substrata.

5th. Miscellaneous property and interests of uncertain value.

Of the 1st Class, it will be seen, on reference to Appendix, No. 2, that five leases have been granted of land in the counties of Kent, Lancaster, Oxford, and York. The total acreage of the land comprised in these leases amounts to 1,318 A. 2 R. 5 P., and the annual rents for the land so demised amount to £. 1,078.

Of the 2nd Class, 24 leases have been granted of 20 houses and other buildings at Hagloe, Bristol, Richmond, and in London, at rents amounting altogether to £. 1,820. 17. 3., and upon payment, in two cases, of fines amounting to £. 370.

Of the 3rd Class, 10 leases have been granted of sites for 10 houses and other buildings in London, and at Eltham and Portland. In all these cases the several lessees have built, or have covenanted to build, within a limited period, and at their own cost, substantial houses or other buildings upon the plots let to them respectively. The ground-rents reserved by leases in this class amount to £. 2,711.

Of

Of the 4th Class, two leases have been granted of gold and coal, under a reservation of royalties upon the minerals that may be raised.

Of the 5th Class, three leases have been granted, at aggregate rents of £. 5. 10. 0.

SALES.
Appendix, No. 3.

APPENDIX, No. 3, contains the particulars of various sales effected by private contract of different premises and hereditaments.

The total sums realised by the sales specified in Appendix, No. 3, amount to £. 8,056. 10. 0.

ENFRANCHISEMENT OF COPYHOLDS.
Appendix, No. 4.

APPENDIX, No. 4, contains the particulars of 11 enfranchisements of copyhold or customary properties, held of six manors belonging to the Crown, which have been enfranchised by payment of sums amounting to £. 1,883. 0. 6.

ENFRANCHISEMENT OF COPYHOLDS IN WHICH HER MAJESTY HAS A REVERSIONARY INTEREST.
Appendix, No. 5.

By the Act 21 & 22 Vict. c. 94, "The Copyhold Act, 1858," provision has been made for the enfranchisement under the Copyhold Acts of lands holden of manors vested in Her Majesty in right of Her Crown in remainder or reversion, expectant upon an estate of inheritance.

In conformity with the provisions of that Act, three deeds of enfranchisement have been completed of lands holden of the Manor of Singleton, Raughmere and East Dean, in the County of Sussex, in which the Crown has a reversionary interest as set forth in Appendix, No. 5.

The consideration money has been paid to trustees, and has been invested by them in the purchase of Government Securities, the income from which, until the money shall have been otherwise invested, in pursuance of the terms of the Act, will be payable to the person who is, for the time being, entitled to the rents and profits of the manor in which the enfranchisement has been effected.

FREE TENEMENT RELEASED FROM QUIT RENTS, &c.
Appendix, No. 6.

APPENDIX, No. 6, contains the particulars of free tenements holden of a manor belonging to the Crown, which has been released from the payment of quit-rents, reliefs, customs, and services, upon payment of a sum of £. 1. 11. 6.

FEE FARM AND OTHER UNIMPROVABLE RENTS.
Appendix, No. 7.

APPENDIX, No. 7, contains the particulars of sales of fee farm, and other unimprovable rents of the Crown, payable as issuing out of lands, tenements, and hereditaments in England.

The rents sold amount altogether to the sum of £. 7. 10. 7½. per annum; the purchase monies amount to £. 158. 5. 7.

EXCHANGES.
Appendix, No. 8.

Appendix, No. 8, contains the particulars of two exchanges that have been made of minerals and land belonging to the Crown for minerals and land belonging to individuals, both made for the purpose of improving the boundary of the Crown property.

PURCHASES.
Appendix, No. 9.

APPENDIX, No. 9, contains the particulars of four purchases that have been made in pursuance of the 108th Section of the Act 10 Geo. 4, c. 50, for the purpose of investment, and of concentrating and improving the property of the Crown, out of the monies that have accumulated on the Capital Account of the Land Revenue.

The total sum expended in the purchases, specified in the Appendix, amounts to £. 110,656.

LAND TAX REDEEMED. Appendix, No. 10.

APPENDIX, No. 10, contains an account of land-tax redeemed, amounting to £. 8. 1. 10.

In consequence of the opinion expressed in a Resolution of the Committee of the House of Commons appointed to inquire into the management of this Department, there have been inserted in each Annual Report, since the year 1850, the following additional Schedules, or such of them as were applicable in the circumstances of each year, viz.:—

1st. Of rents put in charge with the several Receivers of the Land Revenue in respect of property acquired for Her Majesty by purchase, lease, exchange, or otherwise.

2nd. Of rents discharged from the rentals of the several Receivers in respect of property sold, exchanged, or otherwise disposed of.

3rd. Of all monies due to Her Majesty in respect of rents in charge with the several Receivers of the Land Revenue, under leases, or agreements for leases, and which shall have been owing for a greater period than a year, showing the term during which each arrear shall have been accruing, and the measures (if any) in progress for the recovery of the same.

4th. Of all monies remitted on Her Majesty's behalf in respect of any rents in charge with the same Receivers, specifying whether any previous remission has taken place in respect of the same rent, and the circumstances and the authority under which remitted.

5th. Of all defalcations that shall have taken place in respect of monies due, and owing to Her Majesty, specifying the circumstances under which such defalcations may have taken place, and the means (if any) available, and the measures (if any) taken for the recovery of the monies.

Appendix, No. 11. (A.), (B.), (C.), (D.)

I have now inserted the first four of these Schedules in the Appendix to the present Report, the Fifth Schedule being unnecessary, as there have been no defalcations within the period embraced in this Report.

Appendix (A. A.)

The APPENDIX (A. A.) contains an Account of Monies derived from the Hereditary Possessions of the Crown, under the management of the Commissioners of Woods, Forests, and Land Revenues, and received within the year ended 31st March 1894, and the application of all such Monies, as well as the appropriation of the Capital Monies arising from the sale of portions of the possessions of the Crown during the same period.

The Comptroller and Auditor General has reported to Parliament upon the Accounts of this Department for the preceding year, ended on the 31st March 1893, and the subsequent monthly accounts up to and including the month of February last have been rendered to him for examination.

Appendix, N° 1.

TREASURY ORDER assigning separate Duties to the COMMISSIONERS of HER MAJESTY'S WOODS, &c.

WHEREAS by the Crown Lands Act, 1851, it is enacted by the 5th Section thereof, that "it shall be lawful for the Commissioners of Her Majesty's Treasury from time to "time as they may see fit by Order under their hands to assign to each of the "Commissioners of Her Majesty's Woods, Forests, and Land Revenues, the management "or direction of, or in relation to, any separate part or parts of the Woods, Forests, and "Land Revenues, under the management of such Commissioners, and to assign to each of "such Commissioners any of the duties or powers which, but for such assignment, should, "or might be performed, or exercised by such Commissioners jointly, and all Acts in "relation to the management or direction, duties or powers, assigned as aforesaid to each "of such Commissioners, may be done by the Commissioner to whom the same is, or are "assigned, and shall be as valid and effectual as if done by both such Commissioners."

Now, we, being two of the Lords Commissioners of Her Majesty's Treasury, by virtue of the powers vested in us in this behalf as aforesaid, do, by this our Order, assign, until we otherwise direct, to Edward Stafford Howard, Esquire, one of the said Commissioners of Woods, Forests, and Land Revenues, the management and direction of, or in relation to:—

1st. All the Woods, Forests, and Land Revenues of the Crown in Wales, in the County of Monmouth, in Scotland, in Ireland, in the Isle of Man, and in the Isle of Alderney.

2nd. The New Forest, in the County of Southampton, Dean Forest, in the County of Gloucester.

3rd. All allotments, lands, and hereditaments, parcel of the hereditary possessions of Her Majesty in right of her Crown, within the ancient boundaries of, or now, or formerly called or known by the names of Bere Forest, Parkhurst Forest, Woolmer Forest, and Alice Holt Forest, in the County of Southampton, the Highmeadow Woods, in the Counties of Gloucester and Monmouth, and Great Doward Woods, in the County of Hereford.

4th. The Manor of Lyndhurst, the Manors of Staunton, and English Bicknor, and Saint Briavel's, in the County of Gloucester, and all lands, mines, minerals, and substrata and hereditaments belonging to Her Majesty within the Hundred of Saint Briavel's, in the same county.

5th. And we do by this our Order assign, until we otherwise direct, to the said Edward Stafford Howard, Esquire, the whole duties and powers whatsoever, which, but for this our Order, might be exercised by the said Commissioners jointly relative to the premises, the management and direction whereof is so hereby assigned to the said Edward Stafford Howard, Esquire, and to the premises which may be acquired by him by purchase, taking on lease, or in exchange, on behalf of Her Majesty, Her Heirs, and Successors, and also relative to the purchase, taking on lease, or in exchange, on behalf of Her Majesty, Her Heirs, and Successors, of any manors, messuages, honours, lordships, seigniories, lands, tenements, or hereditaments, of whatsoever tenure the same may be, or any rents, teinds, feu duties, pensions, annuities, rights of common, fuel rights, estovers, or other rights or charges whatsoever, situate, issuing, subsisting, or arising within or out of any part of Wales, the County of Monmouth, Scotland, Ireland, the Isle of Man, or the Isle of Alderney, or within or out of the forests, allotments, lands, woods, manors, and hereditaments in England, the management and direction whereof are hereinbefore assigned to the said Edward Stafford

Stafford Howard, Esquire, or any of them, and also to the purchase, taking on lease, or in exchange, on behalf of Her Majesty, Her Heirs, and Successors, of any other manors, lands, tenements, or hereditaments, of any tenure, situate in England, convenient to be held with such before-mentioned forests, allotments, lands, woods, manors, and hereditaments, in England, or any of them.

6th. And we do further assign, until we otherwise direct, to the said Edward Stafford Howard, Esquire, all the duties and powers which under or pursuant to the Act 1 & 2 Vict. c., 43, intituled "An Act for regulating the opening and working of "Mines and Quarries in the Forest of Dean, and Hundred of Saint Briavel's, in the "County of Gloucester," or under or pursuant to any award of the Commissioners appointed by such Act, or under or pursuant to any other Act relating to mines, minerals, and substrata, in the said Hundred of Saint Briavel's, may, for the time being, be performed or exerciseable by the Commissioners of Her Majesty's Woods, Forests, and Land Revenues, or either of them.

And we do hereby assign, until we otherwise direct, to the said Edward Stafford Howard, Esquire, the office of Gaveller of Dean Forest aforesaid; and we do appoint him to the same office.

And we, by virtue of the powers vested in us in this behalf as aforesaid, do, by this our Order, assign, until we otherwise direct, to Colonel Sir Robert Nigel Fitzhardinge Kingscote, K.C.B., the other of the said Commissioners of Woods, Forests, and Land Revenues, the management and direction of, or in relation to:—

All the Woods, Forests, and Land Revenues of the Crown in England (except such parts thereof as are hereinbefore by this Order assigned to the said Edward Stafford Howard, Esquire), and subject to the aforesaid assignments of duties and powers to the said Edward Stafford Howard, Esquire, we do, by this our Order assign, until we otherwise direct, to the said Sir Robert Nigel Fitzhardinge Kingscote, the whole of the duties and powers whatsoever which, but for this our Order, might be exercised by the said Commissioners jointly relative to the Woods, Forests, and Land Revenues, the management and direction whereof are so hereby assigned to the said Sir Robert Nigel Fitzhardinge Kingscote, and to the premises which may be acquired by him by purchase, taking on lease, or in exchange, on behalf of Her Majesty, Her Heirs, and Successors, and also relative to the purchase, or taking on lease, or in exchange, on behalf of Her Majesty, Her Heirs, and Successors, of any manors, messuages, lands, tenements, or hereditaments of whatsoever tenure the same may be, or any rents, pensions, annuities, rights of common, fuel rights, estovers, or other charges or rights whatsoever, situate, issuing, subsisting, or arising within or out of any part of England.

Witness our hands this thirteenth day of November one thousand eight hundred and ninety three.

(signed) THOMAS E. ELLIS.
RICHARD K. CAUSTON.

Whitehall, Treasury Chambers.

Appendix, N° 2.—A SCHEDULE of Leases of Messuages, Tenements, Lands, and Hereditaments, March 1894, both Days inclusive:—showing, The Dates of Leases; The Premises comprised therein; returned by the Surveyor employed to survey the same; The Rents reserved; The Fines paid; The granted:—and showing, also, The Annual Value of such Parts of the Premises as have been before in Lease, Leases.

DATES of LEASES.	PREMISES GRANTED.	TO WHOM.	FOR WHAT TERMS.	Estimated Annual Value.
	DEVON:			£. s. d.
1893:	North Molton:			
July 20	Mines Royal within certain Lands belonging to the Lessee in the Parish of North Molton.	- - The Right Honourable Augustus Frederick George Warwick, Lord Poltimore.	- - 21 years from 25th March 1893, determinable by the Lessee on the 25th March in any year of the term on giving six months previous notice.	- - Uncertain -

THE FORTY-THIRD REPORT

Of the COMMISSIONER in charge of the WOODS, ROYAL FORESTS, CROWN, and certain other ALLOTMENTS in *England*; of the LAND REVENUE of the CROWN in *Scotland, Ireland, Wales,* and in the Isles of *Man* and *Alderney*; and of the FEE FARM and other UNIMPROVABLE RENTS of the CROWN in *Wales.*

IN obedience to the directions contained in the Acts 10 Geo. 4, c. 50, and 11 & 12 Vict. c. 102, and 14 & 15 Vict. c. 42, I have to report to Her Majesty, and to the Houses of Parliament, what has been done in the management of the Hereditary Possessions of the Crown in charge with me, in the year ended 31st March 1894.

The property assigned to my management by the Treasury Order, set out *in extenso* on page 10 of this Report, consists of the following, namely :—

1. The New Forest, including Bere, Parkhurst, Woolmer, and Alice Holt allotments.

2. Dean Forest, including Highmeadow and Great Doward Woods.

3. The whole Crown property in Wales, County Monmouth, in Scotland, in Ireland, in the Isles of Man and Alderney.

NEW FOREST.

The income derived from the New Forest consists of Receipts from Sales of Forest produce, amounting in the year 1893-94 to £. 7,227, and certain surface rents, amounting in the same year to £. 4,710.

The income from the Forest produce might be considerably increased if revenue were the paramount consideration in the management, but Parliament having, by the legislation of 1877, decided that the greater part of the Forest should be considered primarily with the view of preserving the ornamental woods and open spaces, it cannot be expected to yield an increasing return financially, and its value to the nation must not be judged upon financial grounds.

DEAN FOREST.

THE income derived from Dean Forest consists of Receipts from Sales of Forest produce, amounting in the year 1893-94 to £. 6,387, and certain surface rents, amounting to £. 2,056.

Besides the income derived from the surface, the mineral Royalties of the Forest are considerable, averaging about £. 13,800.

In the year 1893-94 the mineral receipts amounted to only £. 11,223, being about 19 per cent. less than the average. This falling off is, however, exceptional, being to some extent attributable to the coal strike which took place in the first half of the financial year. I am glad to be able to report that the Forest mineral industry has not been permanently injured by the strike, as it was feared it would be at the beginning, a result due in large measure to the prudent advice given to the miners by their Agent at the time of the strike, in view of the particular circumstances of the District, whereby work was resumed earlier than in other parts of the country.

I have taken an active share in negociations with the Midland and Great Western Railway Companies with a view to obtain reduced railway rates in the Forest, being assured that the development of the resources of the district, especially of the deeper seams of coal, depends largely on cheaper carrying arrangements, which will place the Forest trade on a more equal footing in competition with neighbouring districts.

Appendix, No. 1. THE Accounts give in detail the Receipts and Expenditure on account of the Surface of the Royal Forests and Woodlands, but the Receipt and Expenditure on account of the Mines in the Forests are included in the Mines Account under the general head of England. A Statement is therefore appended, giving in detail the Receipt and Expenditure in respect of Mines and Quarries in the Royal Forests and Woodlands.

Appendix, No. 2. FOR a similar reason a Statement is also appended of the Receipts and Expenditure on account of the Crown Manors in New and Dean Forests, which are under my management, and which in the Accounts are included with England.

Appendix, No. 3. THE APPENDIX, No. 3, contains the particulars of five Leases granted of premises in the Royal Forests, Woodlands, and Lands formerly part of Royal Forests under my charge.

Appendix, No. 4. THE APPENDIX, No. 4, contains the particulars of 20 conveyances made to certain persons pursuant to the Act 10 Geo. 4, c. 50, of the Crown's interest in and over certain pieces of waste land in the Forest of Dean, which are wholly or in part surrounded by, intermixed with, or contiguous to, other lands not the property of the Crown.

Appendix, No. 5. THE APPENDIX, No. 5, contains the particulars of six Leases or Licences of Lands, part of the waste land of the Forest of Dean, for the better working of certain Gales under the powers of the Acts 1 & 2 Vict. c. 43, and 24 & 25 Vict. c. 40.

Appendix, No. 6. THE APPENDIX, No. 6, contains the particulars of nine Leases of Stone Quarries in the Forest of Dean, granted pursuant to the Acts 1 & 2 Vict. c. 43, and 24 & 25 Vict. c. 40.

THE APPENDIX, No. 7, contains the particulars of 10 Gales of Coal in the Forest of Dean and Hundred of St. Briavels, granted in pursuance of the Acts 1 & 2 Vict. c. 43, and 24 & 25 Vict. c. 40. Appendix, No. 7.

THE APPENDIX, No. 8, contains the particulars of two purchases in the Royal Forests, &c. made on behalf of Her Majesty. Appendix, No. 8.

SCOTLAND.

THE Crown property in Scotland produced during the year an income of £. 24,889. 12. 10, derived from the undermentioned sources :—

	£.	s.	d.
Feu Duties - - - - - - - - - - -	11,354	16	3
Casualties - - - - - - - - - - -	413	16	2
Surplus Teinds - - - - - - - - - -	2,822	16	7
Rents of Land, Shootings, &c. - - - - - -	2,253	–	4
Rents of Fishings (chiefly Salmon Fishings) - - - -	6,005	12	6
Rents of Mines (one-half carried to Capital) - - - -	2,039	11	0
£.	24,889	12	10

The arrears at the close of the financial year amounted to £. 7,109. 11.

The Law Charges in Scotland relating to the Crown property are included in the Vote for Courts of Law and Justice, Scotland. For the year to 31st March 1894, the amount paid was £. 441. 14. 1.

A Committee appointed by the Secretary for Scotland in 1890 reported, *inter alia*, in favour of allowing local fishermen to fish for salmon on suitable parts of the coast on payment of a licence. On my appointment as Commissioner of Woods this question was still awaiting solution, and I have thought it due to the importance of the subject to refrain from formulating any definite scheme until, by personal inquiry on the spot, I could satisfy myself on various points which must be kept in view in dealing with it. I hope shortly to be in a position to give effect to the Committee's recommendation, so far as this can reasonably be done.

THE APPENDIX, No. 9, contains the particulars of 31 Leases of Salmon Fishings in Scotland, renewed for one year. The rents reserved in these Leases amount to the sum of £. 2,595. 10. In every case the Fishings had been previously in Lease. Appendix, No. 9.

THE APPENDIX, No. 10, contains the particulars of two Leases of Crown Property in Scotland. The rents reserved in these leases amount to the sum of £. 16. 14. Appendix, No 10.

THE APPENDIX, No. 11, contains the particulars of two Sales of Crown Land in Scotland, the consideration money amounting to £. 904. Appendix, No. 11.

Appendix, No. 12. THE APPENDIX, No. 12, contains the particulars of five Sales of Surplus Teinds, the consideration money amounting to £ 1,282. 14. 6.

Appendix, No. 13. THE APPENDIX, No. 13, contains the particulars of six Sales of Feu Duties and Casualties in Scotland, the consideration money amounting to £. 163 0. 11.

IRELAND.

THE produce of the Crown Rents and Duties in Ireland during the year amounts to the sum of £. 39,870. 13, made up as follows:—

	£.	s.	d.
Quit and other unimprovable Rents, including acquittance fees	39,544	8	0
Rents of Lands, &c. - - - - - - - - -	295	2	6
Rents of Mines (one-half carried to Capital) - - - -	31	2	6
£.	39,870	13	0

The arrears at the 31st March 1893 stood at £. 15,973. 10. 3; at 31st March 1894 they stand at £. 14,330. 13. 1, being a reduction of £. 1,642. 17. 2.

The revenue derived from Ireland consists mainly of Quit Rents payable by Landowners. The collection for the last 15 years is shown in the following table:—

QUIT RENTS, IRELAND.

GROSS ANNUAL REVENUE for the years ended 31st March 1880–94, acquittance fees and twopenny fees included.

Year ending 31st March.	Annual Revenue.			Year ending 31st March.	Annual Revenue.		
	£.	s.	d.		£.	s.	d.
1880 - - - -	41,242	15	8	Brought forward - - £.	322,579	8	10
1881 - - - -	39,166	8	7	1888 - - - -	37,994	14	10
1882 - - - -	38,939	10	7	1889 - - - -	42,575	13	11
1883 - - - -	42,356	7	11	1890 - - - -	41,749	3	2
1884 - - - -	42,839	3	1	1891 - - - -	44,364	1	9
1885 - - - -	42,287	15	2	1892 - - - -	43,145	17	3
1886 - - - -	38,197	18	7	1893 - - - -	40,391	5	7
1887 - - - -	37,549	9	3	1894 - - - -	39,602	1	2
Carried forward - - £.	322,579	8	10		612,402	6	6

Considering that rents amounting to £. 3,464 per annum have been sold in the period, and that the receipt in 1894 is only £. 1,640 less than that of 1880, it follows that the rents are now being more punctually paid.

Appendix, No. 14. THE APPENDIX, No. 14, contains a Schedule of Perpetual and Unimprovable Rents payable to the Crown in Ireland which have been sold during the year. The Rents sold amount to £. 367. 9. 11½; the purchase monies received amount to the sum of £. 9,393. 10. 6.

THE APPENDIX, No. 15, contains particulars of a Sale of certain Slob Land in Ireland, the purchase money amounting to £. 350. Appendix, No. 15.

THE APPENDIX, No. 16, contains particulars of a Lease of certain premises forming part of the Curragh of Kildare, granted at a rent of £. 20 per annum. Appendix, No. 16.

THE APPENDIX, No. 17, contains an Account showing the Charge and Discharge, and State of the Collection of the Land Revenues of the Crown in Ireland during the past year. Appendix, No. 17.

THE APPENDIX, No. 18, contains a General Abstract of Quit, &c., and Leasehold Rents for the same period. Appendix, No. 18.

ISLE OF MAN.

The Rents and Duties received during the year on account of the Crown property in the Isle of Man amount to the sum of £.6,353. 10. 6, which is made up of the following items: —

	£.	s.	d.
Lords' Rents, Fines, Tithes, &c. - - - - - -	1,734	11	1
Rents of Lands, &c. - - - - - - - -	853	11	4
Rents of Mines (one-half carried to Capital) - - - -	3,765	8	1
£.	6,353	10	6

The arrears at the close of the year amounted to £. 407. 12. 8.

The revenue derived from the Crown Property in the Isle of Man consists largely of Royalties on lead. The prevailing low price of that metal operates to restrict output, and to diminish profits. Applications from Crown Lessees for modifications of the terms of their Leases have been to a large extent granted, in order to obviate the suspension of operations, and the consequent dislocation of industrial communities.

THE APPENDIX, No. 19, contains the particulars of four Leases of Crown property in the Isle of Man, which have been granted during the year. Of these, one is of certain sporting rights, the rent reserved in which amounts to £. 4; two of stone, the minimum rents reserved in which amount to £. 6; and one of stone, in consideration of certain Royalties. Appendix, No. 19.

THE APPENDIX, No. 20, contains the particulars of five Sales of Crown Land in the Isle of Man, the purchase monies of which amounted to £. 193. 5 Appendix, No. 20.

THE APPENDIX, No. 21, contains the particulars of a purchase of a piece of land in the Isle of Man on behalf of Her Majesty. Appendix, No. 21.

WALES.

THE amount of Crown Rents and Duties collected during the year on account of Crown property in Wales is £. 13,037. 15. 8, and this amount consists of the following items:—

	£.	s.	d.
Fee Farm, Quit, and other Unimprovable Rents - - -	1,803	4	2
Rents of Land, Shooting, &c. - - - - - -	3,698	4	1
Rents of Mines (one-half carried to Capital) - - - -	7,536	7	5
£.	13,037	15	8

The arrears at 31st March last amounted to £. 2,000. 8. 6.

I am glad to be able to state that there are indications of some revival in the Welsh slate trade. The Crown Lessees of Slate Quarries will be in a position to reap the advantage of the revival, as the terms of their Leases were revised recently, and the expectation of a considerable development of this branch of industry may be fairly entertained.

Appendix, No. 22. THE APPENDIX, No. 22, contains the particulars of 31 leases of Crown property in Wales, which have been granted during the year. Of these, 15 are of mines and quarries, the minimum rents reserved in which will ultimately amount to £. 431. 10 per annum; six are of foreshore, the rents amounting to £. 30. 15 per annum; five are of land and buildings, the rents amounting to £. 17. 0. 6 per annum; three are of sporting, the rents of which amount to £. 66 per annum; and two are of water-rights, the rents amounting to £. 11 per annum.

Appendix, No. 23. THE APPENDIX, No. 23, contains the particulars of 43 Sales by private contract of Crown property in Wales, three of which are of foreshore, the purchase monies for which amount to £. 8 7. 2; three are of land, the purchase monies for which amount to £. 156. 16. 8, and 37 are of encroachments upon Crown property, the purchase monies for which, amount to £. 271. 8. 4.

Appendix, No. 24. THE APPENDIX, No. 24, contains the particulars of Sales of Unimprovable Rents payable to the Crown, and issuing out of Lands, Tenements, and Hereditaments in Wales.

The rents sold amount altogether to the sum of £. 2. 6. 3.

The purchase monies amount to £. 57. 17. 4.

ISLE OF ALDERNEY.

The Department of Woods has been frequently appealed to by the inhabitants of Alderney to do something for the improvement of harbour accommodation in the Island. It has been represented that the granite of the Alderney Quarries would command a ready sale if the shipping facilities were greater. I have visited the Island to inquire into the circumstances. The practicability of meeting the desires of the inhabitants is now under consideration, and I hope to be able to arrive at a definite decision before long.

By a Resolution of the Committee of the House of Commons appointed to inquire into the management of the Department, the following Schedules were required to be inserted in each Annual Report, viz. :—

1st. Of Rents put in charge with the several Receivers of the Land Revenue in respect of property acquired for Her Majesty by purchase, lease, exchange, or otherwise.

2nd. Of the Rents discharged from the Rentals of the several Receivers in respect of property sold, exchanged, or otherwise disposed of.

3rd. Of all Monies due to Her Majesty in respect of the Rents in charge with the several Receivers of Land Revenue under leases or agreements for leases, and which shall have been owing for a greater period than a year, showing the term during which each arrear shall have been accruing, and the measures (if any) in progress for the recovery of the same.

4th. Of all Monies remitted, on Her Majesty's behalf, in respect of any Rents in charge with the same Receivers, specifying whether any previous remission has taken place in respect of the same Rent, and the circumstances and authority under which remitted.

5th. Of all defalcations that shall have taken place in respect of Monies due and owing to Her Majesty, specifying the circumstances under which such defalcation shall have taken place, and the means (if any) taken for the recovery of the monies.

Of these Schedules there is occasion, for the purposes of this Report, to introduce the 2nd, 3rd, and 4th only. Appendix, No. 25. (A.), (B.), (C.)

ACCOUNTS.

The Appendix (A.A.) contains an Account of the Monies derived from the Hereditary Possessions of the Crown, under the management of the Commissioners of Woods, Forests, and Land Revenues, received within the year ended 31st March 1894, and the application of all such Monies, including payment into the Exchequer of the Surplus Income arising from the Possessions and Land Revenues of the Crown during the same period. Appendix, (A.A.)

The Account for the preceding year, ended on the 31st March 1893, has been audited, and the subsequent Monthly Accounts have been rendered to the Comptroller and Auditor General for the period up to and including the month of February last.

E. STAFFORD HOWARD. L. S.

Office of Woods, &c.,
28th June 1894.

Appendix, N° 15.—A SCHEDULE of LANDS in *Ireland*, which have been Sold by Private Contract between the 1st day of April 1893, and the 31st day of March 1894, both days inclusive, under the authority of the Clare Slob Reclamation Act, 1873, Section 45, showing the Date of the Conveyance thereof; the Property comprised therein; the Names of the Purchasers; the Terms unexpired of the subsisting Leases at the time of Sale; and the Purchase Money paid for the Property.

DATES of CONTRACTS.	PREMISES SOLD.	NAMES of PURCHASERS.	TERMS UNEXPIRED of subsisting Leases at the Time of Sale.	PURCHASE MONEY.	REMARKS.
1893:	COUNTY CLARE:			£. s. d.	
Dec. 9	About 63 A. 3 R. 32 P. of Slob Land, with Reclamation Works thereon.	The Fergus Reclamation Syndicate, Limited.	- - -	350 - -	The Slob Land sold was comprised in the area over which the powers given by the Clare Slob Reclamation Act, 1873, extended, and the undertakers under that Act had been in possession for reclamation purposes. The undertakers having failed in carrying through the reclamation, the Land was sold in pursuance of statutory powers.

Appendix, N° 16.—A SCHEDULE of LEASES, of MESSUAGES, TENEMENTS, LANDS, and HEREDITAMENTS, in *Ireland* belonging to the Crown, granted between the 1st day of April 1893, and the 31st day of March 1894, both days inclusive; showing the Dates of Leases; the Premises comprised therein; the Names of the Lessees; the Terms granted; the Annual Value of the Premises, as estimated or returned by the Surveyor employed to survey the same; the Rents reserved; the Fines paid; the Insurances to be made against Fire; and upon what other considerations such Leases respectively have been granted: and showing also the Annual Value of such Parts of the Premises as have been before in Lease by the last preceding Surveys or other Accounts; and the Rents reserved, and Fines paid for the preceding Leases.
